## LOW TEMP DISPLAY CASES

In 1961 when the founders of Zero Zone started the company, they pledged to “build the best equipment in the business at a competitive price.” Their introduction of the first low temp glass door display case set the standard for others to follow. Today, Zero Zone low temp display cases are recognized for their high quality, application flexibility, attractive product merchandising, and above all, energy-efficiency. We’ve been designing, manufacturing, and perfecting low temp display cases for over 50 years.

### Best Product Impact

- Exceptional Packout & Facings—stock and display more product
- LED Lighting—creates stunning product display
- 100% Usable Interior—display only your products, not case components

### Easy Installation & Maintenance

- Structural Integrity—solid end frames with easy piping access
- Forkliftable from either end—makes unloading & installation easy
- Easy-Lift Rear Panels—no tools required
- Patented Polymer Coil Covers—sleek look with quick access

Structural Integrity

Easy to Move

Patented Coil Covers

“No-Tools” Access to Coils and Rear Panels

The Evolution signature represents the progression of research and development done in collaboration with our customers to continuously improve our products. Lower energy usage, reduced refrigerant emissions, and enhanced merchandising effectiveness are just a few of the results brought on by the Evolution process, and Zero Zone will continue to transcend the challenges that lie ahead.

**EVOLUTION**  
THE NEXT STEP TOWARD PERFECTION

Back-to-Back Model

## Lower Energy Costs

- Advanced V-Coil Technology—the most efficient coil design in the industry
- 2 1/2" Foam Panels—thickest foam in the industry with 25% greater R-Value
- LED Lighting—makes products pop and operating costs drop
- ELM Doors with Heated Glass—optimized for energy & clear time
- Electronic SSC Fan Motors—provide great airflow with lowest operating cost

Advanced V-Coil Technology

Thickest Foam in the Industry
