TOLL FREE ORDERING: 800-622-7333

Dear Grower Friends,

Welcome to the 2022 Otis S. Twilley Seed Company catalog. On behalf of our entire staff, we thank you for your continued trust in our company.

Worldwide shortages and delays continue to be a challenge in our industry and many others. Nevertheless, we still find satisfaction in watching seeds grow into food and flowers. Seeds feed the world.

As always, we offer a wide array of new products, each carefully selected with our customers in mind. Look for the  symbol from asparagus to zinnia. The "wow" varieties of the year are tomatoes. Please check out the Rubee series and the new "Plus" improvements of old favorites.

We strive to offer the highest quality seed available and to service your orders promptly. We wish you a bountiful growing season in the coming year. Thank you for the privilege of allowing us to serve you.

Sincerely,  
George B. Park, President

George B. Park is a third generation seedsman and has spent his entire working life in the seed industry. Twilley Seed Company is proud to operate as a trial site for All America Selections.

### On the Cover: Chinese Cabbage Emiko

See pg. 14 for more information.

### Terms

If you pay by check, please make it payable to "Twilley Seed Co." Payable in U.S. Funds only. There will be a \$35.00 charge on all returned checks.

Credit Accounts are due net 30 days from invoice date. Interest will be charged on past due accounts at a rate of 2% per month (annual rate 24%).

**Seed is non-returnable except with proper authorization from Twilley Seed Co. No returns on any special purchases or opened packets. Customers purchasing greater than \$100 in special buys will be asked to sign a "no return" waiver. There will be a restocking fee of \$30 on all returned orders.**

### Conditions of Sale

All orders are subject to the Conditions of Sale, Special Notices and Terms printed on the Order Blank in this catalog. Please read these and sign your order blank. Seed is not intended for resale or re-packaging. In the event of resale and/or repacking seed, the Otis S. Twilley Seed Company shall not be held liable for any resulting claims, actions or proceedings.

### Handling Charges

Include in order

If your order is:	ADD
Under \$25.00.....	\$5.00
\$25.01 - \$99.99.....	\$3.00
\$100 - or more.....	No Charge

Free shipping up to 30lbs.

Shipments outside Continental US -- including AK, HI, US Protectorates, etc. -- contact us for a quote.

Express Delivery on request; charges will be added.

For fastest service use credit card and call early in the day.

### Hours of Operation

Mon.-Fri. 8:00 a.m. - 5:00 p.m. EST  
Seasonal Hours (January-March)

Mon.-Fri. 7:00 a.m. - 6:00 p.m. EST  
Sat. 10:00 a.m. - 1:00 p.m. EST

Closed New Year's Day, Memorial Day, July 4, Labor Day,  
Thanksgiving Day, Friday after Thanksgiving, Christmas Eve & Day

## GROWER DISCOUNTS!

Over \$200 ..... 3%

Over \$1000 ..... 5%

**That really adds up!**

Please note the following conditions: Discount applies to any single order placed and is not cumulative over the season. Discount applies only on catalog prices. Discount does not apply to shipping charges.

Note -- Twilley Rated Credit Accounts: Discount for charge customers is applicable only on orders which are paid within 30 days from invoice.

### REGARDING DESCRIPTIONS

Growth characteristics such as days to maturity and fruit size will vary from location to location and season to season. The descriptions in this catalog only represent an average for each seed variety.

### REGARDING SEED TREATMENT

Many crops can be affected by serious seed-and-soil-borne diseases. Most of our vegetable seed is available treated with approved protectants to promote better seedling growth -- especially under cool, wet conditions -- and reduce the need for field application of pesticides. These efforts are not a guarantee against seed-borne or soil-borne pathogens, but do help protect against infection. We offer high quality varieties with resistance to diseases whenever they are available. Please look for these characteristics as you plan your purchases.

**Untreated Seed:** We offer many varieties as untreated seed, and have expanded our inventory to ensure more availability to you this year -- look for highlighted catalog numbers ending with **U**, for example: **1234U**

# Professional Seed Series for Commercial Growers

## Leaders in Excellence

The vegetable variety you choose for planting is one of the most important decisions you make. Each brand in our "Professional Seeds Series" offers notable benefits to help guarantee your success in producing quality crops that bring the greatest return on investment.

Twilley constantly reviews products from breeders worldwide, investigating attributes such as quality, stress and disease tolerance, yield potentials and market acceptability. Superior varieties are added only if they represent the best in their respective classes.

Therefore, you can be confident when selecting from these vegetables.

**Indian Brave F1**

Large fruit produced in abundance; Great yield potential. Resists cracking.

**Sweet Success F1**

Performs well on stakes or trellis. Medium green, smooth, high quality fruits.

**Superpik F1**

Early straightneck with solid disease resistance and precocious yellow gene.

**Emperor's Jade F1**

Early zucchini. Glossy deep, green fruit. Tender, firm flesh. Good yield potential. Powdery mildew tolerant.

**Corvette PMR PVP F1**

Smooth round fruits with great color and strong handle. High yield potential.

**Blue Knight F1**

Early, strong, uniform. Deep blue, firm, curly leaves hold up well when cut.

**Athena F1**

Early maturity, small cavity, high quality fruit. Firm flesh, great flavor.

**Obsession F1**

Both sweet and creamy tender. Proven main-season market leader in many areas.

**Savanna F1**

Upright, vigorous plants, widely adapted. Round, smooth, tangy flavored leaves.

**Celebrity F1**

Strong plants, widely adapted, good disease package. Large, red flavorful fruits.

**Kingman F1**

Rind light green with mid-green stripes. Crimson gene type with extremely bright red flesh. Strong vines, High potential yield.

**PS 09941819 X5R® F1**

Green to red. Jumbo bell with super disease package. Non-purpleing gene so color comes in clean with no dark streaks even under stress.

**Kestrel F1**

Roots form very smooth globe shape and deep color from very early stage onward. Very high yield potential.

**Blue Vantage F1**

Deep blue-green heads. Strong, sturdy plants produce well-developed root systems.

# 2022 NEW VARIETIES

**Sweet Corn  
Catalyst XR F1**

Earliest SuperSweet on the market. Sweet, tender bicolor ears. See page 20.

**Collard Top Chop F1**

Large, upright, deep green leaves. High bolt tolerance. See page 17.

**Lettuce Meridian**

The first Iceberg ever available with tolerance to Fusarium Race 1. See page 35.

**Shallot  
(Echallion) Creme Brulee F1**

Easy to grow "banana shallot." Mostly single center mild flavored bulbs. See page 44.

**Spinach Plymouth F1**

Quick growing spade shaped leaves, slightly savoyed. Medium dark green, erect stems. See page 62.

**Tomato  
Better Boy Plus F1**

All the original Better Boy genetics with broader disease protection and higher brix. See page 75.

**Marigold  
NoSento Lime Green F1**

No Marigold scent. Eye catching greenish yellow flowers on tall, cutflower length stalks. See page 99.

**Asparagus Grande F1**

Improved dioecious variety for extra high yields. Resistant to Fusarium Wilt. See page 7.

**Zinnia Magna Mix**

Large Dahlia-flowered double blooms in a rich color range including a bright green and a deep ruby red. See page 110.

# Look For this Symbol!

**Pepper Pathfinder F1**

Spicy serrano pepper adaptable to both hot and cool weather. Smooth, shiny green fruits. See page 53.

**Pepper  
SVPB8415 X10R F1**

Beautiful large, blocky bell pepper developing from green to yellow. See page 49.

**Pumpkin Hulk F1**

The name says it all. Extra large Howden shaped pumpkins perfect for large jack-o'-lanterns. See page 56.

**Tomato Jolene F1**

Noted best in class for heat set in trials throughout the Eastern U. S. Firm, meaty flesh and deep red interior. See page 73.

**Tomato  
Rubee Dawn F1**

57 days from transplant. Very early for a large fruited tomato. Great acid/sweet flavor balance. See page 76.

**Basil Newton**

Bright green leafed basil with clean, refreshing Genovese flavor. Resistant to fusarium. See page 32.

## Explanation of Symbols in this Catalog

Listed for the first time in the Twilley catalog. Some of these are newly introduced for 2022.

F1

Indicates a hybrid variety

U

Located at the end of a catalog number; indicates a variety of untreated seed.

The "Professional Seeds Series™", a selection of Twilley varieties called "The Best of The Best". We believe that our "Professional Seeds Series" represents the best varieties available in their respective classes.

Designated a winner by All-America Selections, regional winners have performed truly well in a specific regional climate while national winners have thrived in four or more regions. All-America Selections is a non-profit organization which evaluates new seed-grown flowers and vegetables from around the world for home garden performance. Winners are consistently and reliably good varieties.

PVP

Indicates that a Plant Variety Protection certificate has been granted by the USDA because of the uniqueness of the variety. Symbol is also used if this certificate is applied for. Unauthorized propagation of such a variety is prohibited.

Well-suited to growing in packs for bedding plant sales.

Particularly popular or attractive for fresh market sales.

Well-suited for cut flower production.

Well-suited for greenhouse production.

Novelty market items.

The Otis S. Twilley Seed Company is proud to partner with Sakata Seed America to offer exceptional products from the Sakata Harvest Collection.

These vegetable seed varieties have been carefully selected for easy and dependable gardening. The wide assortment covers both cool and warm weather seasons.

Freshly harvested vegetables are not only packed full of flavor and enjoyable to harvest, but are also known to have increased health benefits. Harvesting your own collection is something everyone looks forward to.

## Artichokes

About 500-600 sd/oz.

**2005U Green Globe** Traditional type, large green head. About 50% produce artichokes during the first season on 30" stems.

**2010U Romanesco** Exotic Italian heirloom type, stems and artichokes are marked in bronze and purple. Ornamental/Edible.

## Asparagus Perennial

(*Asparagus officinalis*)

About 900-1,000 sd/oz. Pkt plants 25' of row. Seeds germinate in about 15 days. Grow seedlings on until following spring. Set plants 9-15" apart in rows 48-72" apart. Plantings usually yield well for many years under normal conditions.

**2019U Grande F1** Mid-early. Widely adapted to cool, medium and warm climate areas. Heat resistant. Produces ideal tight head quality even in hot growing conditions. Large to jumbo spears can reach a whopping 1" diam, depending on plant spacing. Generous spacing can produce 12" spears with 1" diam, while close spacing produces longer spears with avg. 4-5" diam. Tight heads for smooth appearance. Improved genetics enables this dioecious variety to achieve extra high yields while allowing more reliable seed supply. Resistant Fusarium wilt.

**2028U Walker Deluxe F1** High yields, widely adapted to cool, medium and warm climate areas. All male hybrid; every plant produces spears rather than seed. Ideal quality even where harvest-time day temperatures rise above 85° F. Thick, mid-green spears can reach 3/8"-3/4" diam, depending on spacing. Tight heads for smooth appearance. Tolerant of Rust, Fusarium, Cercospora, Botrytis. Fresh Mkt, Shipping, Restaurant, Processing.

## Beans (Phaseolus vulgaris humilis)

About 1000-2000 sd/lb 70-90 lbs/acre. Sow 2-4" apart, 1-2" deep, on 18-36" rows. 1 lb sows 200 ft. Germ about 6 days. Days to maturity are from sowing.

### French Filet Beans

About 2000-3000 sd/lb.

**1050U Mascotte** 50 days. Very early French Filet type bean with top-bearing trait for easy harvest of clean pods. Compact, upright habit and dense fibrous root system enables Mascotte to bloom and bear prolifically in containers for home or greenhouse use as well as on open ground. Delicious crisp beans, very refined, long, slender and straight, with small sieve size and good 5-6". Bushy plants bearing at 10" reach about 24" at top of season with 8-10" spread. Resistant A, BCMV, HB. Fresh Mkt, Containers, Home Gdn.

**1055 & 1055U Outlaw** 55 days. Long, straight, extra deep green 5 1/2" pods. Upright bush holds pods well above ground. Stands well with very low risk of lodging. Tender texture and sweet flavor just right for fresh mkt sales. Concentrated pod sets allow efficient fresh mkt harvest with high yield potential. Widely adapted with good heat tolerance. Resistant BCMV Fresh Mkt, hand or machine harvest.

Bean Disease Codes	
A	Anthraxnose
ALS	Angular Leaf Spot
BBS	Bacterial Brown Spot
BCMV	Bean Common Mosaic Virus
CB	Common Blight
CT	Curly Top
HB	Halo Blight
R	Rust

**Walker Deluxe F1**

**Green Globe**

**1063 Serengeti PVP** 55 days. Very early. Long, straight, fancy fine sieve beans. Very slender, good for "baby" beans preferred for nouvelle cuisine. Excellent for tray pack. Very high quality pods are extra tender, stringless, dark green and gourmet flavorful. Seed holds well in pod giving long harvest window and good shelf life. Harvest at 4-5" while still slim (#2 sieve or 1/4"). Concentrated set; mechanical or hand harvest. Narrow, strong upright plant holds beans well above soil. Widely adapted with high yield potential. Resistant BCMV, A. Tolerant R. Fresh Mkt, Tray Pack, Shipping.

### Bush Green Pod Beans

**1007U Bush Blue Lake 274** 55 days. Bush form of Blue Lake pole, known for its delicious flavor, size, yield, and quality. Long dark green pods are round, 6" x 3/8", slow to form fiber/seeds. Canning, Fresh Mkt.

**1012U Bush Kentucky Wonder #125 PVP** 58 days. Bush form of Kentucky Wonder pole bean. Long dark green pods 6-7" held well off the ground. Heavy yields, strong, upright plants. Resistant BCMV. Fresh Mkt.

**1014 Cabot** 55 days. Improved bean with a wonderfully broad disease package promoting very high yield potential. Pods set mid-high on upright 18-20" plant, held 3" on avg above soil. Bred for strong "standability" to support weight of crop. Pods detach easily for a clean, easy harvest, with a high % of stems and caps intact. Good solid green color, long, straight 5-6" pods. Resistant BBS, BCMV, CB, CT, HB. Fresh Mkt, Mechanical Harvest, Gdn.

**1057 Roma II** 59 days. Bush form of the well-known Romano pole, with the same delicious flavor. Italian-type, flat green pods to 4 1/2" produce white seeds. Sturdy Plant. Resistant BCMV. Tolerant R. Fresh Mkt, Shipping.

**Grande F1**

**Outlaw**

**Bush Blue Lake 274**

**Roma II**

**Cabot**

**Bush Kentucky Wonder #125 PVP**

**Kentucky Blue**

**Seychelles**

**Fordhook #242 [Bush]**

**Golden Rod**

**Orient Wonder**

### Bush Purple Pod Bean

About 1000-2000 sd/lb.

**1062U Royal Burgundy** 51 days. Round, tender, stringless; purple pods turn green when cooked. Upright, hardy plants. Fresh Mkt.

### Bush Wax Pod Bean

About 1000-2000 sd/lb.

**1143 Golden Rod** 55 days. Brightest yellow of any wax bean! Vigorous, upright plants produce a bumper crop of round, straight, 5-6" pods with delicious, rich, buttery flavor. Resistant BCMV. Commercial, Fresh Mkt, Roadside, Garden.

### Lima Bean

**1081U Fordhook #242 [Bush]** 75 days. Famous Fordhook quality; improved strain which reliably sets blossoms and pods under adverse weather conditions. Produces reliable yields of high quality, large-seeded limas with delicious flavor; 3-4 seeds per 4" pod. Vigorous plants, heavy yields.

**1086U Henderson [Bush]** 65 days. Baby lima type. Small, 3" pods contain 3-4 small, flat, tender, dark green limas. Erect plants. Fresh Mkt.

**1091U King of the Garden [Pole]** 87 days. Popular, giant large-seeded lima beans fine for drying. Large, wide 6" pods contain creamy white beans, 4-5 to each pod. Produces a continuous crop over a long season.

**Royal Burgundy**

### Pole Bean

**1110 Kentucky Blue** 60 days. Pole variety 6-7 days earlier than KY Wonder! Combines characteristics of Kentucky Wonder and Blue Lake for excellent beany flavor. Green pods, 8" are round, straight, smooth. Vigorous, highly productive vines. White seeded. Resistant BCMV. Fresh Mkt, U-Pick.

**1118U Seychelles** 55 days. Long 5-6" slender deep green pods, uniformly straight, stringless and tender-crispy. Vigorous fast growing high yielding deep green vines grow 7-9 ft with support. Multiple pickings over long harvest season. Nationwide trials reported excellent quality and yield. Trim stems above a 5-6 ft trellis to promote continued yield and bushier growth lower on plant. Tolerant BCMV. Fresh Mkt, Gdn.

### Yard Long Bean (*Vigna unguiculata*)

**1053 Orient Wonder** 85 days. Extra-long 15-18" pencil-thin pods of the type sometimes known as Asparagus Bean. Improved for ability to set pods well even in cooler climates. Vines are quite vigorous, thrive through warm humid weather. Seed develops in pod very slowly, permitting extended harvest of pods that stay long, thin, smooth and tender. Sieve size 2. Fresh mkt, Specialty, Restaurant.

### Soybean (Edamame)

**1329U Midori Giant** Early maturing: 65 days in South with long daylength, 90 days in north with short daylength. Branching 2-3' plants spreading to 12". Green pods with succulent buff seeds. About 1300 seeds per lb. Widely adapted across US. Capable of large yields. Large pods, with up to 90% producing 2-3 seeds per pod.

## Beets *(Beta vulgaris)*

Approx. 1,600 seeds/oz. Pkt plants 25' of row; 1 oz sows 100'. Direct sow 6-10 lbs/acre or 300 MSd. Sow seed 3/4-1" deep, 2-4" apart in rows 12-30" apart. Germ in about 8 days. Thin plants to 3" apart in the row. **Days to maturity are from sowing.**

## Hybrids

**2058 Falcon F1** 55-70 days for 2-2½" bunching size, 80-85 days for 3-4" jumbos. Fast grower, very heat tolerant, excellent vigor, medium top. Forms a solid blocky root with small tap and medium crown. Strong solid red color inside and out. Potential for excellent yield. Fresh Mkt, Processing.

**2061U Fresh Start F1** 25-35 days baby leaf harvest. Deep green, smooth round-oval leaves with distinct red veins and dark red stems, this beetless beet has excellent appearance for spring greens and mixes. Upright habit helps keep leaves clean and undamaged until harvest. Reaches baby-leaf size very quickly. Good disease traits. Highly bolt resistant. Resistant DM. Baby Leaf.

**2065 & 2065U Kestrel F1** 53 days. Roots form smooth globe shape and deep color from very early stage. Dark red interior with very little zoning. 12-13" tops, bright glossy mid green leaves, brilliant ruby stems. Small, late bolting crowns, drought hardy. 10-12% sugar content. Tops stay erect and healthy due to high disease tolerance. Top appeal in bunching. Resistant CLS, Tolerant PM, DM, RZ. Fresh Mkt, Baby Beets, Processing.

**2075 Merlin F1** 55 days. Solid dark red interior resists zoning even in adverse hot weather. Bright red stems 15-17" with dark green leaves that stay green all season. Roots have refined crowns, tap roots, smooth skin and high Brix. Small slow bolting crown. High 12-15% sugar content and bright attractive appearance. Tolerant CLS, DM, and Drought. Fresh Mkt, Processing.

**2085 & 2085U Red Ace F1** 53 days. Detroit Dark Red type, well suited to a wide range of growing areas. Full globe shaped red roots, uniform deep red interior color. Strong, graceful tops 13-15". Fresh Mkt, Processing.

**2090 Red Cloud F1** 60 days. Perfectly round shape. Solid deep red zoneless interior. Non tapering base, smooth refined crown. Attractive red 14" stems, green leaves. Very high sugar content. Pacemaker type, best sub when needed. Fresh Mkt, Processing.

## Open Pollinated

**2035 Avalanche** 50 days. AAS Winner 2015. Creamy white, very sweet, mild roots with bright white interior rings and no tinge of red. Has advantage of not staining. Nationwide trials reported very uniform round roots, avg 3" diam, about 9 oz, with restricted tap root. Excellent eating quality raw or cooked, with no trace of bitter or earthy aftertaste. Plant grows 10"-24" tall, depending on timing of harvests, spreading about 6". Foliage is rich green with light green veins and stems, nice for beet greens. Tolerant CLS. Fresh Mkt, Shipping, Restaurant.

**2040U Burpee Golden** 55 days. Sweet fine textured deep golden roots. Non-staining juice. Good eating tops, light green with pale golden ribs. Colorful salad, roots and tops.

**2043U Chioggia** 60 days. Italian heirloom. Sometimes called candy stripe or bulls eye beet because of its alternating red & white concentric rings. Round, sweet root is 3". It turns a pretty pale pink when cooked. Mild flavored 12" greens may be eaten raw or cooked.

**2045U Cylindra** 55 days. Long shape, more equal slices per root. Dark red quality roots 5" x 1½". Fresh Mkt.

**2050U Detroit Dark Red Medium Top** 60 days. Well known bunching variety. Deep red globe-shaped roots are uniform and very smooth. Bunching, Fresh Mkt, Processing.

**2053U Detroit Golden** 50-60 days. Produces good yields of large, round orange roots. Beets turn golden-yellow when cooked and do not bleed. Roots retain their sweet flavor when cooked. Green leaves with yellow stems are very tender and mild. Also excellent for pickles.

**2055 Detroit Supreme** 59 days. Refined Detroit type.

★ Dark red interior, very light zoning. Smooth globe shape, small smooth crowns. Dark matte green leaf on 14-16" tops. High tolerant to bolting and very high yield potential. Tolerant CLS, DM. Bunching, Fresh Mkt, Garden.

**2060U Green Top Bunching [Early Wonder]** 52 days. Early, sweet roots; high quality tops. Bunching. Fresh Mkt.

**2084 Rainbow Mix** 60 days. Bright ornamental edible blend of colored beet roots. Includes roots that are white w' white stem, golden w' golden stem, ringed red/white with rose tinted stem, ringed rose/carmine with red stem & purple foliage, as well as the traditional deep beet red, with deep purple stem & foliage. Delicious sweet roots. Stem & leaf can be used as greens like chard. Fresh Mkt, Edible Ornamental, Container Sales.

**2099 Touchstone Gold** 60-65 days. Solid vibrant yellow interior with orange-scarlet exterior and light green foliage. Highly bolt resistant. Smooth high quality globe shaped roots. Sweet & neat. Fresh Mkt, Specialty, Bunching, Multi-pak.

## Broccoli

(*Brassica oleracea*, *Botrytis* Group)

Approx. 9,000 seeds/oz. Seeds germ in about 10 days. Set plants 12-24" apart in rows 18-36" apart. **Days to maturity are from transplant.**

**2103 ArtWork F1** Dual Purpose. 5" crown heads in 50 days from summer transplant or 60 days spring, about a week earlier than Packman, for which ArtWork is currently the best early replacement. 10-14 days after crown harvest, aggressive side shooting yields high volume of broccoli bouquets which continues over a prolonged period, usually until growing conditions become unfavorable. If only shoots are desired, the crown can be pinched at 1" diam at 40-45 days from transplant, with side shoots coming in 10-14 days and onward. The entire side shoot is delicious as broccoli bouquet from its long stem to the compact clusters of fine beads at the tip.

**2104U Asprabroc F1** 50-60 days. You may have seen this type in the produce section at grocery stores recently. Thin tender, asparagus-like stems bear numerous fronds of small linear florets along the upper section. Vigorous 20-24" branching plants. Pinch the central stem just before it becomes dime-sized to promote growth of side shoots. Wonderful mild sweet flavor, and bright green color that kids of all ages love. Continues to produce after cutting for another 4 weeks. Good for early spring and fall crops. Can be planted at close spacing for high yield. Specialty Mkt, Fresh Mkt, Restaurant.

**Note - Orders for more than 10,000 seed require breeders marketing agreement. Please call for information.**

**2106 Burney F1** 65-70 days. Warm weather tolerant. Part of the Eastern Broccoli Project. 5-6" domed heads for premium crown cuts. Crops in spring, late summer or fall. Mid green heads, uniform medium bead. Large frame plant about 24-30". Resists purpling under stress. Dense heads promote high pack-out weight. Consistent in trials all over the eastern US including Georgia and other high temp areas. Crown and bunching mkt.

## Eastern Broccoli Project

In recent years, broccoli has become a major specialty crop in the United States, but the lion's share of it is produced in California and trucked long distances to reach markets.

Broccoli plants resist flowering when faced with more than 8-10 hours of heat per day. Without flowers, there can be no florets, so the farmer ends up with fields of green, leafy plants. No flowers, no broccoli stems.

In 2011, plant scientists at Cornell University set a goal to develop broccoli varieties that will grow in the hot, humid climate and variable weather conditions of the eastern United States. Success would result in a boon to the increasing interest in a ready supply of locally grown food.

The advantages of delicious farm fresh produce and lower shipping costs will offset expected lower yield per acre.

This year, Twilley Seed is pleased to offer two varieties which have proven themselves in the Eastern Broccoli Project:

Look for Broccoli Burney and Broccoli Lieutenant hybrids to grow for local market.

Cat#	Broccoli (M=1000)	100 sd	1000 sd	5 M (per M)	10 M (per M)	50 M (per M)	100 M (per M)

**Gypsy F1**

## More Broccoli

**2132U Green Magic F1** 60-65 days. Mid early and widely adapted across production areas. Uniform harvest of large, tight, semi-domed heads with medium to small beads. Sturdy habit stands well in field with good access for harvest. Small leaf nodes leave little scar when stalk leaves are removed at harvest. Fresh Mkt, Processing.

**2135U Gypsy F1** 65 days. Among the earliest Broccolis to tolerate and perform well after the onset of warmish weather. Overall uniformity, excellent smooth domed beads with small tightly refined heads. Tolerant DM. Bunching, Crown Mkt, Fresh Mkt, Shipping.

**2138 Lieutenant F1** 75 days. Early and well adapted to warm season. Part of the Eastern Broccoli Project. Heads up into a smooth deep green crown with medium beads. Long clean stems with minimal side shoots, excellent for bunching. Concentrated harvest window. Minimal hollow in main stem. Uniform beads, minimal cat eye in heads. Vigorous foliage with good head protection. Bunching, Floret, Local/Regional Crown.

**2140 Marathon F1** 75 days. Deep, dome-shaped heads, small beads, and vigorous plants. Tolerant BLS, BR, DM, HS. Fresh Mkt, Processing.

## Broccoli Raab

(*Brassica Rapa*, *Rutab Group*)

Approx. 9,000 seeds/oz. ¼ oz sows 100' of row. Direct-sow 2 lbs/acre. Sow seeds ¼" deep in rows 2½'-3' apart. Seeds germ in about 10 days.

**2177U Spring Sprouting** 60 days. OP. Popular ethnic vegetable. Early. Many small, tender shoots and leaves with delicious flavor. Fresh Mkt.

## Brussels Sprouts

(*Brassica oleracea*, *Gemmifera Group*)

Seeds germ in about 10 days. Set plants 18-24" apart in rows 24-40" apart. **Days to maturity are from sowing.**

**2192 Confidant F1** 145 days from sowing. Midseason variety with high yield potential due to strong FY resistance and tight packed stem. 1-1¼" sprouts of excellent deep green color and uniform round shape. Stalk averages 25" and is lined with 16-19 rows of sprouts. Resistant FY. Fresh Mkt, Processing.

**2206 Hestia F1** 100 days. 1" diameter sprouts have bright green wrappers and smooth, dense yellow interior. Erect 24" plant, very uniform, with strong frost tolerance and delicious flavor after temps fall into the 30's. Found to tolerate both warm and cool weather with good flavor, in AAS trials. *Southeast, Mountain/Southwest.*

**Lieutenant F1**

**2203U Igor F1** Main season 180 day variety for fall, winter & overwintering schedules. High yield potential. Uniform stems & sprouts. Stems are very broad, about 32" and bear abundant 1"-1½" sprouts, nicely spaced for clean development, borne mostly from about 6" above ground on up, for less soil-splash. Sprouts are uniform, deep green, firm, smooth and round. Healthy plants, very robust against frost. Easy to pick, recommended for hand harvest of refined high quality sprouts. Fresh Mkt, Processing.

**2204 Jade Cross F1** 90 days. Extra early, can be sown later than most varieties and still matures well in early frosts. Shorter stalks than most varieties, less prone to lodging or other wind damage. High yield of medium firm, round, 1" diam, deep green, well wrapped sprouts spaced closely on stalk. Tolerant of heat stress. Widely adapted.

**2209 Jade Cross E F1** 90 days. Popular Jade Cross type but with Extra disease tolerance. Vigorous stalks packed tight with high yield of firm, deep green, well wrapped sprouts. Early maturing, can be sown later than other varieties and still mature well in early frosts. Compact stalks less subject to wind damage or lodging. We suggest topping plants 3 weeks before harvest. Tolerant Botrytis. Fresh market, processing and home garden.

**Jade Cross E F1**

**Hestia F1**

**Green Magic F1**

## Cabbage

(*Brassica oleracea, Capitata Group*)

About 5000-9000sd/oz; Germ about 10 days. Set plants 12-24" apart on 24-36" rows. Shipping/fresh mkt. **Days to maturity are from transplant.**

### Early Green

**2229 Charmant F1** 52-64 days. Stonehead type, with larger heads. Solid, compact, deep blue-green 2½-3 lb heads are uniform, with good wrapper leaves. Upright, vigorous, plants suited to close planting, spring or summer; well-adapted to all growing areas. Excellent baby cabbage. Resistant BR, FY, TB. Fresh Mkt, Processing, Shipping.

**2233 Fast Vantage F1** Extra early heading, just 50 days from transplant in trials. Round, green, medium to medium-small heads with excellent sweet flavor and good heat tolerance. Improved uniformity in cool conditions. Fresh Mkt.

**2241 Gallican F1** 65-70 days. Mid-Early to Main. Tall stem with upright wrappers holds perfectly round heads well off the ground for cleaner harvest. Heads are dense, 3-5 lb, 7.5"-8" diam with no bottom leaves lying on the ground. Sweet salad type with wonderful flavor raw or cooked. Good field durability, deep green wrappers. Fresh mkt, Restaurant, Slaw, Shipping..

**2259 Katarina F1** 45 days. Very sweet, crisp, early, and mild, with much less bitterness than comparisons. Small tight 4" heads for baby cabbage that make gourmet cole slaw and won't crowd a fridge. Plant 10-24" depending on stage. Grows small side heads after harvest of main head. Gdn Ct; Restaurant, Roadside.

**2284 Quick Start F1** 55 days. Early, solid head cabbage with a short core. Uniform plants produce 3½ lb heads. Widely adapted. Tolerant FY. Fresh Mkt. Shipping.

**2348 Stonehead F1** 45-50 days. Early. Mid-sized 2-3½ lb heads. Round, smooth, gray green, and very tight. Compact habit allows close spacing. Tolerant TB. Fresh Mkt, Shipping, Bedding plant.

### Main Green

**2219 Blue Vantage F1** 67-80 days. Ball head type. Deep blue-green heads weigh 3½-4 lbs and 6¾" size with short core on medium plants. Strong, sturdy plants produce well-developed root systems which help withstand moisture fluctuations. Resistant BSP, FY, TB, Tolerant BR. Fresh Mkt, Shipping.

**2225 Bobcat F1** 80 days. Blue-green. Excellent disease package. Round heads to 4-6 lbs. Very solid with short core, holds well in field. High disease rating can allow for high consistent yield potential. Resistant FY 1. Tolerant AL, BR. BSP, TB, TT. Fresh Mkt, Shipping, Shredding.

**2252 Greenboy F1** 67-80 days. Mid Season. Medium frame, 6½", 3-3½ lb heads with solid white interior. Good wrapper protection and solid quality overall. Widely adapted to worldwide mkts. Noted for excellent performance under stress from heat and rain. Resistant FY 1. Fresh Mkt, Shipping.

**2360 SuperStar F1** 80 days. High quality fancy pack heads with great flavor. Excellent wrapper leaves and great holding ability in field and after harvest help deliver top quality all the way to mkt. Medium large 3 lb heads are 6-7" across, just right across from main mkt. Resistant FY 1, Tolerant BR. Fresh mkt, Shipping, Processing.

**2274 OS Cross F1** 80 days. Large frame, resists bursting til very late. Flat-round 5lb. heads which can be grown to 14 lbs under optimum conditions. Adapted worldwide, heat tolerant.

## More Cabbage

### Midlate Green

**2256 Gunma F1** 80-85 days. Huge, Danish flat round hybrid. Large frame plant spreading 22"-24" has potential for 5-7 lb heads up to 9"-12". Mid-green, mid-main season. Big, sweet, tender with fluffy interior that is superior for shredding, slaw, kraut, mixed salad bags. Very short core. Resistant TB. Kraut, Shipping, Shredding, Roadside.

**2258 Harvest Mist F1** 80 days. Very large, 9.9 lb avg. head weight. Deep blue green wrapper leaves, ivory white interior. Flat round shape held up away from soil, very firm. Uniform, heat tolerant, a very good shipper. Grows a beautiful field of cabbage.

**2362 & 2362U Vantage Point F1** 82 days. Large, dense, dark blue-green heads have good market appeal. Produces 3½-5 lb. heads in standard growing season. Capable of extra-large 5-10 lb. heads when grown successfully into late season. Resistant FY. Tolerant TB. Fresh Mkt, Kraut.

### Red

**2287 Red Dynasty F1** 75-80 days. 7-12 lbs. Extra large round-oval red cabbage. Both wrappers and interior leaves are red. Main season. Large frame, holds well in field and storage. Resistant FY, TB. Tolerant BR. Fresh Mkt, Processing.

**2289 Red Jewel F1** 67-75 days. Midseason producer of deep ruby red heads, well filled and full colored, with short core, 6" across, weighing about 3 lb. Fine shape, color, solidity and uniform maturity. Semi open frame, good wrapper protection. Erect plant type holds well above soil splash. Uniform maturity. Tolerant TB. Fresh Mkt, Fresh Cut Mkt.

**2309 Ruby King F1** 70 days. Bright purplish-red color. Solid, round 4 lb heads. Excellent wrapper leaves and upright habit well adapted to close spacing. Very high yield potential and good field holding ability. Exceptional heat and cold tolerance. Fresh Mkt, Shipping.

**Red Jewel F1**

**Super Red 115 F1**

**2314 Ruby Perfection F1** 80 days. Deepest red color. Very attractive deep red, oval, large 3-4 lb heads. Large-framed, vigorous, uniform plants. Excellent interiors.

**2358 Super Red 115 F1** 115 days. First true storage red cabbage that is Fusarium Yellow race one resistant. Medium sized round heads are nice red color with fancy wrapper leaves. Strong vigor with very good yields. Resistant FY 1, TT. Fresh Mkt, Storage.

### Savoy

**2319 Savoy Ace F1** 78 days. Fine quality main season savoy heads of good deep green color; uniform, rounded, averaging 3½ lbs. Excellent interiors; attractive, sold as cut halves in shrink wrap. Medium-sized plants. Adapted to all areas.

**2322 Deacon F1** 105 days. Attractive red headed savoy cabbage. Large solid 3-5 lbs. heads develop shiny red appearance which intensifies at mature stages and is strongest in cool autumn weather. High beta carotene for extra health kick. Glossy reddish leaves are veined lavender purple. Smooth, sweet taste. Excellent choice for mixed salad. Fresh Mkt, Shipping.

**2325 Melissa F1** 80 days. Productive main season. Solid bright green, crinkle leaved heads, 6-7". average 2½ lb. Rich sweet savoy flavor, excellent for slaw or mixed salad. Vigorous & cold tolerant, can be planted for late fall harvest. Fresh Mkt, Shipping.

## Chinese Cabbage

(*Brassica rapa, Pekinensis Group*) ★

Approx. 9,000 sd/oz. Packet plants 25' of row; ¼ oz sows 100'. Sow ¼" deep, 12-24" apart in rows 24-36" apart. Seeds germinate in about 10 days. For spring harvest, transplant seedlings with 5-7 true leaves raised at 73° F during the day and 53° F at night. Bolting may result from low temperatures of below 40° F for one week or below 50° F for two weeks. **Days to maturity are from transplant.**

### Michihili Type

#### Narrow Cylindrical Shape

**2713 Monument F1** 80 days. Strong, vigorous 18" plants produce long, uniform, dense, cylindrical heads with deeper green outer color, white interiors. Tolerant BSP

**2707 Green Rocket F1** 70 days. Early variety with bright green crispy leaves; very tall with heads weighing 4-4½ lb. Notably long shelf life. Recommended for fall to winter harvest. Fresh Mkt, Shipping.

### Napa Type Barrel Shape

**2688 Apollo F1** 65 days. Excellent heat tolerance and good cold tolerance. Well suited for spring sowing and early summer harvest in temperate regions. Bright green 5 lb heads, light yellow interior. Excellent field holding ability. Tolerant CR, BSR. Fresh Mkt.

**2693 & 2693U Blues F1** 57 days. Early with broad, squat heads. Multiple disease resistance and very slow to bolt. Recommended for spring to early summer crops. Mature heads average 4.5 lbs, fresh green leaves with wide white midribs. Tolerant AL, BS, DM, YT, BR.

**2695 China King F1** 55 days. Compact frame can be planted at close spacing to produce baby cabbages. Barrel shaped heads, green wrappers, crispy light creamy yellow interior. Early maturity and very slow bolting give good harvest flexibility. Very uniform in all traits. Tolerant TB. Fresh Mkt.

**2703 Emiko F1** 55 days. Highly consistent, productive Napa with tender, mild heads well protected by deep green wrapper leaves. Holds well in the field and resists bolting in summer conditions. Tolerates crowding very well. Can be spaced closely at 10-12" in the row for smaller 2-4 lb heads or at 18-20" for larger 6 lb heads.

**Green Rocket F1**

**China King F1**

**2718 Optiko F1** 60 days. Early, vigorous, barrel shaped Napa type heads 12" x 5". Extremely bolt tolerant. Mid green wrappers, white ribs. High yield potential due to extra disease package. Resistant Y. Tolerant TB.

### Pak Choi

#### Traditional Shape

**2728 Asian Delight** 25-40 days. AAS Winner 2018. Tested nationally and proven superbly resistant to bolting. In trial after trial, Asian Delight did not bolt even after the comparisons had gone to seed. This trait provides potential for very high yields and adaptability to seasons and regions in which Pak-Choi has been difficult. Medium small heads, 5-7" spreading 8-10", or 6-10 oz, with mild flavor, tender white ribs, and dark green semi-savoyed leaves. Fresh local mkt, shipping, gdn ctr plant sales.

**2740 Joi Choi F1** 55 days. Extremely well adapted to fall and winter planting. Highly adaptable for hydro-ponic. Very tender, shiny, dark green leaves with tender white stalks. Uniform plants are slow to bolt, high yielding and cold tolerant. Fresh Mkt.

**2745 Mei Qing Choi F1** 40 days. First hybrid Pak Choi with green petioles—produces highly marketable plants. Easy to grow, attractive heads are tender, excellent eating quality. Vigorous, early, uniform plants are upright, compact and slow to bolt. Well adapted to spring/fall sowings; tolerant to heat and cold. Fresh Mkt.

**2748U New Nabai F1** 45 days. Heat tolerant and slow bolting. Baby white with attractive 6" heads. Deep green outer leaves form nice protective arch over thick, pure white petioles. Fresh Mkt.

## Starlet Carrots

(*Daucus carota sativus*)

Approx. 23,000 sd/oz. Pkt plants 30 ft. of row; 1/2 oz sows 100 ft. Direct-sow 2-4 lbs/acre. Sow seeds 1/2" deep, 1-3" apart in rows 16-30" apart. Seeds germinate in about 8 days. **Days to maturity are from sowing.**

### Danvers Type

**2533U Danvers #126 Improved** 75 days. Heavier yield than Danvers. Smooth, orange-red roots have well colored cores, avg 6-8" (about 1" longer than Danvers). Heat-resistant tops. Fresh Mkt, Storage.

### Imperator Types

**2535 Deep Purple F1** 80-90 Days. Dark purple color to the core. Sweet flavor, well suited to juicing. 7-8" tapered roots. Tall strong healthy tops. Medium Resistant CS. Fresh mkt, Juicing, Specialty.

**2550 Neptune F1** 65 days. Blunt Imperator type with smooth exterior. 8-10" x 1.5". Mid orange with refined core. Nice sweet flavor, avg 5% Brix, with high carotene, avg about 140 ppm. Strong 16" dark green tops. Exceptionally high yield potential and excellent field-holding ability. Tolerant ALB. Bunching, Cello pack, Cut/Peel.

**2566 Rainbow F1** 70 days. A truly unique, single variety - not a blend of seed. Each color offers a distinctive flavor and all have high sugar content. Produces, long, 7-8" cylindrical roots of yellow, white, light orange, dark orange & coral. Strong 12-14" tops. A beautiful variety that makes great product displays. Popular with chefs and farmers' market shoppers. Fresh Mkt, Restaurant, Specialty.

**2588 Yellowstone** 90 days. Bright yellow eye appeal. 10 1/2 x 1 1/2" tapered roots, sweet and crispy. Extra interest for salad. Novelty color carrot market. Restaurant, Roadside.

### Baby Nantes Types

**2523 Adelaide F1** 65 days. Perfect for the baby carrot mkt. 3 1/2" x 3/4" cylindrical, short, smooth, blunt roots. Interior is bright orange and coreless. Tops are 6". Fresh "Baby" Mkt and Home Garden.

**2549U Little Finger** 50-68 days. OP Baby nantes type. Roots color quickly, can be pulled early at 3" x 1/2". Blunt cylindrical roots, smooth skin, very small core. Somewhat small tops. Must be harvested early for quality baby carrots. Baby Fresh Carrots, Canning, Pickling.

### Nantes Types

**2538 Envy F1** 66 days. Large, 12" x 1 3/4" cylindrical roots. Sweet, smooth, uniform bright orange roots taper very slowly to blunt ends. Fast vigorous growth, early maturity. Top variety for production of fresh jumbo carrots. Fresh Mkt, Garden.

**2540 Fuerte F1** 65-70 days. Mid-Early. High quality Nantes hybrid. Uniform shape and size, strong tops. Cylindrical mid-orange roots 6-9" with blunt tip and some shoulder, diam about 1 1/2" at tip to 2 1/2" at shoulder. Tops are vigorous, strong stemmed, 18-24". Proven capable of high yields in many areas. Fresh Mkt, Bunching, Shipping. Can also be good for juicing.

**2543 & 2543U Ingot F1** 70-75 days. 8" x 1 1/4". Sweet, full sugar flavor, high color, beta carotene, high yield potential, smooth roots. Strong mid green tops, 15-18". Fresh Mkt, Roadside, Bunching, Juicing. *Limited availability until next crop.*

**2568U Scarlet Nantes** 68 days. OP Popular variety for early market. Attractive, quality roots 6-7" with dependable, delicious flavor, sweet and tender. Fresh Mkt.

**Tall Utah Improved**

**Hadrian TZ 9077 F1**

## Celery

(*Apium graveolens dulce*)

Approximately 72,000 sd/oz. Pkt produces about 500 plants; 1 oz produces about 10,000 plants. Seeds germ in about 21 days. Set plants 6-12" apart in rows 18-40" apart. **Days to maturity are from transplant.**

**2665 Hadrian TZ 9077 F1** 90 days. Mid-early to main. Smooth, dark-green stalks, excellent eating quality with lots of crunch. Good stress resistance, with abundant foliage rising above stalk. Plant resists bolting, is compact and heavy with high yield potential. Overall height is 2 ft, producing 1 ft stalks at harvest. Resistant FW. *Pelleted seed.*

**2673 Starlet** 120 days. OP The first Tall Utah type to show excellent tolerance to Fusarium Wilt; slower to bolt than Tall Utah. Plants produce compact, full hearted stalks of high mkt quality with long, smooth, medium dark green ribs. Plants 25-27" tall with few basal buds. Tolerant Fusarium 1-2. Fresh Mkt.

**2678U Tall Utah Improved** 120 days. OP. Well-known and in demand for high quality harvest, superior pack. Thick, smooth long petioles are produced on tall vigorous, sturdy plants, 10-11" to the first joint. Resistant to brown check; Tolerance to certain strains of Western Celery Mosaic.

## Cauliflower

(*Brassica oleracea*, *Botrytis* Group)

Approx. 7,000 sd/oz.; Seeds germinate in about 10 days. Set plants 14-24" apart in rows 24-36" apart. **Days to maturity are from transplant.**

**2608 Amazing** 75 days. OP Truly amazing quality and earliness. Large vigorous plant produces thick leaf jacket. Deep-domed, bright white heads 7" to 8" are heavy and firm. Hearty flavor and crisp texture. Adapted for early and late markets. Fresh Mkt, Ship-ping.

**2610 Baby F1** 45-55 days. Novelty item for container plant production. Can be sold year round in 4" pot with visible curd for fresh harvest at home in 1 - 2 weeks. Head will be about 3" diam. Needs 12 hour light to induce bud set. Gdn Ctr Container Sales, Novelty, Patio.

**2613 Candid Charm F1** 65 days. Best in cool areas for summer harvest. Large, deep dome-shaped curds 7-9" are pure-white and uniform in maturity. Very heavy yields. Excellent quality, non-ricey, long holding ability without purple cast. Vigorous, semi-upright plants have large, dark green leaves which cover heads well. Fresh Mkt, Processing.

**2623 Cheddar F1** 68 days. Unique orange heads are uniform, smooth and well domed. Weight and firmness is similar to white varieties, but it has about 25 times more beta carotene. Easy to grow when spring planted in areas of moderate temperatures. Leave head untied for maximum orange color. In warmer regions, plant later to assure head development for fall harvest. Excellent flavor cooked or raw (color deepens when cooked). Specialty, Fresh Mkt, Salad Mix.

**2627 Fioretto** 60 days. Heat tolerant. Special type produces long, slender florets in great abundance. Bright green stems grow to near uniform 5" length, bearing a bouquet of snow white caps at end of stem. Sweet flavor both cooked and raw for salad or dipping. Can be sold in bunches or cello cartons. Extended harvest is possible from successive sowings, due to heat tolerance.

**Fioretto**

**2630 Fujiyama** 65-75 days. Performed well in trials over several years in East Coast locations. Large, flat-round heads with good curd cover. Clean white color that tends to stay white a long time. Very firm texture, holds well in field. Vigorous plants.

**2638 Graffiti F1** 60 days warm, 112 days cool. Deep purple curd well protected by deep bronzy green wrappers. Large frame with dome shaped heads. Color reaches max intensity in full sun at full maturity when heads are about 2 lb. Color is best at table when raw or steamed; if boiling, 1 tsp lemon juice can be added to water to help retain color. Fresh Mkt, salad mixes, restaurant.

**2635 Multi-Head White F1** 50-60 days. Dual use. Produces a central head and 3-7 smaller side heads which can keep bearing for 3-6 weeks. Central head about 6", subtended by 2-3 mid size 3" curds and 3-5 small 2" curds. Compact waxy foliage slows dehydration. Good tolerance of fungal disease. Dual uses; main head and side shoot florets.

**2653 Snow Crown F1** 68 days. Earlier, more uniform Snowball type. The high quality, well-rounded, pure-white heads measure up to 8" across, have good depth and stay tight several days after harvest. Vigorous plants with potential for big yields. Fine raw or cooked.

**2654 Steady F1** 65 days. Widely adapted across trials in a broad range of climate areas. Large high quality 7" domed heads with clean billowing white fine textured curd. Vigorous plant provides ample wrapper leaves for curd protection. Maturity is uniformly early. Fresh Mkt, Shipping, Gdn Ctr Plant Sales.

**Vates**

## Collards

(*Brassica oleracea*, *Acephala* Group)

Approx. 9,000 seeds/oz. Pkt plants 25 ft. of row; ¼ oz sows 100 ft. Direct-sow 2-4 lbs/acre. Sow seeds thinly, ¼" deep 12-24" apart in rows 24-36" apart. Seeds germinate in about 10 days. **Days to maturity are from sowing.**

**2777 Flash F1** 75 days. Smooth, flat, broad, deep green, early Vates type. Upright 18" plants are slow to bolt. Fast re-growth and good uniformity. Fresh Mkt, Processing.

**2782 Georgia Southern** 80 days. Well adapted to all areas; performs well under adverse conditions or poor soil. Plants reach about 3' in height. Upright, large, blue-green leaves on non-heading plants. Fresh Mkt, Roadside, Processing, Gdn.

**2789 Hi-Crop F1** Uniform, deep green, semi-savoyed tender leaves. Versatile and vigorous hybrid, tolerates both heat and cold. Excellent producer of medium size plants in both long, hot and short, cool season areas. Plants can be harvested at one time. Fresh Mkt, Processing.

**Morris Heading**

**2792 Morris Heading** 65 days. Popular in traditional southern markets. Leaves grow straight up in young stages and are picked for early greens. After leaf harvest, plant can be left in field to form a head which can be harvested and used like cabbage. *Treated seed.*

**2798 Top Bunch 2.0 F1** 70 days. High quality hybrid produces attractive, uniform, blue-green leaves, slightly wavy, with close internode spacing. Early bearing and quick regrow after harvest. Vigorous plants have high yield potential. Upright habit for clean harvest. Improved successor to original Top-Bunch. Fresh mkt, Bunching, Machine Harvest, Processing.

**2799 Top Chop F1** 74 days. Upright leaves are very large and broad, deep green and flat, with strong potential for bountiful harvest. Very high bolt tolerance; the slowest to bolt so works well in overwinter production as well as summer-fall. Very uniform growth promotes consistency in timing and yield.

**2802 Vates** 75 days. The standard, most well known variety. Compact plants with thick, broad leaves grow 1½ - 2'. Fresh Mkt, Processing.

# Sweet Corn... A Taste of Summer Sunshine

## Avalon F1

### Selecting Sweet Corn Varieties

Sweet Corn breeders have been working with many new genetic combinations affecting the sugars in sweet corn varieties, which in turn affects classification of varieties. So far, there has not been complete agreement about classifying various types. Twilley's research department continually looks at different varieties and how they perform. The following information will help clarify types listed by Twilley, so you can choose which variety is best for your sweet corn production. None of our sweet corn varieties are GMO.

**Sh2 corn avg 3,500 sd/lb**

**Other sweet corn avg 2,500-3,000 sd/lb**

**Soil temperature** – If sown too early in the season, corn will not grow well. Wait until soil is over 55°F. Only treated seeds of cold-germinating varieties should be planted before that time.

**Isolation** – Many types of sweet corn must be isolated from other corn to limit pollen crossover. This can be achieved by using varieties with different maturity timing, sowing at different times, or separating by physical location.

**Planting** – Full sun is necessary. Sow seeds 1" deep and space 6-7" apart. Rows should be approximately 32" apart. Untreated seed should be planted more densely. To ensure proper pollination, think "four": plant in blocks of at least four rows, each at least four feet long.

**Pests/Diseases** – Conditions vary depending on location. For the best information regarding each region, we advise you to consult your local extension service.

**Harvest** – Corn is ready to eat when the silk turns dry and dark brown and kernels are milky.

Genotype	General Information
Normal Sugary Gene Type (su)	The standard sweet corn for many years. This type has creamy corn flavor and mild sugars. They are best used very soon after picking, as conversion of sugar to starch is rapid.
Homozygous Sugary Enhancer Gene Type (se)	100% of kernels are sugary enhanced. Each kernel has higher sugar content than Normal Sugary Gene types but also has comparable levels of starch. This makes the corn both sweet and creamy with a tender pericarp. The higher sugar levels result in hybrids that maintain their quality over a longer period of time. Homozygous denotes that both parents are se. <b>Isolation required.</b>
Homozygous Shrunken 2 Gene Type (sh2)	Also known as Supersweets, 100% of these kernels contain 2 to 3 times the sugars of Normal Sugary Gene types. The high sugar content gives sh2 seed a shriveled appearance; the seed is lighter and has a higher count per pound. Sh2 has a slower conversion of sugar to starch, allowing longer storage and/or long distance shipping. Supersweets are sensitive to soil temperature. Soil should be consistently warmer than 55° at sowing. Examples of this group include SummerSweet®, X-tra Sweet® and X-tra Tender®. <b>Isolation required.</b>
Synergistic Types	Also known as Heterozygous Shrunken 2 Gene Type (sh2 + se), this class contains 75% se kernels and 25% sh2 kernels on each ear. These are not recommended for long distance shipping or processing. These can be found under the Synergistic headings by color. <b>Isolation required.</b>
Augmented Shrunken	These are a new generation of shrunken types. Like regular shrunkens, they contain the sh2 gene but have extra juiciness and sugar from incorporating se and su genes as well. Soil temperatures must be at least 60°. <b>Isolation required.</b>
SuperSeedWare®   	Breakthrough improvement of sh2 type; non-GMO. Plump, smooth, high-vigor kernels in a Super Sweet Corn. Can be sown earlier and grown more easily, like old-fashioned corns. <b>Isolation required.</b>
 or 	Thicker foliage that stays deep green all the way to harvest. Extra ear protection from broad, healthy flag leaf, stronger photosynthesis, extra market appeal.
	Bright glossy pericarp that gives eye catching kernel color at market and on the table.

# SuperSeedWare®

**Multisweet®  
SSW2742 F1**

SSW® is a new and exciting breakthrough in super-sweet corn genetics. Developed and patented by Abbott & Cobb, SSW®'s are 100% natural. They have notably enhanced performance even with early plantings in colder or wetter soil. Growers can expect strong stalk and root systems, early maturity, better disease tolerance and high yields. SSW®'s also have dramatically improved seed storage and shelf life.

Patent No.'s: 8,796,504 and 8,822,756 and 6,184,438.

**Packout F1**

**SSW® Bicolor  
Early Riser F1**

**HiGlow®  
SS3880MR F1**

**HiGlowMS®  
SS3778R F1**

## Moisture Level and Soil Temperature

Tests have shown best emergence with normal or slightly above normal moisture. Be sure to provide adequate moisture, but avoid over watering. Sweet corn tends not to germinate below 45° Fahrenheit; however, SSW® shows improved vigor and uniformity at lower temperatures as compared to ordinary sh<sup>2</sup> varieties.

## Fuller, More Durable Seeds!

## Seed Density and Appearance

SSW®'s are denser than sh<sup>2</sup> seeds, and do not show defined dents, wrinkles, or dimples. They are heavier, sturdier, with smoother coats, and are easier to handle than conventional sh<sup>2</sup> corns.

## Proper Handling and Storage

SSW® seed is denser and less susceptible to physical damage than conventional sh<sup>2</sup>s. However, in order to ensure best results, avoid rough handling and excessive agitation prior to planting. As with all seed, store any unused seed in sealed containers in a cool, dry storage area to ensure maximum shelf life and viability.

## Uniform Growth!

## Isolation

For best possible appearance, maximum eating quality, and longest shelf life for 100% of the kernels, SSW®'s should be isolated from cross pollination by other corn types. The usual practices, using maturity, sowing dates or physical isolation, would apply.

## Stronger Root Systems!

## Stronger Stalks!

## More Corn Flavor!

## Plant Populations

SSW®'s have very high germ rates and will likely establish a population close to the sown quantity. It is important NOT to sow seed too close together, as this may result in crowded stands, smaller or misshapen ears, and lower yield.

Sweet corn varieties with the Stays Rich Green, or SRG®, characteristics have extra dark green plants and husks, as well as thicker leaves that stay dark green even beyond full ear maturity and enhanced emergence and vigor. SRG®'s harvested ears maintain a rich green appearance and hold better for fresh market and retail displays, making them much more appealing to consumers.

**HiGLOW®**

HiGlow® and MultiGlow® sweet corns have really intense and distinct color that gives the variety a very "fresh picked" look. They also have a longer harvest window -- holding color, kernel appearance and sweetness both on and off the plant for a greater length of time. MultiGlow® corns have a combination of MultiSweet® eating quality and HiGlow® kernel color.

## Ornamental Corn & Sorghum

Sow in mid to late May for a mid September harvest. Grow at the same soil temperature and sowing depths/density as sweet corn. Ornamental corn should be harvested by hand when the husks dry, often after one or two frosts. Leave the ears in the husk and complete the drying process in a sheltered environment.

Ornamental corn will freely cross-pollinate with other corn, so keep it separate from sweet corn crops.

Farm markets make ideal outlets for cheerful, festive bundles.

**1184U Bloody Butcher** 100 days. Large deep red ears 8-12" x 2" for fall decoration. Giant 9-12' stalks bear 1-2 ears each well above ground. Prized heirloom variety. Dried Ornamental for Cornucopia, Roadside.

**1224U Broom Corn/Sorghum Colors Medley** Highly ornamental types for autumn cornucopias, can sell with pumpkins, gourds, Indian corns. Contains ornamental Broom Corns and Colored Upright Sorghums.

**1189 Carousel F1** 100 days. Miniature type produces tiny, colorful ears excellent for local florists and dried flower wholesalers. Festive multicolored kernels fill 4-5" ears; average 2 or 3 ears per plant. Cross market with pumpkins, gourds.

**1194U Earth Tones Dent** 85 days. Delectable reselection from an heirloom, dent flour corn. 8-10" ears display muted glowing tones of soft browns, pinks, mauves, greens, blues and golds. Great colors for fall sales. Great for decoration or feed for birds. Roadside, Cornucopia.

**Earth Tones Dent**

**1199 Fiesta F1** 102 days. Colorful husks and ears. Long, 7-10" ears contain kernels in a wide range of colors, including red, purple, yellow and white. Extremely decorative husks are 50-70% purple. Plants to 7'.

**1209U Mini Blue** 100 days. Kernels are medium to deep blue. Small, narrow cobs average 2-4" with two ears per stalk. Can be used for dried arrangements, fall decorations or popped for eating.

**1229 Strawberry Corn** 110 days. Small ears with tiny, dark strawberry-red kernels are dual purpose, for popping and ornamental. 2-3" x 1.5" ears, lovely with husks attached and bunched for fall decoration. Plants avg 6'.

**1239 Wilda's Pride** 110 days. Extremely wide and bright color range. Sturdy plants. Large ears 8-11" in a sparkling array of maroons, deep purplish and blackish reds, pinks, whites, yellows and many multicolors. Fall cornucopia sales with pumpkins.

**Ornamental Millet listed on page 102**

## Cucumber (Cucumis sativus)

Approx. 1,100 seeds/oz. ¼ oz sows 100' of row. Direct-sow 2-3 lbs/acre. Sow seeds 1-2" deep, 8-12" apart in rows 36-72" apart. Seeds germ in about 7 days. **Days to maturity are from sowing.**

### Slicing

**2826 Bristol F1** 54 days. Top quality new slicer with high yield potential and great disease package. Showed strong multi-virus resistance and intermediate fungal resistance in trials. Mid-vigorous vines. Cylindrical 8.25" x 1.25" fruits with quality flesh and rich green skin. High packout of fancy grade fruit in trials. Excellent combination of marketability and production traits. Gynoecious normal type flowering. Resistant A 1, ALS, CMV, S, ZYMV. Tolerant PRSV, DM, PM.

**2832 Dasher II F1** 58 days. Premium gyn with high yield potential. Vigorous plants, straight, uniform, dark-green 8.5" x 2.5" fruit. Strong disease package. Tolerant A, ALS, CMV, PM, S. Fresh Mkt, Garden, Commercial.

**2862 General Lee F1** 66 days. Market leader. A white-spined slicer. 8" fruits are straight and attractive uniform dark green. Vines are large and vigorous with dark green foliage. Widely adapted for spring and fall seasons. Resistant S, DM, PM. Tolerant CMV. Fresh Mkt, Garden.

**2871 Green Light F1** 40 days from sowing. 2020 AAS Gold Medal Winner. Beautiful and highly productive minislicer. Flavorful, mild sweet, crisp & seedless. Smooth, spineless, tender skin that needed no peeling. Harvest at 4". Wonderful eaten whole as a snack or sliced. Trial notes indicate yield of 3-4 fruit daily over long season. Season yields were reported as 40 or more fruit per plant. No bitterness found in our trial. Trellised nicely. Plant about 20" apart on trellis. Vigorous vines can reach to 80" on ground. Fresh Mkt.

**2872U Iznik F1** 45 days as ghs cuke. 50-60 days in field. A real work-horse among parthenocarpic "seedless" fancy-pack cukes. In 2018 trials, Iznik fruited earliest and out yielded others in its class by a wide margin, and was still yielding long after others in trial succumbed to wet weather diseases. Great flavor was noted throughout season - crisp, cool, with no hint of bitterness or aftertaste. Fresh green cukes, shiny and smooth, reach about 4" length and stay slender and tender, with only teeny ovules and a very nice baby slicer shape. Yields avg 5 fruit per leaf axil, allowing potential for high exception yield by fruit count. Multi-use, adaptable to field, greenhouse and container culture.

**2887U Marketmore 76** 66 days. OP Well-known variety for planting both in North and South. Tolerant CMV, DM, PM, S. Commercial production.

**2890 Salad Bush F1** 57 days. Early slicer with compact bushy habit. Glossy dark green fruit are uniform, cylindrical with slight taper, 8" x 2¼". Adaptable to compact spacing. Resistant CMV, S. Container, Fresh Mkt.

**2893U Saladmore Bush F1** 55 days. Semi-bush habit spreading about 2' across. Deep green slicers 7-8" x 2", slightly tapered cylindrical, with crisp sweet flesh. Strong disease package, high potential yield, with good durability and capable of extended harvest if kept picked. Can also be used in basket for garden center sales. Tolerant A, CMV, PM, S. Fresh Mkt, Bedding Plant Sales. Southeast.

## More Slicing Cucumbers

**2895U** Slice More F1 62 days. Mid-early. Smooth, deep green, 8.5", with desirable L/D ratio. Has demonstrated excellent yield potential in commercial plantings. Predominantly female flowering; contains a pollinator. A proven, consistent performer. Resistant S. Tolerant A 1,3, CMV, DM, PM. Fresh Mkt, Regional Shipping, Garden.

**2905 & 2905U** SV 4719 CS F1 56 days. High % super selects.

PROFESSIONAL SEEDS SERIES

Top commercial productivity. Large refined, blocky slicer with superb disease package. Vigorous vine with potential for high yields of 8" x 2.25" fruit. Dark green, smooth, glossy spineless exterior and great eye appeal. Very small seed cavity. Gynocious flowering. Can be grown open field or trellised. Resistant A, ALS, DM, PM, S, ZYMV. Fresh Mkt, Shipping.

**2912 Sweet Success F1** 55 days. Greenhouse-type parthenocarpic cucumber also performs well in the garden (sets fruit without pollination). Medium green, smooth, high-quality fruits grow 12-14". Grow on stakes or trellis. Sweet, crisp flesh, tender skin. Tolerant CMV, S. Fresh Mkt, Greenhouse, Garden.

PROFESSIONAL SEEDS SERIES

**2918U** Swing F1 62 days. American Slicer in fruit shape & color, but parthenocarpic -- able to produce "seedless" fruits when isolated from pollen. Robust plants. Deep green, slightly glossy skin, smooth cylindrical shape, 8-9" x 2-2.5" diam. Bitter free fruit with small core of soft ovules and broad zone of crispy light flesh. Resistant PM, S. Fresh Mkt, Field or Greenhouse Crop.

**2925 Taurus F1** 55-60 days. Japanese burpless-type that produces very uniform, glossy deep green fruit. 8-8.5" x 1". Monoecious flowering habit, with a medium number of female flowers. Suitable for both greenhouse and open field production, best sown March - July. Great bitter-free taste. Tolerant DM, PM. Fresh Mkt, Shipping.

## Burpless

*Handsome slicing types with reduced bitterness in their genetic makeup, these fruits have more tender skins which are believed easier to digest than regular cucumbers. Very popular with Fresh Mkt.*

**2837 Diva F1** 58 days. Seedless parthenocarpic cucumber. Sets abundantly without pollination and stays seedless if not interplanted with other cukes. Fruit is smooth and spineless, glossy bright green, slender and cylindrical with slightly tapered ends. Non-bitter trait is unattractive to cucumber beetles so this pest is less likely to carry CMV onto the crop. Can also be sold as mini cukes if picked at 4". Resistant S, Tolerant DM, PM. Fresh Mkt, Shipping, Roadside, Gdn.

PROFESSIONAL SEEDS SERIES

**Taurus F1**

**Calypso F1**

**Swing F1**

**2902 Summer Dance F1** Extra fine quality, uniform fruit

with glossy deep green exterior. Interior is classic Japanese Burpless type with very small seeds and small narrow core. Vigorous vines with multiple lateral breaks, combined with strong mildew resistance and tolerance for heat, provide potential for high yield. Resistant DM, PM. Tolerant TLS. Fresh Mkt, Fancy Pack, Wrapped.

**2922 & 2922U Tasty Green F1** 52 days. Burpless type produces long, slender, smooth-skinned fruits. Early, heavy yields; long harvest. Best at 9" x 1" but holds at larger sizes. Tolerates high temperature and humidity. Resistant PM, Tolerant DM. Fresh Mkt, Garden.

## Pickling

**2827U** Calypso F1 56 days. Uniform, dark-green, blocky fruits have a length-to-depth ratio of 3:1; white spined. Introduced by NC Agricultural Experiment Station. Tolerant A, ALS, CMV, DM, PM. Fresh Mkt, Processing.

**2828U** Carolina F1 55 days. Deep green refined 3" pickler for commercial pickles or fancy baby slicers. Mid long vines are easy for hand picking. White spines. Excellent 6-way disease package for high potential yield. Resistant PM, DM, ALS, CMV, A. Tolerant S.

## Parthenocarpic, or "Seedless" Varieties:

These varieties are able to produce fruit without pollination. When grown in isolation from other varieties, the ovules do not develop into seed, but remain soft and light colored, enabling the production of fruit with "seedless" flesh. Since seed are not set, fruit quality can last longer on plant and in storage, and the flesh can resist developing bitterness associated with mature seed.

**Citadel F1**

**Vlasstar F1**

**Diamant F1**

## More Pickling

**2830 Citadel F1** 52 days. Classic mid size gynoecious pickler. bears loads of blunt deep green fruit. Mid size vines with semi-distributed fruit setting pattern that lends itself well to hand picking. Fruit at maturity are 3.6" X 1.2", a classic 3-1 L/D ratio. Strong disease package allows for high yield potential with less frequent spraying. Pollinator included. Medium Resistant DM, PM, Resistant A 1, ALS, CMV, S. Fresh mkt, Processing.

**2835 Diamant F1** 45 days. Seedless (*Parthenocarpic*) bitterfree pickler. Sets abundantly without pollination and stays seedless when not interplanted with other cukes. Fruit develops with 3:1:1 ratio of length to diameter, straight, cylindrical, dark green, with rounded ends. Crispy sweet and tender. Nonbitter trait is unattractive to Cucumber Beetles so this pest is less likely to carry CMV onto the crop. Compact vine with strong, lateral shoots. Can also be sold as gourmet mini cukes if picked at 3-4". Resistant DM, PM. Pickling, Fancy Pack, Fresh Mkt.

**2863 Gherking F1** 50-55 days. European gherkin type pickler. Very high quality eating both fresh or pickled. Parthenocarpic, bitterfree, 3-5", 1-1.25". Tender-skinned crispy fruit can be grown "seedless" for extra fine table quality. Strong disease package and vigorous vines covering 4-6 ft enable high yield potential. Well adapted to tunnel, trellis or open ground. Nationally promoted through consumer channels. Resistant CMV, S. Tolerant DM, PM. Fresh Mkt, Garden Ctr Sales, Pickling, Restaurant. *Southeast, Mountain/Southwest.*

**2891U Pick A Bushel F1** 50 days. Semi-bush plant spreading about 2 ft across, bears high yields of crisp sweet medium green picklers. Excellent durability through hot weather. Can be picked at gherkin stage for baby cukes or at spear stage for processing. Can be planted with close spacing for high yield per acre or grown in basket for garden sales. Tolerant CGMMV, CMV, S. Fresh Mkt, Processing, Bedding Plant Sales. *Heartland, Great Lakes.*

**Martini F1**

**2935 Vlasstar F1** 52 days. Vigorous plant with blocky medium dark green fruit and white spine. Perfect for hand picking as plants continuously set new fruit. Excellent processing quality. Fruit length/diameter (L/D) ratio 3:1. Plant type indeterminate, medium. Adaptable for sustained multiple harvest production programs. Potentially high yields. Tolerant A, ALS, CMV, PM, S. Fresh Mkt, Processing.

## Specialty

**2881U Lemon** 60-70 days. OP Heirloom variety with a unique lemon color and shape. Great flavor and crunchy texture with non-bitter skin. High yield potential of 2-3" fruit, a perfect size for a single serving. Great for pickling and slicing. Rust and drought resistant. Novelty sure to sell at fresh markets.

**2888 Martini F1** 55-60 days. Bright white interior is bitterfree, non-yellowing small seeded, very sweet and crunchy. Extra tender, no-peel skin is a pale chiffon green color, providing unique table quality. Fruit are straight cylindrical. Harvest fruit at 5-6" long with 1.5-2" diam for gourmet quality. Vigorous vines with 4-6 ft spread keep bearing throughout growing season and provide good sun protection for unblemished fruit. Nationally promoted through consumer channels. Resistant PM. Fresh Mkt, Garden Ctr Sales, Restaurant.

## Eggplant

(*Solanum melongena esculentum*)

About 6,500 sd/oz. Hybrid pkts 100 seeds; OP packets produce about 75 plants; 4 oz produces about 10,000 plants. Seeds germ in about 10 days. Set plants 18-30" apart in rows 24-48" apart. **Days to maturity are from transplant.**

**2949 Black Beauty** 72-85 days. OP Heirloom. Popular standard. Large, black oval fruit, 6.5" x 5", can be picked at sizes from 1-3 lb. Bushy 2' plant spreading to 30". Good yield in northern areas provided long frost-free season. Fresh Mkt.

**2955U Black Shine F1** 70-75 days. Beautiful obovate bell shape, 7-8" x 4" at base, narrowing slightly to about 3" at stem end.

**2975 Fond May F1** 77 days. Rich glossy purple fruit and calyx with tender white flesh. Ten-inch cylindrical fruit averages 6 oz. This is the popular long, thin oriental type. Tolerance to bacterial wilt makes it suitable for southern production. Fresh Mkt, Gdn, Roadside.

**2977 Gaudi F1** 75 days. Shiny deep black fruit keeps beautiful color until the end of harvest season. Bright green calyx is usually spineless, with a few spines under stress conditions. Firm fleshed, 7-8" long obovate fruit are bell shaped, slightly broader at 4" base, narrowing smoothly to about 3" at stem end. Trials indicate great potential for high yield of top grade fruits. Excellent hot set capability. Widely adaptable, works well in greenhouse production or in open field. Fresh Mkt, Shipping, Garden Ctr Sales.

**2997U Millionaire F1** 63 days. Very early, high quality Oriental type produces very attractive, long narrow fruits with purple calyx. Fruit color glossy black. Upright plant 25-30". Fresh Mkt.

**3002 Money Maker No. 2 F1** 60 days. Very early, high yielding Japanese type fruits averaging 8 oz. Semi-upright plants produce glossy black, long oval fruits with purple calyx. Excellent fruit taste, very tender and juicy. Ideal for ghs and outdoor production. Fresh Mkt, Home Gdn.

**3003 Night Shadow F1** 68 days. Classic oval bell shape 7" x 4". Vigorous strong 3' plants with potential for high yield. Firm glossy black fruits maintain rich color through harvest season. Best replacement for Black Bell and Black Bell II. Fresh Mkt, Shipping.

**3004 Rhapsody F1** 80 days. Parthenocarpic eggplant, the first we've seen in commerce. Able to produce fruit without pollination, and when grown in isolation from other eggplant varieties, the ovules do not develop into seed, but remain soft and light colored, enabling the production of eggplant with "seedless" flesh. This variety should be tested for introduction of extra-high quality fruit. Since seed are not set, fruit quality should tend to last longer on plant and in storage, and the flesh would resist developing the bitterness associated with maturing seed. Fruit are oblong, avg, 8" x 4", with deep black-purple skin and green calyx. Flesh is firm, sweet and capable of very high quality. Fresh Mkt, Restaurant, Shipping.

### Specialty Eggplant

**3005U Rosa Bianca** 75-85 days. Gorgeous Italian heirloom. Produces medium-sized 5-8", roundish-shaped fruits. Unique, striped coloring of stunning, light pinkish-violet with occasional creamy white shading. Prized by gourmet chefs for its incredible delicate, non-bitter flavors. Plants are 30" tall.

**3015U White Star F1** 55 days. Classic, tapered teardrop shape. Creamy white, 5-7" fruits are smooth when mature with 2" at top and 3.5-4" at bottom. Plant provides good coverage at 30-36". High yield potential.

**Mustard Braising  
Greens Mix**

## Greens Mixed Greens

**3017U Gourmet Salad Blend** A mixture of 5 fine-flavored leaf lettuces custom blended, tested and recommended by market growers and chefs in the California production region. Contains 20% each of Red Romaine Silvia, Lolla Rossa Darkness, Red Oakleaf, Buttercrunch, Green Salad Bowl, Fresh Mkt, Restaurant Specialty, Bedding Plant, Bowl Planters for Gdn Ctr Sales.

**3019U Mesclun Mix** A mix of classic salad herbs and lettuces, custom blended to achieve the classic flavor of the French original, and for ease of growing together from seed. Contains 17% each of; Lettucines Buttercrunch, Lolla Rosa Darkness, Romaine Vivian, Arugula, Basil Spicy Globe, Cress Wrinkled Crinkled. Fresh Mkt, Restaurant Specialty, Bedding Plant, Bowl Planters for Gdn Ctr Sales.

**3020U Mustard Braising Greens Mix** Specialty mix of Mustards and Arugula. Custom blended to provide a range of colors, textures and flavors in this trendy category. Good material for multiple "cut & come again" harvest. Contains 17% each of Mustards; Green Wave, Red Giant, Mizuna, Mizuna Red Streak, Mibuna, plus Arugula. Fresh Mkt, Mixed Salad Cello, Restaurant Specialty, Edible Color Bowl Sales.

**3023 SimplySalad® Alfresco Mix** [Multi Species Multi Seed Pellet] 12"; Convenient & easy to grow. Each 'Simply Salad'® pellet contains mixed greens. Includes various lettuces, arugula, endive, & radicchio. Sow one plug or direct to 8" container.

**3024 SimplySalad® Summer Picnic** (formerly *Endless Summer*) [Multi Species Multi Seed Pellet] 12" spreading 12"; Each pellet contains seed of both red and green lettuce, all heat tolerant varieties for extended harvest in container garden. Each pellet should produce 3 or more seedlings, enough to fill an 8" planter by sowing just one pellet. For ornamental edible container gardens.

**Mesclun Mix**

## Specialty Greens

**5213 Arugula Astro** (*Eruca vesicaria sativa*) Approx. 13,000 seed sds/oz. 31 days clipping, 52 days bunching. Mid green leaves only slightly lobed lend a fresher, younger leaf look. Vigorous. Zesty, nutty flavor. Clip at 6", bunch 12".

**5214U Arugula [Rocket] Slow Bolt** Approx. 17,000 sds/oz. Holds in field 10 extra days; outyields other Rockets.

**2812U Corn Salad [Mache]** (*Valerianella locusta*) Approx. 11,000 seeds/oz. European favorite. Harvest leaves up to 3" for spring salads. Sow every 2 weeks; tolerates warm conditions. Ht. 1-1.5'.

**1277U Pea Parsley** 24 days to side shoot clipping. 60 days to pea pod harvest. Produces bunches of small delicious leaves with sweet pea flavor on tender branching tendrils which are clipped and used in the specialty greens markets. Sweetest when clipped young. Both clipping and pea harvest can be had by waiting for mature pods and harvesting both. The leafy tendrils will continue to be produced. Vines stand 24-32". Also featured on pg 46.

**4344 Tatsoi Oriental Green** (*Brassica rapa narinosa*) 45 days full size. Rosette 1" spreading to 12". Deep emerald green. Glossy spoon shaped leaves, tender flavor for salad mixtures. Grows like Chinese Cabbage.

## Annual Herbs

Arugula listed on page 31

**\*All Herbs are untreated unless otherwise stated.**

**5205 Anise** (*Pimpinella anisum*) About 11,000 sd/oz. Leaves and seeds have flavor of licorice. Flavor cakes, cordials and sausage. Ht. 2'.

1/32 oz	1 oz	1/4 lb	1/2 lb	1 lb
1.90	2.15	6.95	11.60	20.35

**5238 Basil British** 60-90 days. A Basil with tolerance to cool, damp growing conditions. Selected for field production in a British climate, this variety is worth testing for fall and spring performance in the U.S., to extend the season for both fresh cut and container basil. Will not stand freezing conditions.

100 sd	500 sd	1000 sd	5 M	10 M
2.15	5.00	4.85	2.85/M	2.10/M

**5241 Basil Cinnamon** About 23,000 sd/oz. Scented Basil.

1/32 oz	1/8 oz	1/4 oz	1 oz
1.60	2.35	3.55	12.00

**5245 Basil Crimson King** 80 days. 12" pot, up to 20" in gdn; 100% purple foliage. Attractive Genovese-shaped leaves. Ornamental edible with spicy clove aroma.

100 sd	500 sd	1000 sd	5 M	10 M
2.15	3.55	5.70	4.80/M	4.20/M

**5246 Basil Dolce Fresca** 60 days from sowing to harvest. 12" tall in pot, 14" tall in gdn. Short internodes keep plants bushy and manageable. Regrows neatly after cutting. Traditional sweet basil flavor.

100 sd	500 sd	1000 sd	5 M	10 M
1.55	2.35	3.35	1.45/M	1.20/M

**5250 Basil Genovese** About 16,000 sd/oz. Bright green, savoyed leaves. Uniform, tall, 24" plants are slow to bolt. Heavy, spicy taste and smell. Use in pesto sauce.

1/32 oz	1/4 oz	1 oz	1/4 lb	1 lb
1.60	1.95	2.50	7.15	25.00

**5277 Basil Lemon** About 16,000 sd/oz. Scented Basil.

1/32 oz	1/8 oz	1/4 oz	1 oz
1.60	2.35	3.55	12.00

**5286 Basil Lemon Sweet Dani** About 14,000 sd/oz. Leaves burst with lemon fragrance when lightly touched. Bushy 26" plant. Useful as a bedding plant in 8-10 weeks from seed. Excellent culinary variety.

100sd	500sd	1000sd	5M
1.55	4.35	7.50	5.25/M

**Basil Newton**

**5295 Basil Licorice** About 23,149 sd/oz. Scented Basil.

1/32 oz	1/8 oz	1/4 oz	1 oz
1.60	2.15	2.75	5.00

**5300 Basil Newton 21"** pot spreading 10", 30" gdn spreading 16"; Bright green crinkled leaves. Fast growing, just 7-10 weeks to 1st harvest. High resistance to fusarium. Clean Genovese flavor, no licorice aftertaste. For Fresh Mkt, Container, Field.

100 sd	500 sd	1000 sd	5 M	10 M
1.65	2.20	3.15	2.30/M	1.70/M

**5313 Basil Purple Ruffles** About 20,000 sd/oz. Shiny, dark purple, ruffled leaves. Purple flowers. Provides fine flavoring for culinary use. Ht. 18-24".

100 sd	500 sd	1000 sd	5 M	10 M
1.55	4.35	7.50	5.25/M	3.95/M

**5316 Basil Red Rubin** About 19,000 sd/oz. 12", Strong purple bronze foliage, intense fragrance and fine flavor. Suitable for professional production.

1/32 oz	1/8 oz	1/4 oz	1 oz	1/4 lb
2.15	4.30	5.25	14.00	55.00

**5318 Basil Rutger's Obsession DMR** Vigorous growth, high leaf-to-stem ratio, deep green, excellent disease resistance to both Downy Mildew and Fusarium Wilt, for long, prolific, clean harvest. Performs well in field and potted plant production. Fresh mkt/drying. Resistant DM, FW. Fresh Mkt, Drying.

1/32 oz	1/8 oz	1/4 oz	1 oz
1.95	2.95	4.45	15.00

**5320 Basil Rutger's Passion DMR** Vigorous growth, high leaf-to-stem ratio, deep green, the strongest resistance Downy Mildew in Rutger's program, for long, prolific, clean harvest. Long 3" fancy leaves. Has shown excellent regrowth allowing many harvests. Performs well in field and potted plant production. Fresh mkt/drying. Resistant DM. Fresh Mkt, Drying.

1/32 oz	1/8 oz	1/4 oz	1 oz
1.95	3.35	5.15	16.85

**5322 Basil Siam Queen** About 20,000 sd/oz. Outstanding anise flavor and fragrance. Beautiful, lush, bright green leaves 3-4" long and 1.5-2" wide. Can be picked 4 or more months. Ht. 30".

1/32 oz	1/8 oz	1/4 oz	1 oz
1.95	4.90	7.45	25.00

**5331 Basil Spicy Globe** About 21,000 sd/oz. A fine leafed basil with very little bitterness. Compact green 12-15" plants are attractive as an ornamental. Also very popular for cooking.

1/32 oz	1/4 oz	1 oz	1/4 lb
1.90	3.00	7.15	25.00

**Dill Bouquet**

**Basil Rutger's Passion DMR**

**5340 Basil Sweet Large Leaf Italian** About 16,000 sd/oz. Sweet, pungent herb with broad 2-3" leaves; used to flavor tomato sauces, meat, fish, vegetables, popular for pesto sauce. Ht. 2'.

1/32 oz	1/4 oz	1 oz	1/4 lb	1 lb
1.60	2.15	3.55	7.15	25.00

**5358 Borage** (*Borago officinalis*) About 1,000 sd/oz. Produces tiny blue and pink flowers from late spring to frost. Used in salads, soups or cool drinks. Commercially grown for its seed oil. Attracts bees. Ht. 1.5-2'.

1/16 oz	1/4 oz	1 oz	1/4 lb	1 lb
1.60	2.15	3.00	12.00	35.00

**5380 Cat Grass Tabby** About 857 sd/oz. Bright white, green and some variegated foliage. Attractive to cats and famous in health-food recipes. Reaches about 6" high 2 weeks after sowing. Final height 24" for green leaves and 4-6" for variegated. Softly textured, provides vitamins and fiber for cats.

1/4 oz	1 oz	1/4 lb	1 lb	5 lb
1.65	4.20	13.95	46.90	41.35/lb

**5412 Chamomile German** (*Matricaria recutita*) About 395,000 sd/oz. Apple-scented plants that like sun. Plants flower profusely. Used in teas. Ht. 1.5'.

1/256oz	1/4oz	1/2oz	1oz	1/4lb
2.15	4.15	4.90	8.20	30.00

**5448 Cilantro Santo** (*Coriandrum sativum*) About 2,000 sd/oz. (Chinese Parsley) Used in Asian and Mexican cuisine. Broad, deep green, parsley-like, pungent foliage. Slow to bolt. Ht. 2'.

1/32 oz	1 oz	1/4 lb	1/2 lb	1 lb
2.70	4.15	5.25	8.50	16.00

**5457 Coriander Slo-Bolt** (*Coriandrum sativum*) About 2,000 sd/oz. 45 days. Well known and reliable variety. Fresh cut leaf, dry leaf or ground seed for spice.

1/32 oz	1 oz	1/4 lb	1/2 lb	1 lb
1.60	2.35	3.60	6.15	10.65

**5502 Cumin** (*Cuminum cyminum*) About 8,000 sd/oz. Seed is powdered and used in curries, pickles, sausages and Mexican food. Hot, pungent flavor. Reaches a height of 9".

1/64oz	1oz	1/4lb	1/2lb	1lb
1.65	3.00	10.20	17.15	30.00

**5511 Dill Bouquet** About 16,000 sd/oz. Delicate, soft green, feathery foliage used fresh on fish and salads; seed heads are a favorite pickling spice. Ht. 28-30".

1/32 oz	1 oz	1/4 lb	1 lb	5 lb
1.80	5.15	8.25	18.55	15.75/lb

**Basil Purple Ruffles**

**Basil**

**Rutger's Obsession DMR**

**5520 Dill Dukat** About 19,000 sd/oz. Produces very strong-flavored, pungent foliage with high oil content. European strain used for warm weather. Ht. 48".

1/32 oz	1 oz	1/4 lb	1 lb	5 lb
1.55	2.00	3.25	10.95	9.60/lb

**5529 Dill Fernleaf** About 13,000 sd/oz. Extremely compact, basal-branching; deep green, finely-cut foliage with the flavor of larger types but also quite ornamental. Ht. 18".

100 sd	500 sd	1000 sd	5 M	10 M
1.60	3.55	5.70	4.80/M	4.20/M

**5538 Dill Mammoth** About 15,000 sd/oz. Larger yellow flower heads than Bouquet. Leaves for soup or stews. Stalks and seeds for pickles. Ht. 2'.

1/32 oz	1 oz	1/4 lb	1 lb	5 lb
1.65	2.75	4.40	14.75	12.95/lb

**5554 Fennel Antares F1** 68 days from sowing. Nationwide trials reported uniform, 4-5" pure white bulbs, ferny fragrant. Bolt resistant in the summer. Sow away from dill.

100 sd	500 sd	1000 sd	5 M	10 M
2.60	9.30	14.85	12.45/M	10.90/M

**5556 Fennel Florence** (*Foeniculum dulce*) About 7,000 sd/oz. Enlarged leaf bases, somewhat like celery with distinctive anise-like flavor. Will form a bulb if harvested before seed sets. Sow away from dill. Leaves/seeds used in soups, eggs, sauces. Ht. 2.5' tall.

1/16 oz	1/2 oz	1 oz	1/4 lb
2.15	3.95	6.50	9.90

**5646 Marjoram Sweet** (*Origanum majorana*) About 126,000 sd/oz. Sweet flowers in purple spikes used for flavoring meats, poultry, soups, dressing and salads. Ht. 2'.

1/32 oz	1/4 oz	1/2 oz	1 oz	1/4 lb
1.95	3.40	4.15	6.85	18.00

**5727 Savory Summer** (*Satureja hortensis*) About 44,000 sd/oz. Leaves and young stem-tips used fresh or dried for flavoring meats, stuffings and teas. Ht. 1'.

1/32 oz	1/2 oz	1 oz	1/4 lb	1/2 lb	1 lb
1.65	2.20	3.30	9.90	17.60	32.25

**5768 Stevia rebaudiana** About 77,000 sd/oz. 12"; Sub-tropical herb produces white flowers with a sweet scent. Leaves can be used fresh or dried as an alternative to sugar.

## Perennial Herbs

*\*All Herbs are untreated unless otherwise stated.*

**5394 Catmint** (*Nepeta mussini*) About 37,000 sd/oz. Blue flowers thrive in hot weather. Ht. 1'.

1/256 oz	1/8 oz	1/4 oz	1 oz
1.80	3.40	5.15	17.35

**5403 Catnip** (*Nepeta catarica*) About 47,000 sd/oz. Vigorous mint; attractive to cats. Use the heart-shaped leaves fresh or dried in teas. Ht. 24".

1/256 oz	1/2 oz	1 oz	1/4 lb
1.95	3.30	6.00	21.45

**5430 Chives Common** (*Allium schoenoprasum*) About 23,000 sd/oz. Onion flavored grass-like leaves. Chop greens for flavoring meats, vegetables and salads. Ht. 1'.

1/16 oz	1 oz	1/4 lb	1 lb
2.30	5.15	17.00	57.25

**5439 Chives Garlic Oriental** (*Allium tuberosum*) About 6,000 sd/oz. Use chopped leaves to add mild garlic flavor to salads, soups or stir-fry recipes. Flowers are white. Ht. 12".

1/16 oz	1 oz	1/4 lb	1 lb
2.45	4.70	13.65	41.15

**5440 Chives Quattro F1** Overwintering. Sow summer, harvest spring til hard freeze. New leaves are very thick, .75" wide, fleshy, very soft, and easily eaten. Flavor like onion with hint of mild garlic. With cold winter, buds initiate and large purple ball-shaped flowers appear 2nd spring. Young tender flower shoots are edible. Flowers have 2-week shelf life as a cut flower. Grows 12" tall first season, taller in subsequent years. Edible & Ornamental, Cut Herb, Gdn Ctr.

25 sd	250 sd	500 sd	1000 sd	5 M
3.45	23.85	38.15	63.95	56.15/M

**5493 Cress Upland** (*Barbarea verna*) About 24,000 sd/oz. Dark green, glossy, rounded leaves similar to water cress; peppery flavor. Ht. 6-8".

1/8 oz	1 oz	1/4 lb	1/2 lb	1 lb
1.60	2.20	5.15	8.55	15.00

**5583 Hyssop** (*Hyssopus officinalis*) About 28,000 sd/oz. Similar to a mint flavor. Plants yield aromatic oils used in perfumes and soaps. Leaves are used in tea. Ht. 1.5'.

1/32 oz	1/8 oz	1/4 oz	1/2 oz	1 oz
1.60	2.20	3.40	5.70	10.00

**Chives Quattro F1**

**5592 Lavender Hidcote Blue** (*Lavandula angustifolia*) About 32,000 sds/oz. Leaves and deep purple flowers are fragrant, ornamental. Ht. 18".

100 sd	500 sd	1000 sd	5 M	10 M
1.55	3.55	6.15	5.10/M	4.60/M

**5610 Lavender Munstead Strain** (*Lavandula angustifolia*) About 25,000 sds/oz. Compact, bushy habit with fragrant lavender-blue flowers. Attractive in borders or landscape with gray-green foliage. Ht. 1'.

100 sd	500 sd	1000 sd	5 M	10 M
1.55	5.50	10.15	7.60/M	6.15/M

**5619 Lavender Vera** (*Lavandula angustifolia vera*) About 28,000 sds/oz. Pungent leaves and flowers used in potpourri, wreaths, scenting linens, perfumes. Hardy plants with aromatic lavender-blue flowers. Ht. 2'.

1/32 oz	1/4 oz	1/2 oz	1 oz	1/4 lb
2.15	7.50	9.00	15.00	55.00

**5621 Lavender Vicenza** About 30,000 sds/oz. Benary's Apex conditioned to overcome dormancy. First year flowering and needs no vernalization. Thick spikes of deep blue flowers over silver foliage.

100 sd	500 sd	1000 sd	5 M	10 M
3.25	12.75	18.65	15.90/M	14.35/M

**5232 Lemon Balm** (*Melissa officinalis*) About 48,000 sd/oz. Heart-shaped leaves with a lemon fragrance. Attracts bees. Used in teas and salads. Ht. 18-36".

1/256 oz	1/64 oz	1/16 oz	1/4 oz
1.75	2.75	5.00	7.00

**5628 Lemon Mint** (*Monarda citriodora*) About 59,000 sd/oz. Lemon-scented foliage and blooms. Attracts bees. Ht. 24-36".

1/256 oz	1/64 oz	1/32 oz	1/16 oz	1/8 oz
1.55	3.25	3.90	6.55	12.50

**5637 Lovage** (*Levisticum officinale*) About 9,000 sd/oz. All plant parts are edible and have a celery-like flavor. Used in soups, salads and cakes. Ht. 6'.

1/16 oz	1/4 oz	1/2 oz	1 oz	1/4 lb
1.75	3.00	3.65	5.35	19.20

**Tarragon**

**5655 Mint Peppermint** (*Mentha x piperita*) About 358,000 sd/oz. Excellent beverage mint, strong cooling menthol aroma. Oil from plants flavors candies and desserts. Ht. 24".

1/256oz	1/16 oz	1/8 oz	1/4 oz	1/2 oz	1 oz
2.15	5.70	9.00	14.00	24.00	44.00

**5664 Mint Spearmint** (*Mentha spicata*) About 378,000 sd/oz. Appearance very similar to peppermint but less potent. Young leaves used in jellies and drinks. Ht. 22".

1/256oz	1/16 oz	1/8 oz	1/4 oz	1/2 oz	1 oz
2.15	6.00	9.35	14.00	22.00	40.00

**5673 Oregano Greek** (*Origanum heracleoticum*) About 248,000 sd/oz. This strain has a small leaf and a stronger, more pungent flavor than other strains. Leaves used fresh or dry in sauces and soups. Ht. 2.5'.

1/64 oz	1/16 oz	1/8 oz	1/4 oz	1/2 oz	1 oz
1.75	2.75	4.25	7.00	12.00	18.00

**5682 Oregano Italian** (*Origanum vulgare*) About 321,000 sd/oz. Flavorful herb used in tomato sauces, salad dressing and soup. Ht. 18".

1/64 oz	1/16 oz	1/8 oz	1/4 oz	1/2 oz	1 oz
1.60	2.95	4.00	6.15	9.00	12.00

**5691 Pennyroyal** (*Mentha pulegium*) About 389,000 sd/oz. Strong mint flavor and fragrance. Good along walkways or as a permanent edging to repel insects. Use sparingly in teas & sauces. Ht. 6".

1/128 oz	1/32 oz	1/16 oz	1/8 oz	1/4 oz
1.65	2.00	3.25	5.95	10.00

**5700 Rosemary** (*Rosmarinus officinalis*) About 20,000 sd/oz. Wonderfully fragrant, grayish-green plants attractive in borders or containers. Tasty for seasoning meats, eggs and vegetables. Ht. 2-2.5'.

1/32 oz	1/8 oz	1/4 oz	1/2 oz	1 oz	1/4 lb
4.80	13.25	20.80	37.45	54.15	202.80

**5709 Rue** (*Ruta graveolens*) About 13,000 sd/oz. Lacy blue-green foliage is highly ornamental. Salads and flavoring cheese dishes. Ht. 2'.

1/64 oz	1/16 oz	1/8 oz	1/4 oz	1 oz
1.55	2.00	2.65	4.30	15.00

**Chives Garlic Oriental**

**Oregano Italian**

**Lavender Vera**

**Thyme**

**5718 Sage** (*Salvia officinalis*) About 3,000 sd/oz. Gray-green leaves and violet flower spikes. Use leaves and young stem tips to flavor poultry, meats, sausage, chowders and sauces. Ht. 1-2'.

1/32 oz	1/8 oz	1/4 oz	1/2 oz	1 oz
1.80	2.40	3.80	6.35	11.15

**5763 Sorrel** (*Rumex acetosa*) About 30,000 sd/oz. Long slender leaves with a distinctive citrus tang. Used to flavor soups, sauces, salads and other vegetables. Ht. 6-8".

1/32 oz	1/4 oz	1/2 oz	1 oz	1/4 lb
1.90	3.15	3.70	6.25	22.85

**5781 Tarragon** (*Artemisia dracunculifolia*) About 163,000 sd/oz. Spreading plants with pale green leaves. Used in herb vinegar, sauces and salads. Ht. 5'.

1/64oz	1/16oz	1/8oz	1/4oz	1/2oz
1.60	2.25	3.85	6.20	10.90

**5790 Thyme** (*Thymus vulgaris*) About 104,000 sd/oz. Lilac flowers good for edging. Season chowders, stews, sauces and pickles. Ht. 6".

1/32 oz	1/4 oz	1/2 oz	1 oz	1/4 lb
2.00	5.00	6.30	10.40	31.50

**5799 Thyme Creeping** (*Thymus serpyllum*) About 213,000 sd/oz. Tiny, rounded, blue-green leaves with purple flowers. Use in rock gardens, pathways or groundcover. Leaves are used in teas, salads, rice and fish dishes. Ht. 2-6".

1/256 oz	1/16 oz	1/8 oz	1/4 oz	1/2 oz
1.55	2.00	3.55	5.70	10.00

**5817 Wormwood** (*Artemisia absinthium*) About 471,000 sd/oz. Aromatic foliage is silvery-gray and aromatic. Use commercially in cosmetics, vermouth and absinthe. Ht. 1'.

1/128oz	1/16 oz	1/8 oz	1/4 oz	1/2 oz	1 oz
1.55	1.75	2.85	4.60	8.20	15.00

**Small Assorted Professional Warted Mix**

**Lunch Lady**

**Shenot Crown of Thorns**

**Harvest Wings F1**

## Gourds (Cucurbita Pepo ovifera)

Annual cucurbits grown much like winter squash. Large: 100-300 seeds/oz.; Small: 300-900 seeds/oz. Direct sow seeds after danger of frost where they are to remain. Seeds germ in 5-7 days at 75-80°F. Best on a trellis in full sun. Do not thin seedlings as brightest colors may sprout slowest. Harvest when fruits are fully mature but before frost, and dry several weeks; can be varnished. 10-12' vines. **Days to maturity are from sowing.**

### Large Seeded Gourds

**5004U Bird House Bottle** 95-110 days. Mostly 10-12". Smooth shells can be dried for used as bird house or water jug.

**5011U Caveman Maranka** 130 days. Club shape with large swollen end and curious random ridges.

**5025 Large Assorted** Various sizes, shapes and colors. For birdhouses, dippers, ornaments.

**5032 Luffa** Grown for its fibrous flesh. Harvest at 2" for baby vegetables. Harvest after 90 days for sponges.

**5034U Lunch Lady** 110 days. Unique LARGE WARTED gourd mix. Broad range of shapes, colors and patterns, all with sizable fruit in the 3-10 lb. range, all with hard shells and warts. Strong, heavy vines.

**5036U Martin Bird House** The genuine Martin Bird, smooth tan rind with fat oval base and tapered top creating a double balloon shape. Most are 14-16" x 10-12". Dries and hollows out well and holds up well outdoors if cured properly. Birdhouse, Decorative, Cornucopia.

**5088 Speckled Swan** Long elegant snail, oval base bearing a goose neck with a head at end.

**Goblin Eggs**

**Bird House Bottle**

### Small Seeded Gourds

**5019 Goblin Eggs** 80 days. Very cool blend of small eggs with lots of striped, zoned and speckled types as well as pure whites and golds and many others. Earlier maturing than other ornamental gourd strains. Decorative, Cornucopia.

**5021U Harvest Wings F1** 95 days. Approx. 350 seeds/oz. Multi-color mix, many types with very prominent wings and other strange shapes.

**5053U Shenot Crown of Thorns** Crown of Thorns type with pronounced thorny warts around shoulders or fruits. Wide range of patterns in white, green, and orange.

**5060U Small Assorted** Beautiful patterns, colors and shapes; smooth and warted skins. For table decorations, fresh or dried.

**5080U Small Assorted Professional Warted Mix** Blended for advantages in commercial production for mkt. Smaller more uniform 3" fruit with stronger colors, more consistent warting. Assortment of stripes, bi-colors solids, spoons, pears, short pears, flats and rounds. High proportion of yellows, greens and oranges, with fewer whites, for brighter display at Fresh Mkt.

**Buttercrunch**

## Lettuce (*Lactuca sativa*)

Approx. 25,000 seeds/oz. Pkt plants 30' of row; ¼ oz sows 100'; 1 oz. produces approx. 10,000 plants. Direct-sow 1-3 lbs/acre; sow seeds thinly ¼" deep. Seeds germ in about 7 days. Set head types 10-15" apart in rows 16-24" apart (leaf types 8-12" apart in rows 12-24" apart). **Days to maturity are from sowing.**

Some lettuce varieties listed are Mosaic Indexed Seed (M.I.). A sample of 30,000 seeds or seedlings was tested and found free of lettuce mosaic virus infection. However, no seed lots are guaranteed disease-free.

### Butterhead Type

**3108U Buttercrunch** 20-75 days. Butterhead Bibb type. Slow bolting, long lasting, heat tolerant, with compact cream-yellow heart. 12". Rosette 4-5". Sturdy rosette of thick deep green red-tinged blistered leaves. White seeded. Mosaic free. Fresh Mkt.

**3144U Speckles** 45-55 days. Amish heirloom. Lime-green leaves flecked with red-brown speckles on leaf form a dense bibb-like head with a blanched yellow-green heart and sweet flavor.

### Cos/Romaine Type

**3134U Osterley** 20 days baby leaf. 45 days mature leaf. Broad mildew resistance. Thick, crunchy dark green cos leaf with teardrop shape, good weight, slightly blistered and cupped, providing good leaf volume for bag fill. Very good material for baby leaf production. Vigorous upright habit for easy harvest. Good bolt resistance. Tolerant DM 1-13, 15, 17-19, 22, 24, 25, 27-31. Fresh mkt, Baby leaf, Romaine bunching head.

**3137 Parris Island Cos PVP** 71 days. Selection of the popular mkt-type Romaine. Tall, narrow heads with crisp, sweet leaves produce creamy yellow centers, Adapted to North, South, East and West. Vigorous, uniform.

**3152U Vivian** 28 days baby leaf, 50 days mature leaf. Non-heading Romaine with crisp leaves up to 12" x 4" at maturity. Bolt resistant. If harvested as leaves, provides a continual supply of greens over an extended period. Excellent for baby leaf production. Fresh Mkt, Restaurant.

#### Lettuce Disease Codes

BR	Brown Rib
DM	Downy Mildew
F	Fusarium
TB	Tipburn

**Simpson Elite**

### Iceberg Type

**3133 Meridian** 69 days. The first Iceberg ever available with field tolerance to Fusarium Race 1. Large uniform heads and good bolt tolerance.

### Leaf Types

**3132 New Red Fire M.I.** 48 days. Medium/large dark red heads having excellent uniformity in size and color. Leaf-type is red-tinged, ruffled with waxy margins. Slow bolting. Fresh Mkt, Specialty Mkt.

**3138U Red Sails** 40-65 days. Full rosette of intense red foliage, bronzed at tips, extra ruffly and deeply lobed. Flavor is mild, tends to be free of bitter tones. Reaches cutting quality early, but holds well up to cutting. Good shelf life. High content of Vitamins A, C. **Not available until December 2022.**

**3142 Simpson Elite** 40-65 days. Slow bolting. Very early and adaptable. Attractive, broad and crumpled leaves with curled outer leaf margins. Large leaves are light green. Inner leaves blanch to almost white. Large upright plants stand warm and dry weather as well as some frost. Fresh Mkt, Shipping.

**3150U Tango** 28 days baby leaf, 40 days mature leaf. Dense rosettes of ruffly, pointed deep green leaves. Tight erect habit. Very uniform in habit & timing. Tender tangy flavor. Best sub for Green Wave when needed.

**3153U Vulkan** Mid-early. Slightly frilly leafage has brilliant red color over a soft green background. Vigorous and uniform, holds well in field and remains weight well after harvest. Packs out well from field and shows a more attractive color than other red-leaf types, with good color retention. Ornamental and edible. Tolerant TB. Fresh Mkt, Bunching Baby Leaf, Bedding Sales.

**Vivian**

## Kale

(*Brassica oleracea*, *Acephala* Group)

Approx. 9,000 seeds/oz. Pkt plants 30' of row; ¼ oz sows 100'. Direct sow 2-4 lbs/acre. Sow seeds ½" deep, 18-24" apart in rows 24-36" apart. Seeds germ in about 10 days. An attractive, durable fresh/raw garnish and highly nutritious greens. **Days to maturity are from sowing.**

**3028U Black Magic** 25 days baby leaf, 60 days mature leaf. Upright rosette habit for easy, clean harvest. Improved winter hardiness. Long narrow dark blue-green leaves with white spine on lower surface. Leaf is intensely blistered and crinkled for a wonderful eating texture. Cold resistant and bolt tolerant. This is improved breeding of the heirloom "Cavolo Nero" type. Fresh Mkt, Specialty Restaurant.

**3029U Blackjack F1** 25 days to baby leaf, 60-90 days to mature leaf. First F1 Hybrid among Tuscan Kales. More uniform for narrow, darker, well textured leaves. Sturdy stalks perfect for bunching also resist wind damage better. Compact upright rosette habit for easy, clean harvest. Can stand tougher weather than o.p. varieties, with improved resistance to cold weather and bolting, providing opportunity for higher yield and suitability for machine harvest. Leaf is intensely blistered and crinkled for a wonderful eating texture. Fresh mkt, Restaurant, Specialty Cut Mixed Greens.

**3032 Blue Armor (Winterbor) F1** 47-57 days. Outstanding hybrid Vates type. Attractive, very deep blue-green leaves are extremely curled and fringed; wide petiole spacing makes harvest easier. High yield potential on strong growing, uniform plants. May be suitable for over-wintering.

**3037 Blue Knight (Darkibor) F1** 45-55 days. Outstanding hybrid Vates type replaces plantings of standard Vates. Earlier, stronger, more uniform and higher yields. Deep blue, firm, curly leaves have less tendency to yellow and hold up well when cut. Uniform, strong grower. Yields 7-8" stalks in just 45 days; larger plants in 55 days. Will out yield OP types by 50% Spring or Fall planting.

**Red Russian**

**3070U Casper** 30-35 days baby leaf, 50-55 days full leaf. Sweetest tasting Kale in British trials. Deep green with frilly edges and broadly colored white ribs. Ornamental and edible. 18"x 12-14" at full leaf stage. Cold resistant and slow bolting under normal weather conditions. Fresh Mkt, Bunching, Baby Leaf, Bedding Plant.

**3045U Lacinato** 50-60 days. Unique heirloom type. Strap-like blue-green leaves 10" x 3". Deeply savoyed and crinkled. Edible ornamental; flavor is enhanced by frost. Extremely winter hardy. Sometimes called "dinosaur kale". Fresh Mkt, Specialty.

**3051 Prizm F1** 50-60 days. Densely branching plants sufficiently compact for container cultivation but also adapted to open ground. Short, tightly ruffled foliage is clean green, tightly ruffled and tender. Flavor unusually mild with nutty overtones. Aggressive re-leafing after cut, for early and prolonged harvest. Keeps mild flavor throughout growing season. Less likely to lodge because of low profile. Fresh Mkt, Garden Ctr Sales, Restaurant.

**3052 Red Bor F1** 47-57 days. Unique dark red. Similar to Blue Armor except for color. Tall standing habit, overwinters well, bolt tolerant, deeply fringed and curled. 2'. Extremely productive. Fresh, Ornamental, Salad, Shipping.

**3057 Red Russian** 25 days baby leaf, 50 days mature leaf. Red leaves, crisp and curly, cold hardy, for winter harvest.

**3065 Roulette** 30-35 days baby leaf, 50-55 days full leaf. Frilly edged blue green leaves with broadly colored red ribs. Grows to 20-24" x 14-18" inches at full leaf stage. Cold resistant and slow bolting under normal weather conditions. Ornamental and edible. Cut leaf, Bunching, Bedding Plant, Specialty Restaurant.

**3067 Scarlet** 35-40 days baby leaf, 55-60 days full leaf. Vigorous plant, grows 2-3' tall x 2' wide. Deeply frilled fronds start out deep purplish green with dark purplish red veins and stems. Matures to deep purple red all over as cooler weather begins. A long-standing, hardy plant that may last into winter in mild areas. The leaves spread broadly like a parasol atop the deep purple stems. Ornamental and edible. Cut leaf, Bunching, Bedding Plant, Specialty Restaurant.

**Vates**

**Starbor F1**

**Autumn Star F1**

**Zermatt**

## More Kale

**3068 Starbor F1** 55 days. High leaf volume in small space, the most densely branched Kale available. At just 12-18", due to short internodes, yields like much taller varieties in the same area, with better durability against wind and cold damage. Finely curled leaves about 10-12" inches, extra dark blue green vs all others of this type. Fast, vigorous regrowth after harvest or stripping, continued harvest up to heavy freeze. Fresh Mkt, Bunching, Processing.

**3062U Vates** 55 days. Well-known variety with attractive, curled leaves which resist yellowing. Upright hardy plants.

## Kalette®

**2211U Autumn Star F1** 180 days. Kalette® is a cross between Kale and Brussel Sprouts, created using traditional breeding methods (non-GMO). A 4ft tall stalk develops but instead of sprouts, a miniature kale head about 2" across buds out at each node. These are harvested from Sept/Oct onward until hard freeze. High vigor, high yield potential. Delicious sweet and nutty flavor. Highly nutritious. Red-Green bicolor. Plants are quite ornamental as well. Fresh mkt, Restaurant, Novelty.

## Tronchuda Leaf Cabbage

**2215 Beira Tronchuda** 85 days. Special type of loose-leaf cabbage. Interest in this traditional type has grown recently. Wide spreading leaves are deep green with thick, white, fleshy ribs, sweet and tender, a welcome component to the greens market. Good for juicing. Fresh Mkt, Greens, Grocers, Mixed Salad, Novelty.

**Grand Duke Improved F1**

## Kohlrabi

(*Brassica oleracea*, *Gongylodes* Group)

Approx. 9,000 seeds/oz. Pkt plants 30' of row. Direct-sow 2-4 lbs/acre. Sow seeds ½" deep, 18-24" apart in rows 24-36" apart. Seeds germ in about 12 days. **Days to maturity are from sowing.**

**3077 Grand Duke Improved F1** 45 days. Easy to grow, tasty crop; high yields in limited space. Plants form rounded, smooth bulbous stems about soil level, up to 4" across. Delicious raw, salads or cooked. Resists cold weather, light frosts and adverse weather conditions.

**3081 Konan F1** 50 days. Smooth globe shaped "bulb" has pure white interior with sweet flavor and excellent crispy texture. Maintains good non-pithy quality up to 6'. Upright uniform leaf stalks, 10" at small-bulb harvest, 24" at full maturity, hold foliage well held away from ground, reducing likelihood of insect damage. Plant spreads only 10", adaptable to container culture or plant sales. Fresh Mkt, Garden Ctr. Restaurant.

**3080 & 3080U Quickstar F1** 50 days. Early maturing, slow bolting. Beautiful, smooth bulbs are pale green with mild sweet flavor, flat round shape, very uniform in size & maturity.

**3082 & 3082U Winner Improved F1** 55 days. Mid-early. Large green knob, upright, resists pithiness. Best substitute for Grand Duke when needed.

**Konan F1**

## Leek

(*Allium ampeloprasum*, *Porrum* Group)

Approx. 11,000 seeds/oz. Pkt plants 30' of row; ½ oz sows 100'. Direct sow 3-4 lbs/acre. Sow seeds ½" deep, 1-4" apart in rows 16-24" apart. Seeds germ in about 10 days. **Days to maturity are from sowing.**

**3098 Exeter F1** 95-105 days. Productive hybrid, with attractive dark foliage. Early and bolt tolerant. Strong basal 1" diam shaft grows to 6" or longer depending on depth of trench or hill. Abundant 12" flag leaves above develop a deep bluish green color. The base of shaft tends not to bulb at maturity, an added benefit of this variety. Resistant Rust. Fresh mkt, Home Gdn, Specialty.

**3099U Zermatt** 85 days. Very early among OP Leeks, which has created great demand in baby leek mkt. Attractive. Long shaft with erect light green leaves. Extended white zone at base of shank.

**Aphrodite F1**

**Melon Growers, Note:** We suggest you grow the correct type of melon for your market. Shipping types are especially resilient with lasting quality for long-distance market. They do, however, taste fine if grown for fresh market. The varieties we recommend for local or home garden are best used near where they are grown because they have a softer rind/skin and may not hold as well.

## Melons

(*Cucumis melo*) (Muskmelon)

Approx. 1,200 sd/oz. Hybrid pkts contain 25 seeds; ¼ lb. produces approx. 2,500 plants. Seeds germinate in about 7 days. Transplant 6,000 plants/acre. Set plants 12" apart in rows 60-84" apart. **Days to maturity are from sowing.**

### Eastern Types

**2369 Ambrosia F1** 88 days. Higher than average sugar content, extra-sweet flavor your customers will come back for again and again. Nearly round fruits average 4-4.5 lbs, 6.5" x 6", with heavy netting and no sutures. Thick, sweet salmon flesh; small seed cavity and very tight seed mass. Tolerant DM, PM. Fresh Mkt, Short distance shipping, Garden.

**2371 Aphrodite F1** 72 days. Athena type with slightly larger fruit, 6-7 lb and 6.5" x 7". Habit is more compact with smaller footprint. Very sweet flesh is smooth, creamy and aromatic with a hint of honey. Thick flesh, strong texture, good shelf life on farm stand or in regional shipping. Rind is well netted, slightly sutured. Got high marks for yield and quality in Eastern and Midwest trials. Resistant FW 0-2, PM 1. Fresh Mkt, Regional Shipping, Garden Plant Sales.

**2374 & 2374U Athena F1** 75 days. Early maturing eastern muskmelon particularly suited to SE, Midwest and Mid-Atlantic mkts. Course netting, small cavity, very firm flesh (5-6 lbs.) Resistant FW 1-2, PM. Tolerant Sul. Fresh Mkt, Shipping.

**2375U Avatar F1** 70-80 days. Uniform extra large 7-9 lb melons with full netting & shallow rind. Classy Eastern type; blocky oval fruit with large, dry, open cavity. Deep orange, very sweet full-flavored flesh is medium firm. Brix ratings at trials have been mostly 11-12, occasionally 13. Especially notable for such early maturity. Resistant FW 0-2, PM 1. Tolerant PM 2. Fresh Mkt, Short Distance Shipping.

**2381 Carousel F1** 80-85 days. 6-9 lbs; Oval Super Star type melons, measure 9.5" x 7" with strong sutures like classical muskmelons. Tight cavity, firm flesh and good sugar for excellent eating quality. Strong vigorous vines and double disease package provide high yield potential. Firm melons and firm internal flesh. Good shipper with lasting quality. Well adapted to outdoor production. Resistant FW 0-2, PM. Fresh Mkt, Roadside, Shipping.

**2386 Duchess F1** 75 days. 5-6 lbs. 14% Brix rating. Big round-oval melon, good shelf life rating, great taste. Heavily netted, lightly sutured, refined Eastern type interior with small, tight cavity and thick flesh, deep orange to rind at maturity. High disease rating can enable consistent high yield potential. Worth testing as Athena type. Resistant FW 0-2, PM 1-2. Fresh Mkt, Roadside, Regional Shipping.

### More Eastern Types

**2408 El Gordo F1** 75 days. Extra large 10-15 lb fruit are sweet and quite early for such jumbo size. Extra large oval melon with heavy netting, distinct green sutures, and interior cavity that is small in proportion to fruit diameter. Flesh is very sweet at avg 16% Brix, with the excellent, slightly musky flavor of classic Eastern type. Yield avg 3-4 fruit per plant. Can produce giant 20-30 lb show melons if all but the first few fruits are removed at young stage and if given extra deep soil with rich nutrition. Tolerant PM 2, WMV. Fresh Mkt.

**2411 Goddess F1** 68 days. A Wow! Early eastern melon with excellent performance and quality for the extra early market. 6.5" fruit. Average weight 5-6 lbs. Good sugar at 11% Brix. Oval, heavy net, unsutured. Tolerant PM 1-2, FW 0-2.

**2421 Halona F1** 68-72 days. 4-5 lb. 6" globe shape. An improved Earliqueen type, matures a week earlier. Thick, sweet orange fleshed muskmelons. Rinds with heavy netting and distinct sutures. Uniform and productive, with better taste and stronger disease package. Resistant PM. Tolerant FW. Fresh Mkt, Roadside, Garden.

**2485 Infinite Gold F1** 75 day, mid-season maturity. Average weight 4 lb. Bred especially for long shelf life (LSL) great flavor and fruit quality. Strong vines, high yield potential, uniform size and shape. Was rated in 2012 by a third-party sensory analysis panel as higher in flavor and quality attributes than the leading competition. Round oval melons, very light suture, fully netted, with firm deep orange flesh. High % size 9 fruit. High Resistance PM 2, FW 0-2. Fresh Mkt, Shipping.

**Goddess F1**

**2428 Milan F1** 72 days. Early Eastern type with distinct sutures and netting. Very sweet and aromatic, avg 13-15% brix. High yield potential of 4-6 lb melons. Breeder's trials found great holdability which can help get the fruit to mkt in great shape; Tight seed cavity and better resistance to cracking than most Eastern melons enhance chance for high production of marketable fruit. Milan performed well even in areas where splitting is a problem. Resistant PM 1-2; FW 0-2. Fresh Mkt, Shipping.

**2429U Minerva F1** 78 days. 6-7 lb. 7 x 7.5". Recommended where early size, sugar and holding ability are wanted. Athena type Eastern melon, from same breeding but slightly larger, with higher resistance level. Fruit is oval to flat oval and lightly but distinctly sutured, with coarse open netting overall. Flesh is thick with outstanding firmness. Vine is vigorous. Largest sizes have reached 10 lb. under best conditions. Well proven and widely adapted in University trials, especially U of F 2000, where Minerva demonstrated higher yield, with same fruit set but 8.3 lb average weight vs Athena's 5-6 lb. Minerva performs well and maintains quality under wet field conditions. Firm flesh allows harvest at tan stage and full slip; green harvesting such as for softer varieties is not needed. Resistant FW 0-2, PM 1. Tolerant PM 2. Fresh Mkt, Shipping.

**2440 Orange Sherbet F1** 82 days. Highly aromatic melon flavor & high brix. Tuscan type Eastern shipper produces premium fancy 7-8 lb oval melons with distinct green sutures and netting. Thick bright orange flesh with small cavity of classic triangular shape. These traits plus high fiber content gives a great eating experience and good shippability. An all-around top notch eating melon. Tolerant FW 1-2, PM 2, WMV. Fresh Mkt, Shipping.

**2451 Rockstar F1** 74 days. 5-7 lb. Performed well in trials across NE & SE. Eastern shipper type with outstanding eating quality, consistently firm orange flesh and lightly sutured rind with medium netting. Slightly earlier and somewhat larger melon than Athena, with good shipping and holding ability. Resistant PM 1-2, FW 0-2.

**2479 Verona F1** 75 days. Average weight 6-8 lb, reaching 15 lb under intensive cultivation. A very large Eastern Shipper (Athena) type, excellent for roadside and mid-range shipping applications, with good holding ability. 12% Brix, lightly sutured, medium netted. Great eating quality, very sweet and firm. Resistant FW 0-2, PM 1-2. Fresh Mkt, Regional Shipping.

**Primo F1**

**Honeycomb F1**

**Tweety F1**

**Dove F1**

**Dulce Nectar F1**

**Earli-Dew F1**

**Citrino F1**

## Western Types

**2444 Primo F1** 79 days. Early, large, dark orange flesh. Almost sutureless fruit are heavily netted, with a small dry seed cavity. The colorful flesh is very thick, sweet and flavorful. Fruits average 5-7 lbs. each, 7"x 7.5". Tolerant PM 1-2, Sulphur. Fresh Mkt, Shipping.

## Sensation Series

High quality specialty melons with improved professional production, shipping & shelf-life. These melons are bred for earliness, disease tolerance and high yield.

**2385 Dove F1** 70 days. Early & sweet. Avg Brix reported at 15.5%, near the top for melons. Soft, creamy flesh is white but may show some green near rind at early picking, or rose tinted at center at later picking. Netting is a delicate tracery over green to orange rind. Specialty markets will ask for more.

## Orange Flesh Honeydew

**2480 Citrino F1** Mid Season orange fleshed Honeydew. Large round fruit with smooth creamy white rind. Flesh is dense and firm with moderately closed cavity, high brix and delicious flavor undertones. Excellent holding ability under long shipping. Resistant PRSV. Tolerant PM. Fresh Mkt, Shipping. Cut Melon Sales.

**San Juan F1**

## Honeydew

**2484 Dulce Nectar F1** 90 days. 4-6 lbs. Grows well through cool periods and transitions smoothly to warm seasons, providing potential for high yield, low stress, and cropping versatility. Large smooth round oval melons with creamy white rind, light green flesh, medium closed cavity for high weight. Maturity is early main season. Resistant FW 2. Tolerant PM 1,2.

**2486 Earli-Dew F1** 75 days. Early honeydew type especially suited to most northern areas. Fruits average 5.5", weigh 1.5-3 lbs. with smooth skin turning green-gold at maturity. Thick, pale green, sweet flesh. Vigorous vines. Resistant FW 2. Fresh Mkt, Shipping short distance.

**2493 Honeycomb F1** 78 days. Best disease package to date in an early Honeydew. High quality and uniform. Large 5.5 lb melons with thick, medium firm, very sweet flesh. Creamy white skin, small neat seed cavity & high 11-13% Brix rating. Excellent potential for high yield due to quick maturity and disease package. Several growers we've spoken to have praised its performance. Resistance FW 0-2. Medium Resistant PM, strong against sulphur. Fresh Mkt, Roadside, UPick.

## Specialty Melons ★

### Ananas

Ananas melons produce light netting over an orange colored rind. Most have firm, yellowish ivory flesh but some are orange-fleshed. Its name means pineapple because of its unique pineapple-like scent. These melons usually have short shelf life. They are not suitable for long distance shipping but perfect and highly sought after in fresh markets.

**2462 San Juan F1** 75 days. Ultra-early. 5 lb, Ivory colored flesh is sweet, aromatic with spicy tones. Reaches fully sweet stage while still firm and slightly crispy. Rind is very attractive, golden yellow and finely netted, strong vigorous vines. Tolerant FW 0-2, PM 1-2. Fresh Mkt, Shipping.

### Canary

Canary melons are oblong with bright yellow rinds, slightly larger than cantaloupes or honeydews. They have a strong, pleasant aroma and sweet, off-white flesh that is very good mixed into a fruit salad.

**2477 Tweety F1** 60-70 days. Bright yellow rind, pale ivory-green flesh. Early maturity. Tropical taste preferred by many; mild, sweet and aromatic with no musky aftertaste. Tolerant FW 1-2 GSB, ALB.

**Tasty Bites F1**

**Passport F1**

**Lilliput F1**

**Sugar Cube F1**

**Lambkin F1**

### Charentais

Charantais melons are French cousins to American muskmelons. They are very sweet, typically grow only to the size of a softball and are suitable for vertical growing on a trellis.

**2438 Oui F1** 77-82 days. Round to slightly oblate, dark orange flesh, 3-4 lbs with butterscotch flavor & high Brix. Lightly sutured & netted, this unusual Eastern shipper has a strong, sweet taste. Fruit are firm with good shelf life. Strong disease tolerance makes this melon ideal for east coast production. Tolerant FW 0-2, PM 2.

### Christmas

Christmas melons have a longer than average shelf life and are characterized by an elongated shape and splotchy yellow and green rind.

**2422 Lambkin F1** 75-80 days from sowing. 70 days from transplant. "Christmas Melon". Special traditional type that harvests well late season. Smooth oval 2-4lb melons, avg 7" x 5". Thin rind mottled green on yellow. Flesh is ivory-white, sweet aromatic, juicy, avg 14-16% Brix. Stores well, maybe til Christmas if you get the timing right. Resistant FW 0-1, Tolerant FW 2. Gourmet Melons.

### Crenshaw

Crenshaw melons are elongated, rich yellow sometimes streaked with light green, appearing slightly wrinkled at the stem ends. The flesh inside is aromatic salmon orange with a delicious lightly spicy sweetness.

**2426 Lilly F1** 80-85 days. Great Crenshaw taste, with super high 15-16% Brix rating. Large long oval 8-10 lb melons with light orange flesh and light smooth, light pale yellow rind. This one should sell well when folks see this hard-to-find favorite back on your shelf again. Avg yield 3-4 fruits per plant in trials. Tolerant PM 1-2, WMV, PMV. Roadside, Fresh Mkt, Regional Grocer.

### Galia

Galia melons are similar to cantaloupes in outward appearance but slightly larger. Inside, the flesh is yellow-green and is reported as exceptionally juicy.

**2501 Passport F1** 75 Days. Very early Galia type. Large, round fruit avg 6 lb, 7"x7" diam. Thick flesh is very sweet, avg 12-13% at first harvest. Flavorful, aromatic, light green flesh is very attractive. Rinds have almost no suture and a fine, full net. Fruits slip when ripe for easy harvest. Vigorous vines can be very productive. Shipping, Fresh mkt, Gdn.

### Personal Size Melons ★

**2425 Lilliput F1** 80 days. Early. A personal hand sized cantaloupe with round, 3.5-5" diam. fruit. Stem slips at full maturity. Eastern shipper type, sutureless, with light netting and tan color at maturity. Flesh is deep orange, very highly flavored, sweet & aromatic, and very firm with tight closed cavity. Resistant FW 0-2, PM 1,2. Fresh Mkt, Regional Grocery, Specialty, Restaurant.

**2473U Sugar Cube F1** 81 days. Superb unique disease package promotes development of super-high sweetness. Small 2 lb. melons pack a big taste, with full flavored 14% Brix rating. Round & fully netted. Deep orange flesh, long shelf life, a must-have for the personal hand melon market. Resistant P 1-2, FW 0-2, PRSV, WMV, ZYMV. Fresh Mkt, Restaurant, Local shipping.

**2475 Tasty Bites F1** 75-80 days. Perhaps the ultimate gourmet personal sized melon with deep orange flesh offset with green outer ring. Flavor is delicious, unique and sweet, resulting from its charantais and ananas parentage. Easy to grow, very vigorous and productive ripening over an extended harvest period. Above average shelf life. Offer customers halves at your market stand as a snack with a scoop of sherbert. Tolerant ALB, FW 1-2, PM 1. Personal Hand Melon.

## Okra (Abelmoschus esculentus)

Approx. 500 seeds/oz. (Formerly of genus *Hibiscus*.) Pkt plants 20' of row; 2 oz sows 100'. Direct-sow 6-8 lbs/acre. Plant in warm soil. Sow seeds 1" deep, 18-24" apart in rows 42-60" apart. Seeds germ in about 10 days. Plants have ornamental flowers and attractive leaves; pods are about 3" long. **Days to maturity are from sowing.**

**3191 Candle Fire** 60 days. Bright red pods are smooth, slender and ribless, borne on bright red stems of same intense hue. Very productive and long bearing. Got high marks in nationwide AAS trials for taste, tender texture, value as edible, ornamental and yield, which was reported at 30 pods avg per plant. Plant sets fruit at 2' and continues growing and yielding til frost. Eventual spread about 2'. Harvest pods when 4-5" x 5.75". Turns green when cooked. Fresh Mkt, Ornamental Fresh or Dried Stalks.

**3197 Clemson Spineless #80** 60 days. High quality. Spineless, rich green pods. Highly productive 6' plants. Developed by SC Ag Experiment Station. Fresh Mkt.

**3198 Clemson Spineless #99** 50-55 days. OP Prolific & early. Most traits like Clemson Spineless 80 but with shorter stalk due to shorter internodes. Harvest at 3.5'. Open habit for easier harvest. Pods are green, "spineless", with distinct ridges, and large size, maturing to 6" x 1.5".

**3199U Green Fingers F1** 55 days. 15"T x 17"W at first harvest, reaching 36" late season. **NEW!** Spineless plant with thick-walled pods, star-shaped in cross section. Extra tender picked at 2-3". Mature harvest at 3-4". Compact & early. Good for easy, early U-Pick.

**3200 Jambalaya F1** 50 days. Extra early harvest, compact plant, small leaves for easy picking. Shiny dark green pods with gentle ridges and appealing pointed-cylindrical shape.

**3202U Red Burgundy** (Open-pollinated) 60 days. Tender, 5-7" pods of deep burgundy color. 4' stalk, green leaves, burgundy stems and leaf ribs. Yellow flowers followed by shocking burgundy pods. Excellent for eating, landscape, and for arrangements in Cornucopia or with dried or fresh cutflowers. Fresh Mkt, Cornucopia, Cutflower Arrangements and Home Gdn.

## Mustard (Brassica juncea)

Approx. 15,000 seeds/oz. Pkt plants 50' of row; 1/4 oz sows 100'. Direct-sow 3-5 lbs/acre. Sow seeds 1/4" deep, 5-10" apart in rows 12-36" apart. Seeds germ in about 9 days. **Days to maturity are from sowing.**

**3157U Florida Broad Leaf [Large Smooth Leaf]** 50 days. Large, broad, oval, green leaves have toothed margins, distinct white midribs. Large, vigorous plants.

**3159U Green Wave** 40-60 days. 16-18" tall. Large upright frame. Southern Curled type but more deeply frilled. Spineless leaves and stems. Very deep green for a curly variety, with spicy hot flavor, slow bolting, and long holding in field, 2-4 weeks longer than others of the type.

**3161 Mizuna Miz America F1** 20-25 days. Deep, dark red leaves. Very uniform for color, growth rate, shape and size. Both upper and lower leaf surfaces stay deep red through maturity. Retains milder flavor through all the growth stages. Upright habit makes harvest easy. Fresh Mkt, Bedding.

**3162U Red Giant** 40 days. Dark purplish red with large leaves and nice mustard pugnacy. Suitable for use as an ornamental edible or as an element of color in salads. Leaf type mustard and slow bolter. Fresh Mkt., Restaurant.

**3167 Savanna F1** 35 days. Very early, productive plants. The round, smooth, thick leaves are dark green. Nutritious, tangy-flavored greens are excellent for boiling, steaming, and stir frying. Large, upright, vigorous plants are widely adapted. Bunching, Fresh Mkt.

**3172U Southern Giant Curled** 45 days. Popular variety for bunching. Bright green, frilled and curled leaves; upright, long standing plants.

**3177 Tendergreen** 40 days. Dark green, very smooth oblong leaves keep deep color even in the hot, dry spells. Large, erect, early bearing plants, good yield potential. Early maturity for quick harvest. Distinct mild spinach/mustard flavor. Fresh Mkt, Gdn.

## Onion (*Allium Cepa*)

Approx. 8,500 seeds/oz. Pkt plants 25-30' of row; 1 oz sows 100'. Direct-sow 3-4 lbs/acre. Sow seeds 1/2" deep, 1-4" apart in rows 16-24" apart. Seeds germinate in about 10 days. Days to maturity are from sowing.

### Intermediate Day

**3221 Candy F1** 100 days. A favorite throughout the US for its versatility and mildness. Golden straw color scales with white flesh. Yields 4" jumbos with a globe shape. Short, sturdy tops and small, tight necks. Matures early in Northern growing areas. Excellent potential for transplants. Sweet and mild flavor. Fresh mkt.

**3240 Great White F1** 103 days. Sweet Spanish type but with beautiful luminous white skin and interior. High % single centers. This is one of Crookham's Celebrate onions. Vigorous tall tops create a canopy to protect bulbs from sunburn, provide a larger leaf area to feed the root system and fewer hiding places for thrips; easier spray applications. The result is high yield potential of clean, jumbo grade onions with great flavor and fewer problems for the grower. Good storage for 3-4 months. Tolerant FW, PR.

**3257 Saffron F1** 100 days North, 110 days mid states. Needs 12-14 hr daylength at end of growth cycle to bulb up. Large 3.5-4" yellow Grano with excellent storage capabilities, but also quite sweet, unusual for a long storage onion. Beautiful dark yellow bronze skin, refined neck and highly single centered. Tried well from North Carolina to Northern US. Maturity will be earlier in north, later in mid states. Not recommended for deep south. Fresh Mkt, Storage.

### Long Day

**3219 Blush F1** 107 days. Unique long day onion. Beautiful delicately colored pink flesh, strong rose-tinted skin. Long storage. Well adapted and easy to grow. Resistant PR. Fresh Mkt, Restaurant.

**3223 Cartier F1** 98 days. Yellow. Early maturing. Good yield potential. Very long storage. Strong skin with refined neck. Recommended for testing in all areas. Resistant PR.

**3249 Red Carpet F1** Late season maturity with good long term storage ability. Large, hard, bulbs with excellent red color throughout. Refined rounded shape. Resistant PR.

### Short Day

**3226 Century F1** 160 days. Midseason. Bred for Vidalia market growers. Granex type with light gold scales, flat globe Granex shape, capable of high packout of Colossal to Jumbo grade bulbs with good sugar readings and low pungency. Bulbs very uniform. Stores well compared to other Granex types. Resistant FB, PR.

**3225 Chianti F1** Late season SD, 170 days from sowing, 85 days from transplant. Short-day red with Granex type shape. Large 3-3.5" bulbs with deep, long lasting red skin color. Rings are wide and crisp, with broad red bands that develop through maturity and intensify during curing. Sweet, mildly pungent flavor. Good for short to mid range storage, 2-4 months. High percentage single centers. Capable of high yields under good standard conditions. Tolerant PR. Fresh SD "Vidalia" Type Mkt. Ships and stores well.

**3258 Sapelo Sweet F1** Short day, jumbo, sweet Granex type. Mid early maturity in Vidalia® production areas. Tops are dark green with 7-8 leaves with 2 skins. Also features a light bronze, tight skin and firm, wide interior rings. Produces bulbs or 2:1 ratio with high percentage of jumbo size. High yield potential. Moderate Tolerance PR.

**3276 White Phantom F1** 110-115 days. Early, short day white with large to jumbo 3" bulbs. High percentage of single centers. Excellent foliage. Has been found in some trials to withstand high heat conditions. Resistant PR. Fresh mkt, Storage.

### Bunching Types (Scallions)

**3232U Evergreen White Bunch** 120 days. High quality. Very long; slender, white shanks with white skin attractive for bunching, delicate flavor. Plants are slow to bolt. Hardy plants winter over for spring crops. Resistant PR, Smut.

**3239 & 3239U Feast** 65-70 days. Clean white upright single stalks with white stem 16-20" long topped by 7-8 thick deep green leaves. White neck is tight and uniform for easy packing of classy-looking bunches. High yield potential due to good heat tolerance and good disease package. Recommended for summer production. Resistant DM, ALS. Fresh Mkt, Roadside, Shipping.

**3246U Ramrod (*Allium cepa*)** 60 days. Winter hardy type with good capability for both fall and spring harvest. Leafier and milder than many bunching varieties and may produce a small attractive bulb if grown past the usual harvest stage. Can develop into a larger, bolder salad onion, especially if allowed to overwinter into spring growth season.

## More Bunching Types (Scallions)

**3247 Red Baron Bunching** 75 days. The first red buncher to stay colored through all stages of growth and under wide range of temps.

**3274 Warrior** 60 days. Early maturing. Refined appearance with bright green stalk color sharply delineated from pure white base. Can harvest from 10-24". Stalks are uniform, slender, .5" at base. Nationwide AAS trials reported good durability, holding longer in field than comparisons. Quite pungent and tasty. Tolerant PR. Fresh Mkt, Shipping, Garden Ctr Sales. *Southeast, Mountain/Southwest.*

## Pearl Onion

**3227 Crystal White Wax** 60 days. Produces lots of small, white, pearl onions very uniform in size and shape. Perfect for pickling, hors d'oeuvres or cocktails. Sow thickly and harvest early. Mild flavor. Resistant PR.

## Sweet Spanish Types

**3218 Almagro F1** 149 days. ID. Replaces Expression in breeder's program. Consistent producer of sweet jumbos for northern production. Adaptable to a wide range of soil types. Thick sweet rings, great sandwich fare. Can reach premium sweet jumbo market in late season when the southern crop is no longer available.

**3241 Lasso F1** 112-114 days. LD. Improved yellow Spanish onion. 2.5"-3" bulbs with high pct single centers and firm flesh even after storage. Attractive, clean rosy-brown skin. Vigorous plant growth. Grower friendly, adapted to all areas where long day Spanish onions are grown. Strong pink root tolerance. Tolerant PR. Fresh mkt, storage, shipping.

**3272U Walla-Walla** 105 days. LD. Extra sweet, extra large and earlier than other Spanish types. Light brown skin, white flesh, very mild and sweet. Summer ripening for fresh use, very cold hardy; short shelf life. Does well in the northeast.

**3277U Yellow Sweet Spanish** 115 days LD. Leading variety for the production of large yellow bulbs. Jumbo strain of deep globe-shaped bulbs with heavy golden-brown skin; small necks. Very mild, sweet, white flesh. Very few bottlenecks.

## Shallots

Plant shallots at a rate of 14 seeds per foot.

**3986 Ambition F1** 90 days. Long Day. The genuine French delicacy at last available from true seed, can be grown like any onion, with less labor and without the diseases carried by sets. Small 1.5" -2" round reddish brown onions with special flavor. Bolt resistant. Very long storage ability. Fresh Mkt, Specialty Mkt.

**3983 (Echallion) Creme Brulee F1** 115 days. Special type of shallot, commonly called banana shallot, with oblong single-centered bulbs, bright coppery pink outer skin and attractive rose-purple interior with thick rings. Bulbs are sweet and tender, milder flavored, mature earlier than standard shallots, and the single bulb is easier to peel. Plant reaches 2-3 ft tall. Tolerant PR. Fresh Mkt, Shipping. *Great Lakes, Southeast, West/Northwest.*

**3989 Innovator F1** 112 days. First ever Downy-resistant Shallot requiring less chemical application and easier culture than other shallots. Good vigor, making a strong stand and promoting good yield potential. Suitable for long storage. Skin is reddish brown. Interior flesh is pink. Elongated bulbs are 3-4" long & 2-3" wide. Green tops are 12-18" long. Resistant DM. Fresh Mkt, Processing.

## Potato

Pelleted seed only. Start indoors at temps between 65 degrees and 80 degrees in soil with pH from 5-6. It is not advised to have nutrients in the sowing medium. Once seed emerges, add plant food. Cut nutrients 1 week prior to transplant. Plant outdoors with 2-4" of top above soil level. When seedlings reach 4-5" tall, begin hilling with soil or straw. Continue throughout the season as necessary.

**3701 Clancy F1** 110 days from transplant. Received high marks in nationwide trials. True seed stores more easily than spuds with less risk of disease transmission. Tubers average 3" x 4", round oval, smooth skin ranging from red to rose blush and creamy white or yellow flesh. Germinate indoors or in seedbed like tomato, transplant at approximately 25 days with 4 true leaves. Delicious flavor midway between russet and yellow varieties. Fresh local, Farm Mkt, Roadside.

**Javelin F1**

**Starlett**

## Parsley (*Petroselinum crispum*)

Approx. 18,500 sd/oz. Pkt plants 30' of row; 1/4 oz sows 100'. Sow 3-4 lbs/acre, 1/4" deep, 4-12" apart in rows 12-36" apart. Germ in about 21 days. **Days to maturity are from sowing.**

**3287U Dark Green Italian** 78 days. We believe this is the best strain of plain parsley available. Produces large quantities of broad, dark green leaves; may be cut repeatedly. Leaves with strong flavor used fresh or dried as herb. Flavoring. Fresh Mkt.

**Triple Curled**

**3316U Starlett** 80 days, depending on sowing season. Very fast crop time and extra dark green "moss-curved" foliage. Robust plants with potential to yield high volume of dense, heavy leaf cushions on strong stems. Medium rough, curled leaves show good shelf life after harvest. Open Field or Container, Fresh Garnish, Garden Ctr Plant Sales.

**3312 Triple Curled** 88 days. Tightly curled leaves attractive for garnish or salad.

**Dark Green Italian**

## Parsnip (*Pastinaca sativa*)

Approx. 12,000 seeds/oz. Pkt plants 30' of row; 1/2 oz sows 100'. Direct-sow 3-5 lbs/acre. Sow seeds 1/4-1/2" deep, 2-4" apart in rows 18-36" apart. Seeds germ in about 18 days. **Days to maturity are from sowing.**

**3327U Harris Model** 120 days. Very attractive; well known for the smoothest roots. Long, white roots 10-12" keep their whiteness after harvest without discoloring. High quality for packing/bushel sales.

**3335U Javelin F1** 110 days. Reliable vigor due to F1 hybrid breeding. Leading variety worldwide. Triangular wedge shaped root with thick crown provides high yield of sweet flesh. Tops are shallow, often level with the ground for easy cleaning at harvest. Skin is white to lightest cream with excellent canker resistance. Can be cropped through all seasons suitable for Parsnip production and has exceptional holding ability in the field and after harvest. Fresh Mkt, Bunching, Wrapped Trays.

**QuickPick Pinkey**

## Peas (*Pisum sativum*)

Approx. 1,440-2,800 sd/lb. 1 lb sows 150' of row. Sow 90-220 lbs/acre, 1-2" deep, 1-3" apart, in rows 24-48" apart. Germ in about 8 days. **Days to maturity are from sowing.**

### Cowpeas (*Vigna unguiculata*)

[Southern Peas] Culture same as for bush beans. Use fresh/dried.

**1164U Mississippi Pink Eye II Purple Hull** 60-70 days. Young pods change from green to purple as they mature and dark purple when dry. Mississippi Pinkeye II was developed from Mississippi Pinkeye for much greater cold tolerance, stronger emergence and better seedling survival. Tolerant FW, N.

**1166U Mississippi Purple Brown Crowder PVP** 70 Days. Large seeded, brown crowder with reddish-purple pods at green shell stage. Plants have much less vine and a higher concentration of pods with the pods maturing over a short time span. Pods shell very easily. High yield. Tolerant FW, N.

**1168 Pink Eye Purple Hull** 80-85 days. Well known standard variety with excellent flavor. Productive, bunch-type plants have possibility of a second crop maturing seven weeks after first harvest if favorable weather persists.

**1175 QuickPick Pinkeye** Non-vining erect bush type habit. Uniform early high yield with pod set well synchronized in clusters of 2 to 3 pods per node, carried high on the plant, above the foliage. Easy harvest by machine or by hand. Straight 8" pods avg 11 peas per pod. Pod matures to dark purple. Fresh peas are green with pink eye, drying to cream with maroon eye. Resistant BLCMV.

**Please see prices on pg 46**

**Mississippi Pinkeye II Purple Hull**

**1177U Top Pick Brown Crowder** 50-55 days to fresh pea harvest; longer to dry pea stage. Upright bush habit provides cleaner pods and easier picking than old-style vine types. Pale silvery-green pods develop pale pink tinge when ready for harvest. Concentrated top-set pods. Early, good shell-out. Fresh Mkt. Shelled or in pod, Freezing, Drying.

**Top Pick Pink Eye**

**1180U Top Pick Pinkeye** 50 days. Improved pinkeye, upright bush type. Loads up with blooms. Pod placement is concentrated cluster on top of plant. For fresh "green" peas, pick when pods are pale or light purple, NOT deep purple. Plant height 18-26" depending on soil type. Easy shelling. High yields, good virus and disease tolerance. Tolerant FW, N.

**Mr. Big**

### Garden Peas (*Pisum sativum*)

**1271U Green Arrow** 68 Days. Large yields. Bright green pods 4.5" are packed with 9-11 sweet peas in pairs on the upper parts of the vines. Plants 24-28". Tolerant DM, FW, Freezing, Fresh Mkt.

**1276 Mr. Big** 58 days. Giant podded, 4" x .5", easy to pick and shell. Pod zips out 9 to 10 extra plump peas. Zips sweet longer than most. Productivity excellent due to early set of 2 pods per node and disease resistance. Resistant FW 1, PM.

**1282U Patio Pride** 40 days. Compact, densely branching plants start flowering at 10" tall and grow to 24". AAS trials reported avg of 30+ pods per plant. Produces 2-3" pods very quickly with 5-6 sweet tender peas per pod. First-early harvest in spring and multiple succession plantings. Direct sown containers can be sold in early spring gdn mkts. Fresh Mkt, Gdn Center Sales. Southeast.

**1277U Pea Parsley** 24 days to side shoot clipping. 60 days to pea pod harvest. Produces bunches of small delicious leaves with sweet pea flavor on tender branching tendrils which are clipped and used in the specialty greens markets. Sweetest when clipped young. Both clipping and pea harvest can be had by waiting for mature pods and harvesting both. The leafy tendrils will continue to be produced. Vines stand 24-32". Also featured on pg 31.

**1278U PLS 595** 72 days. Exceptionally large pods averages 2 pods per node. Great yield potential. Extra easy for hand picking and shucking, since fewer pods have to be handled per pound of shucked peas. Up right Afila vine type, 28-32", requires no trellising. Resistant FW 1, Tolerant PM. Fresh Mkt, Roadside, UPick.

**1280U Strike** 56 days. First early English Pea with strong disease package including tolerance to Pythium Root Rot. First bloom at 9 nodes. Vine is 22-24". Bears 1-2 pods per node. Resistant FW1, Tolerant Pythium root rot. Fresh Market, Processing, Freezing.

**1281 Wando** 67 days. Heat resistant; dependable crop Dark green pods 3" are well-filled with 7-8 peas of excellent flavor. Late plantings do well in warm weather. Vines of 2.5'. Freezing, Fresh Mkt.

### Snap Peas (Edible-Podded Peas)

(*Pisum sativum*)

**1295 Sugar Sprint PVP** 62 Days. Supercedes Sugar Ann and Sugar Bon. Early, sweet and stringless. Improved disease traits and short 26" vines. High yield potential, avg. 12 nodes at 2 pods per node. Resistant PM. Tolerant PEMV. Fresh Mkt, Freezing, Shipping.

**1300 Super Sugar Snap PVP** 66 days. A sweet, crisp snap pea. Produces plumper 3" pods maturing six days earlier than Sugar Snap. Vigorous productive vines grow 55-65" requiring support. Resistant PM. Tolerant BLRV. Freezing, Fresh Mkt.

### Snow Pea (*Pisum sativum* var. *saccharatum*)

**1312U Little Purple F1** 50-54 days. Early. Dwarf but productive, with branching habit. 20" tall in container, 24" tall in ground. Soft purple flowers. Flat pods are glossy bright green. Needs no trellis. A low maintenance space saver for close spaced row crop or container sales. Ornamental and edible. Fresh mkt, Plant sales.

**1324U Oregon Sugar Pod II** 68 days. Oriental type flat podded variety with tender, bright green pods. Pods are high quality, smooth, about 4". Sweet mild flavor and crunchy texture. Raw, stir-fried or steamed. Vines 26" need no support. Tolerant PEMV, PM, CW, PSV. Fresh Mkt, Garden.

# Sweet Bell Peppers

Approx. 4,500 seed/oz. Hybrid packets contain 25 seeds; OP packets produce about 75 plants; 7 oz. produces approx. 10,000 plants. Seeds germ in about 10 days. Set plants 12-24" apart in rows 18-36" apart. **Days to maturity are from transplant.**

Summer Sweet® is a registered trademark of Abbot & Cobb, Inc. All varieties in the Summer Sweet® series are also part of our Professional Seeds Series.

**Jupiter PVP**

**Antebellum X10R® F1**

**King Arthur F1**

Variety	Days	Shape and Color	Disease	Description
3345 Antebellum X10R® F1	74		Resistant TMV; Tolerant BLS 1-10, TSWV	Southeast trials marked this as a must-have for the region. Mostly 4-lobed. Capable of jumbo sizes up to 4.5"-5". No anthocyanin purpling. Dense foliage provides good protection. 22-30" plants. Fresh Mkt, Shipping.
3373 Bayonet F1	70 green, 80 red		Resistant BLS 1-5,7,8,9; TMV, Tolerant TSWV 0	Highly commercial bell with unique traits important to growers. 3.5 x 3.5" fruit sets continuously on 2 ft plants. Open plant structure makes harvest easier. Tight leaf canopy provides good sun cover for fruit. Good tolerance against cold and drought stress. Fresh mkt, Shipping.
<b>3377U</b> California Wonder #300 TMR	74		Resistant TMV	OP. Selected mosaic resistant strain. Avg size 4" x 4". Mostly 4-lobed. Compact 24-28" plants. Fresh Mkt, Commercial.
<b>3394U</b> Chablis F1	60		Resistant BLS, TMV	4" x 3" mostly 4-lobed fruit matures from cream to orange to red, growing ever sweeter. Can be harvested at any of these stages for color pepper. Thick walled. Compact 12" plants. For bedding or pot sales.
<b>3410U</b> Encore F1	50-60		Resistant PMV, PVY 0-2	High % extra-large grade, blocky peppers 5.75" X 5.75" in size. Fruit are firm and smooth. Plant is medium ht, 24" tall and provides very strong foliage cover to protect fruit from sun-scaud. Fresh mkt, shipping, fancy extra-large stuffing.
<b>3425U</b> Golden California Wonder	70			Yellow version of the famous California Wonder 300. Large 5" x 4" thick walled fruit matures light green to golden yellow. Long harvest season.
<b>3467U</b> Jupiter PVP	72			OP. Very large, extremely blocky fruit. 4" x 4". Widely adapted. Fresh Mkt, Shipping, Garden.
<b>3468U</b> Keystone Resistant Giant #3	72-80		Tolerant TMV	Large fruited Florida Giant type, capable of producing mostly 4-lobed 4.5 x 3 3/4" fruits. Deep green, thick walled. 30" tall plants with pendant habit and thick stems. Capable of continuous harvest.
3472 King Arthur F1	72		Tolerant BLS 2, PVY, TEV, TMV	Large blocky 4.5" x 4.5", 3-4 lobed fruit. Upright habit. Widely adapted. Fresh Mkt, Commercial.

## More Sweet Bell Peppers

Variety	Days	Shape and Color	Disease	Description
3475 Majestic Red F1	75 green, 85 red		Resistant BLS 0-3, 5,7-8; TMV; Tolerant Pc	Fruit can reach 5.5" x 3.5" and avg 4-6 oz, thick walled and meaty. Intense candy apple red at maturity. 2-3 ft. plants provide dense leaf cover for good protection. Widely adapted.
<b>3489U</b> Muscato F1	75		Tolerant TMV	5 x 4", 4-lobed, dark green to orange. Heavy yields of blocky, very thick wall, pendant fruits are produced on vigorous 24" plants with thick stems. Continual bearing, widely adapted.
3492 Ninja S10 F1	75 green, 89 red		Resistant TMV, Tolerant BLS 0-10	Well suited to production where BLS is a concern. High yield potential with mostly 4.5" x 4" diam fruit reported in trial. Thick walls have been measured at .25". Strong plants, good setting ability, full leaf canopy. Very good for Eastern US.
<b>3497U</b> Orange Sun	70 green, 80 orange			Excellent flavor, thick flesh, 3-4 lobed. Avg size is 4-5".
3499 Playmaker X10R® F1	56 green, 70 red		Resistant TMV, Tolerant BLS 0-10, Pc	Northeast trials gave especially high marks for high yield potential, also a standout in NC Mountain areas. Compact 20-24" plants bear concentrated set of heavy, smooth, blocky 8.5-oz fruit, 4" wide x 4.5". Anthocyaninless, so fruit keeps nice, clear color to market. Can be a game-changer for all growers where BLS is present. Worth trying throughout Eastern US.
3500 PS 09941819 X5R® F1	74		Resistant BLS 1-5,7,9; TMV 0, Tolerant Phytophthora	3-4 lobed blocky 5" x 4.5" jumbo bell with super disease pkg. Fruit sets continuously on 22-28" plants. Anthocyaninless gene, so fruit keeps clean color. No dark streaks even under stress.
<b>3502U</b> Purple Beauty	65 green, 70 purple, 80 red			Thick walled, meaty 3-4 lobed fruit with crispy, tender texture. Heavy leaf coverage protects from sun scald.
3524 Samurai S10	70 green, 84 red		Resistant TMV, Tolerant BLS 0-10	Well suited to production where BLS is a concern. High yield potential with mostly 4" x 3.5" fruit in trial. Thick walls measured at .25". Strong plants, good setting ability, good leaf canopy. Very good for Eastern US. Fresh Mkt, Shipping
3572 Summer Sweet® 8610 F1	73 green, 83 yellow		Tolerant BLS 1-3, TMV, PVY	Top quality, deep blocky 4.5" x 5" fruit. Solid, thick-walled, mostly 4-lobed. Very sweet flesh at yellow maturity. Good leaf canopy protection.

Poblano

## Hot Peppers

Sahuaro F1

Arapaho F1

Variety	Days	Shape and Color	Disease	Description
<b>Ancho/Poblano</b>				
<b>3487U</b> Mulato Isleno	85-95			Thick, tasty flesh. Full ripe "ancho" stage used for drying. 6" x 3" heart shaped with mild heat. 1000-3000 Scovilles. Fresh Mkt, Rellenos, Drying, Salsa, Processing.
<b>3506U</b> Poblano	73			Dinstinctive large heart shaped fruit are peeled and stuffed for chiles rellenos in green stage, and as chief ingredient of Poblano chili powder at reddish brown dried stage. 18-24" plants spread about 16". Fresh mkt, stuffing, Drying, Specialty.
3632 Trident F1	80-85		Resistant TMV 0	High yield potential. Extra large, tapering 2-lobed 6.5 x 3.5" fruit, avg 5 oz. Shiny, dark green to red. Mild heat (250-1500 Scovilles). Widely adapted. Good dry weight. Fresh mkt, Drying, Stuffing, Restaurant.
<b>Cayenne</b>				
3397 Arapaho F1	60-65			Long, narrow fruit colors quickly to vibrant red with medium pungency. Compact but robust plant habit. Fresh Mkt, Processing, Shipping.
<b>3393U</b> Cayennetta F1	69			Prolific 3-4" mildly spicy fruit. Compact, bushy plant 24" tall x 20" wide. Good in container. Requires no staking. Hot and cool weather tolerant. Fresh Mkt, Bedding, Container, Ornamental edible.
3392 Cayenne Large Red	74			6-7" x 1.25" fruits with medium, thick hot flesh. Plants avg 24". Fresh mkt. Drying, Processing, Salsa.
<b>Chili</b>				
<b>3342U</b> Anaheim Chili	77			Pungent 7-8" x 1.5" fruit with medium thick flesh. Plants 28-34". Fresh Mkt. Drying, Processing.
3415 Flaming Flare F1	55 green, 65 red		Resistant Tobamovirus P 0	Fresno chili type. Brilliant red triangular fruit, 4" x 1", broad at base, tapering to a pointed tip. 500-1000 Scovilles. Vigorous plant, 2 ft tall x 2 ft wide.
3419 & <b>3419U</b> Garden Salsa F1	73-75		Resistant PMMV, PVY 0-1	8.5 x 1" mildly pungent fruit, 2500-3500 Scovilles. 28" tall, holds fruit well above ground. Trials noted excellent yield potential. Fresh Mkt, Rings, Salsa.
<b>3424U</b> Giant Ristra F1	80		Tolerant TMV	Very large chili, 6-7" avg length, 4 oz avg weight. Size & long horn shape like Marconi, but very hot at 30,000 Scovilles. Bushy deep green plants, 24" tall x 16" wide. Can produce 15-18 fruit per plant. Fresh Mkt, Processing, Bedding. <i>Mountain/Southwest</i> .
3508 Sahuaro F1	68		Resistant PMV	Large chili, up to 9" long with thick walls. Mildly pungent at 500 Scovilles. Strong plants with dense canopy. Good fruit protection. Trials noted high yield potential. Fresh Mkt.

Variety	Days	Shape and Color	Disease	Description
<b>Habanero</b>				
3398 Chicken Itza F1	115-120		Resistant Tobamovirus	Classic crinkled fruit 2.5" x 1.25", firm walled and medium large. Hybrid habanero with more robust plant than OP. 15,000-18,000 Scoville units.
<b>3427U</b> Habanero	90			Wrinkled, thin walled 1" x 2" fruit, tapering to a point. Extremely pungent at up to 200,000 Scoville units. Fresh Mkt, Processing.
3512 Roulette F1	85			HEATLESS Habanero. All the flavor with no heat. Tests nationwide noted no off-types. Handsome erect 3.5 ft plant bears 100 or more 1 oz (3" x 1.5") fruit over long harvest season.
<b>Hot Banana</b>				
3436 Hot Sunset X3R® F1	55		Resistant BLS 0-3,7,8; Tolerant TSWV	Extra large fruit at 7.5" x 1.5". Thick walled with avg weight 1.6 oz. 600-800 Scovilles. Vigorous 2 ft plants can yield an avg of 15-20 fruit. <i>Great Lakes, Heartland, Southeast.</i>
<b>Jalapeño</b>				
3409 Emerald Fire X3R® F1	55 green, 65 red		Resistant BLS 0-3,7-8	Mega 1 oz jalapeño, 4" x 1.5", with thick walls and bullet shape. Very little checking. Good heat even at green stage. 1300-2000 Scovilles. Vigorous 2 ft x 2 ft plants.
3412 Felicity F1				Heatless Jalapeño. Lots of flavor, no heat. Continuous fruit set for potentially high yields of thick walled large fruits. 18-24" plant is semi upright & medium strong.
<b>3450U</b> Jalafuego F1	70		Resistant BLS 1-3, PMV, PVY 1-2	High percentage of long jumbos. Gives good length even under stress. Large, smooth, thick-walled fruit avg 3" x 1". Quite hot (4000-6000 Scovilles). Vigorous plant with broad disease pkg enhances potential for high yield. Fresh Mkt. Shipping, Poppers, Processing.
<b>3462U</b> Jalepeño M	72			Bright red fruits 3.5" x 1.5" with thick, pungent flesh. Upright plants 26"-36". Fresh Mkt. Processing.
<b>3496U</b> Paquime F1	50-70		Resistant PMV 0, Tolerant N	Very large thick-walled. Fruit 4.75" L x 1.5" W at shoulder. Vigorous 24" plants set fruit high in plant, provide strong sun cover. Fresh mkt, Shipping, Poppers.

**Thai Hot Culinary**

Variety	Days	Shape and Color	Disease	Description
<b>More Jalapeño</b>				
3534 Spicy Slice F1	75-80 green, 85-90 red		Resistant BLS 1-3, 7-8 Tolerant TEV	Extra long pepper, 4.5" x .8". Excellent slicer with high L/D ratio, blunt cylindrical shape and firm texture. Stays smooth and clean well into maturity. Slow to check. Medium pungency, good flavor. Widely adapted. Vigorous prolific plants provide good cover.
3622U Tam Jalapeño #1	85			For those who enjoy the flavor of jalapeños with less heat. Fruit is 3" x 1" and plant is 24" tall. Perfect for pickling or salsa.
<b>Oriental Chili</b>				
3625U Thai Hot Culinary	65-90			Pointy red-hot 2-3" peppers in upright clusters. Great for cooking. Branching plant is 16". Sold as plants, bunches or dried fruit. Fresh Mkt, Bunches, Bedding.
<b>Serrano</b>				
3404 Cocula F1	75 green, 80 red		Resistant PVY 0, Tolerant Pc	Concentrated set of cylindrical fruit, slightly tapered at tip. Medium thick walls. Mildly pungent at 800-1000 Scovilles. Fresh Mkt, Processing.
3416 Flaming Jade X3R® F1	75		Resistant BLS 1-3, 7-8, N, Tobamovirus	Very hot cylindrical 4" x 1" fruit average 0.75 oz. Vigorous plants 2 ft tall x 2 ft wide. High yield noted in nationwide AAS trials. Avg 60-65 fruit per plant. Fresh Mkt, Specialty, Garden Ctr, Processing. <i>Heartland/Great Lakes.</i>
3495 Pathfinder F1	60-75		Resistant BLS 0-3, 7, 8	Abundant, shiny deep green serranos, 4.5" to 5" long x 0.25" diam, borne on strong, compact 18-24" plants. Well adapted to both hot and cool weather. Capable of big crops in less space. Dense foliar canopy offers excellent protection against sun scald and helps the fruit stay smooth and shiny green over long season. Fresh mkt, shipping, processing.

## Specialty Hot Peppers

Variety	Days	Shape and Color	Disease	Description
<b>3380U</b> Buffy F1	70			Capsicum frutescens. Deep green to red. Beautiful, fiery pepper with delicious aromatic undertones scored high in nationwide trials. Fruit are hot with great flavor, very thick walls. Robust plants 18-25" tall x 25" wide bore 250-280 fruit per plant over the season. Plant is compact, sturdy, provides good cover and tolerates hot and humid weather. Fruit are 1.5" long and 0.6" across. Fresh mkt, shipping, processing.
<b>3371U</b> Cajun Belle	61			Sweet bell shape, 3" x 2" with 3-4 lobes. Great flavor combo of sweet and heat loaded with Vitamin C. Compact plants are 2 ft tall x 2 ft wide. Scoville rating 200-300. Good in patio container. No disease problems noted during AAS trials.
<b>3401U</b> Cowhorn	75			Distinctive curved pods 6-10" long, resemble cows' horns. Vigorous dark green 3 ft plants bear pendant fruit in abundance. Fresh Mkt, Sauces.
3420 Ghost (Naga Jolokia)	100-120			Capsicum frutescens. Said to be the world's hottest pepper. Originates in Assam region of India, where the sources were kept secret for many years. 2" teardrop fruits start lime green and ripen to scarlet orange. Grow in warm conditions for maximum pungency. It would be a good idea to wear disposable gloves when handling seed or fruits, and to avoid contact with eyes, as for any hot pepper. Note: Also sold as Bhut Jolokia.
3434 Holy Mole F1	85 green, 99 chocolate		Resistant TMV	Pasilla type. Tapered fruits 7-9" x 1.5" mature from green to dark chocolate. Plant grows up to 3 ft tall x 30" wide. Distinct flavor, only mid-hot at 700 Scovilles but very full of other sweet and meaty aromas. Pasilla is preferred typed for Mole recipes. Fresh mkt, Dried, Sauces.
3437 Hungarian Yellow Wax Hot	65			6" long x 2" wide fruits are tapered with very thick, hot flesh. Fresh Mkt, Processing.
3474 Mad Hatter F1	68 green, 88 red			Exotic shape, edible and ornamental. Trials reported excellent vigor, earliness, high yields, large 2" x 3" size and lovely sweet, citrusy taste with tinge of heat near seeds. Showy & novel three-sided shape. Robust plants 24" container, 36" garden. Ethnic cuisine.
3477 Mariachi F1	66		Resistant Tobamovirus	Caloro chili type. Conical 4" x 2" bluntly tapered fruit. Abundant set over long season. 500-600 Scovilles. Plants 18-24". Fresh Mkt, Shipping, Roadside.
<b>3507U</b> Red Cherry Large Hot	77			Hot cherry type. 1.5-2" fruits. Strong upright plants to 20". Fresh Mkt, Pickling, Processing.
<b>3617U</b> Tabasco	80			OP. Capsicum frutescens. Very hot, light yellow, green to red. Tall plant, fruit grows almost erect from the branches. Special type of famous sauce, strong pungency laid over classy flavor.
3638 Witch Stick				Extremely early. Unique tricolor pepper, bands of green, gold, and red all on the same pencil-thin 6" twisted-spiral fruit. Medium mildly hot.

## PUMPKINS

(Cucurbita Pepo)

About 100-200 sd/oz. large seeded; approx. 200-300 sd/ oz. small seeded. Hybrid packets contain 15 seeds; OP packets produce 10 hills; 1/2 oz sows 100' of row. Sow 1lb/acre. Sow 1" deep, about 3 ft. apart in rows 7.5 ft. apart. Germ in about 7 days. **Days to maturity are from sowing. For Pumpkins designed to reach 30 lbs or more: to maximize fruit weight, provide wider spacing. Up to 75 sq. ft. per plant for show size pumpkins.**

**Big Moose**

**New Moon F1**

**Captain Jack F1**

GIANTS - Display or Competition	Days	Weight	Shape	Color	Disease	Description
<b>3735U</b> Big Max	120	100	Round	Pink Orange		OP. Prize winning up to 100 lb. fruit. Distinctive pinkish-orange rind. Bright yellow-orange flesh. Good cooking quality. Fresh Mkt, Harvest Fairs, U-Pick.
3738 Big Moose	120	50-125	Round	Red Orange		OP. Giant Jack-o-Lantern with yield almost like a hybrid. Fruit size ranges 50-125 lbs. Uniform size & shape. Jack-O'-Lantern, Cornucopia, Harvest Fairs.
<b>3766U</b> Dill's Atlantic Giant	120	100-600	Round	Classic Orange		OP. Capable of producing giant show pumpkins in the range of 100-600 lbs. Slightly rough, nicely ribbed rind. Large vine.
LARGE - Jack-O'-Lanterns						
3751 Captain Jack F1	100-110	30+	Howden	Deep Orange	 Tolerant	Thick flesh & flat bottom enable fruit to stand on its own & not collapse under its own weight. Medium deep ribbing. Thick embedded handle. Vigorous vines support several fruits.
3763 Early Giant F1	95	25-30	Howden	Deep Orange	 Tolerant	Early, mostly tall face shaped fruit. Imposing brow and wide flat base make it a premium carving variety. Deeply ribbed. Earliness means more chances to make the sowing window for Halloween mkts. Full, strong vine supports growth of sizeable fruit.
3767 Early King F1	90	25-30	Tall Round	Deep Orange	 Tolerant	Very early with PM trait. Round to slightly tall fruit are great for carving. Earliness provides more chances to make the sowing window for Halloween markets. Full heavy vine supports large fruit development. Smooth ribbed orange globes with broad stable base and thick dark carrying handle.
3794 Howden Biggie PVP	115	40	Howden	Deep Orange		OP. Capable of extra large classic shaped fruit. Raised from elite stock seed Durable scratch resistant skin. Firm thick flesh. Sturdy handles.
3813 Large Marge F1	105	30-40	Round	Deep Orange		Very large round pumpkin. Capable of multiple fruit set per plant while maintaining large size. Avg size is 30-40 lb and 13"x 13" diam. Exterior is deep orange, ribbed and wrinkled. Very strong & large dark green embedded handle, about 5" long, supports fruit size well. Vigorous indeterminate vines. <b>Not available until June 2022.</b>
3837 New Moon F1	80-90	25-35	Round	White		White flesh & rind is a breakthrough in appearance in the novelty pumpkin. Uniform 16" diameter. Firm flesh holds for weeks but fades to ivory over time.

LARGE - Jack-O'-Lanterns	Days	Weight	Shape	Color	Disease	Description
<b>3749 Camaro PMR F1</b>	110	20-23	Round	Classic Orange	Resistant 	Trials from CO, IN, CA & NY report higher level of PM resistance than found in previous genetics. Fruit have long firmly attached handles, thick flesh, slight to medium ribbing, and classic orange rind. Restricted vines show high yield potential of tonnage per acre.
<b>3755U Connecticut Field</b>	115	15-20	Round	Classic Round		OP. Selected strain produces large, orange fruits with attractive appearance.
<b>3770 Early Prince F1</b>	90	15	Round	Deep Orange		A workhorse which allows for flexibility in sow-dates up to mid-July when targeting October market window. Excellent growing reported in Mid-Atlantic, Northern, West Coast and Canadian markets.
<b>3795U Howden</b>	115	20-25	Howden	Deep Orange	Tolerant BR	OP. Classic Halloween pumpkin shape, deeply ribbed orange globes with tall, imposing brow, broad stable base and substantial green carrying handle. Good keeper. Fresh Mkt, Roadside, Halloween, Shipping.
<b>3798 Hulk F1</b> 	100	30	Howden	Deep Orange		Extra large 30 lb barrel or Howden shaped fruit, 16-18" tall x 12-14" wide. Deep burnt orange color with pronounced ribs and husky, 5" deep green embedded handle. Vigorous vines with broad leaves set multiple fruits per plant and tend to grow them all to reach large size. Good potential for high yield of extra-large fruit. Jack-O'-Lantern.
<b>3811 Jason F1</b>	100	20-24	Howden	Deep Orange	Tolerant 	Premium quality Jack-O'-Lantern. Slightly elongated, Howden style face shape. 20-24 lb average weight. Vine is medium sized and quite healthy. Dark orange rind, orange flesh. Superb long strongly attached handle. Potential for high yield, 1-2 fruits per plant, sometimes 3 under favorable conditions. This fits the slot of the old ProGold 510.
<b>3832 Mr. Wrinkles F1</b>	110	20-30	Tall Round	Deep Orange		Large barrel shaped fruit. Extremely deep orange, deeply wrinkled and ribbed. Rugged 5" deep green embedded handle. Thick flesh, very strong vine, exceptional yield potential.
<b>3834 Mustang PMR F1</b> 	100	22	Round	Classic Orange	Resistant 	Rich orange rind with thick flesh. Sutures are distinct, but smooth and refined. Long dark green sturdy handles for easy pickup. Very uniform. Superior disease rating and healthy reduced vine plant type give excellent chance for high yield.
<b>3896 Super Moon F1</b> 	90	25-30	Tall Round	White	Tolerant SRR, 	Great white pumpkin. Can weigh up to 50 lbs with rich culture. Vine spreads 4-5'. Trials noted average 2-4 fruit per plant. Strong disease package results in hardy vine and high yield potential. Pale yellow flesh good for eating. AAS Regional, Great Lakes & SE. Decorating, Jack-O'-Lantern, Culinary.
<b>3899 Ugly Mugly F1</b>	100	15-20	Flat Round	Light Orange		So ugly you have to love it. Skin is dimpled, light orange, flecked with pale splotches. Ribs are wide spaced & deeply creased. Large vigorous, trailing vines capable of high yield and high % of large heavy fruit. Globe shape with slightly flattened ends sits well. Very long light green handle with white stripes.

LARGE - Jack-O'-Lanterns	Days	Weight	Shape	Color	Disease	Description
<b>3750U</b> Casper 	90	10-15	Round	White		OP. Improved to minimize bluing under stress, which affects some white pumpkins. Thick orange interior. Distinct tan, corky handles. Good for eating. Fresh Mkt.
<b>3758</b> Corvette PMR F1 	110	11-14	Round	Classic Orange	Resistant 	Slightly ribbed with very strong handle attachment. Semi-bush habit and strong disease package improve chances for plenty of pumpkins.
<b>3759</b> Cougar PMR PVP F1	80	10-12	Round	Classic Orange	Resistant 	Earliest of the PMR series. Nice ribbing and strong, dark green handles. Vigorous large vines. Earliness allows for later sowing toward the Halloween mkt window and/or better insurance against bad weather at the end of season.
<b>3764U</b> Dark Night F1	70-100	8-10	Round	Black to Orange		Wonderful new novelty Jack-O'-Lantern. Rind develops deep ebony green, near black. Interior flesh is bright orange and provides striking contrast whether hollowed and carved or surface-carved. Color gradually speckles and eventually turns all orange. Can be sold at dark, speckled, orange stages. Handle stays black. Excellent storage capabilities, very tough rind. Semi-bush habit. Resistance in test.
<b>3790</b> Hobbit PMR F1	93	10-12	Round	Deep Orange	Tolerant CMV 	Early maturity enhances flexibility at planting and super harvest window. Smooth skin. Semi-vine habit. First multiple disease package in medium size pumpkin.
<b>3815</b> Lumina	110	10-15	Variable	White		OP. Size & shape vary from globe to flat globe. Harvest slightly immature for better white color. Flesh is bright orange. Ideal for painting, carving, decorating. Stress will cause blue tinge to the skin. Fresh Mkt.

LARGE - Jack-O'-Lanterns	Days	Weight	Shape	Color	Disease	Description
3720 Autumn Gold F1 	90	7-10	Round	Classic Orange		Handsome fruits show attractive orange rind color when small. Vigorous vines bear 3-5 fruits each, averaging 7-10 lbs. Firm, meaty flesh for carving, cooking. Fresh Mkt, U-Pick.
3761 Darling F1	90	6-8	Tall Round	Deep Orange	Medium Resistant 	Tall face for its size makes it unique in its class. Uniform size & color. Restricted vine length allows for closer spacing. Jack-O'-Lantern, Cornucopia, Pie.
3762 Early Abundance F1	90	4-6	Round	Deep Orange	Medium Resistant 	Small, early pumpkin with uniform size & color. nice handle in proportion to fruit size. Large, vigorous vine. Jack-O'-Lantern, Cornucopia, Pie.
3788 & 3788U Hijinks F1 	100	7-9	Round	Classic Orange	Tolerant 	Consistent, square shouldered shape great for carving. Medium ribbing. Dark green durable handles are good for carrying. Vigorous vines up to 15'.
3835 Neon F1	65	7-8	Round	Classic Orange		Earliest Jack-O'-Lantern. Handle is emerald black. Semi-bush plant, can achieve high density and average two grade A's per plant. Fruit maturity can occur well before disease damage, tending to avoid BLS, fruit rot or weak stem.

CINDERELLAS	Days	Weight	Shape	Color	Disease	Description
3754 Cinderella's Carriage F1 	100	23-33	Flat Round	Red Orange	Tolerant 	First hybrid Cinderella pumpkin. Magical, luminous reddish-orange with higher yield than OP varieties, up to 5-7 per plant. Tested well across many areas of the US. Sweet, nutty, yellow flesh. Cornucopia, Jack-O'-Lantern, Culinary. Southeast, Great Lakes, Mountain/Southwest.
3780U Halloween in Paris	110	15-20	Flat Round	Yellow		OP. Bright peach yellow tinted version of Vif d'Etampes type. Huge flattened fruits with sweet, light yellow flesh, a popular ingredient in Parisian soups. Very bright & showy for novelty sales.
3880U Rouge Vif d'Etampes		15-20	Flat Round	Red Orange		OP. Improved early strain of French heirloom type. Extremely deep ribs. Golden interior. Long keeper.

DECORATIVE & CORNUCOPIA	Days	Weight	Shape	Color	Disease	Description
<b>3727U</b> Batwing	90	1.5-2.5	Round	Black on Orange		OP. Unique pattern. Multicolored orange, black and bicolored. The black sectors recede with maturity, creating a scalloped black-on-orange pattern like bat wings on the moon. Turns solid orange at full maturity. For strongest color show, plant late & harvest young.
<b>3747</b> Bumpkin F1	85	4-8oz.	Flat Round	Classic Orange	Tolerant 	Mini pumpkin with PM tolerance. Deeply ribbed. Cute & very productive. Small seeded, about 300-400 per oz. Semi-bush habit. Cornucopia, Decoration.
<b>3753</b> Casperita F1	77	8oz.-1lb.	Round	White	Tolerant WMV, 	Beautiful for cornucopia as mini white pumpkin. Deeply ribbed. Edible sweet golden flesh comparable to acorn squash. Semi bush habit. Mini-White, Face Painting, Cornucopia, Table Squash, Fresh Produce, Shipping.
<b>3777U</b> Gooligan F1	95	4oz.	Flat Round	White		Hybrid Baby Boo type. High percentage of white, deeply ribbed fruit with great eating quality. Vine covers well against sunburn. Grow with Hooligan & Jack Be Little for fall ornamental mixture. Cornucopia, Ornamental.
<b>3782</b> Harvest Prince F1	85	1 lb.	Round	Deep Orange	Tolerant 	Small round sugar pie pumpkin. Excellent for cooking, crafts or carving.
<b>3797U</b> Hooligan F1	95	4oz.	Flat Round	Bicolored Orange	Tolerant 	Unique bicolored orange and white mottled. Vigorous vine covers well against sunburn. Novelty for fall ornamental mixture.
<b>3800U</b> Jack Be Little	95	3-4oz.	Flat Round	Classic Orange		OP. Popular mini pumpkin much in demand. Excellent keeper after curing. Prolific plants, 8-10 fruit per large vine. Fresh Mkt, Ornamental, U-Pick.
<b>3897</b> Toad F1	85	1.5-2.5	Round, Warty	Classic Orange		Aptly named, hand-sized pumpkin covered in warts and bumps. Semi-hard shell. Embedded handle for easy carrying. Bush habit allows close spacing and works well in gardens. Warts may disappear in stressed growing condition. Fresh Mkt, Cornucopia, Roadside, Shipping, Home Garden.
<b>3900U</b> Wee-B-Little 	85	8oz.	Flat Round	Deep Orange		OP. A true pumpkin but scaled down to miniature size. Matures from yellow to deep orange. Slightly ribbed. Small seeded. Fresh mkt, U-Pick.

**Crunchy Delight F1**

## Radish *(Raphanus sativus)*

About 2,500 sd/oz. Pkt plants 30' of row; 1 oz sows 100'. Direct sow 10-20 lbs/acre. Sow sd 1/4-1/2" deep, 1/2-1" apart in rows 8-18" apart. Germ in about 6 days. **Days to maturity are from sowing.**

### Salad Types

**3915 Altabelle** 26 days. Bright red, medium large globe shaped roots. Very good color retention. Dark green, medium tall tops are highly tolerant to leaf diseases for fresh mkt pack. Resistant FY. Tolerant DM, RZ. Fresh Mkt, Cello Pack, Bunching.

**3930 & 3930U Cherry Belle** 26 Days. Well known variety produces small, bright cherry red roots for salad use. Short tops even in warm weather; fine for muck soil. Packing, Bunching, Forcing, Fresh Mkt.

**3925 Cherriette F1** 23 Days. Cherry Belle type. Bright cherry-red, crisp flesh, pith free, globe shaped. Bred for increased uniformity and marketable yields. When growing blended color radish, avoid thinning, as this will tend to remove some colors disproportionately.

**3934U Crayon Colors Mix** 25-28 Days. Vivid colored mix of yellow, pink, red and purple. Tops are 4-6" tall. Bright white interior flesh.

**3937 Crunchy Delight F1** Large round scarlet red summer radish with clean, bright white interior. Roots and plants very uniform. Upright medium size plant. Roots maintain crispy texture well into large size range. Fresh Mkt., Bunch, Cello, Slicing.

**3935 Crunchy Royale F1** 24 Days. Deep red, round, extremely uniform root formation with high pack-out rate, high quality interior with excellent crispness and bright white color. Quality stands up well to 4" size. Pith tolerant. Bunching, Cello, Fresh Mkt.

**3950 Hailstone** 25 Days. Pure white skin and pure white flesh. Good holding ability, remaining crisp and firm a long time. Medium size tops are larger than most early globe types and dark green. Good for either spring/fall sowings. Bunching, Forcing, Fresh Mkt.

**3969U Watermelon** 29 Days. An unusual oriental heirloom with daikon-like flesh but round shape. Large 3-4" diam round roots with white skin and green shoulders and red to pink interior. Crisp, mild and sweet. Robust top foliage makes harvest easy. Best color and mildest flavor comes from early harvest of smaller roots. Fresh Mkt, Restaurant.

**3970U White Icicle** 27 Days. White, elongated roots to 5". Does well on muck/upland soils. Short tops, even on fertile soils. Bunching, Forcing.

### Daikon Types

**3920 April Cross F1** 60 Days. Spring planted Minowase type. Pure white roots to 18" x 2" are delightfully pungent, slow to become pithy. Slow to bolt.

**3955 & 3955U Minowase Summer Cross #3 F1** 50 Days. For late spring/summer planting. Large, uniform pure white roots that are up to 16" x 2.5". Very mild, sweet and juicy. Excellent raw, in salads or Asian dishes. Heat tolerant. Resistant FW.

**3962 New White Spring F1** 60 Days. Korean daikon type. Vigorous upright tops with slow bolting characteristic. Suitable for spring and fall harvests. Heavy blunt pure white roots, 10-12", up to 1.5 lb. Tolerant CR. **Note: Needs 50°F soil temp. for good spring germ.**

**3961 Relish Cross F1** 60 days. Spring or fall sowing. Smooth white root with distinct green neck. Crisp texture and mild flavor. May be harvested at 3-4" from dense sowings or roots up to 2 lbs each at wider spacing. Resists bolting and pithiness. Fresh Mkt. Shipping. Pickling. Fresh Mkt, Sipping, Pickling.

**3965 Tae Baek F1** 70 Days. Best suited to late summer planting. Short, blunt white roots tinged green weigh about 2 lbs each; very firm and uniform. Highly tolerant CMV, DM, and bacterial soft rot, Stores well, to 4-5 months. Kimchee, Fresh Mkt.

## Spinach (Spinacia oleracea)

Approx. 2,800 seeds/oz. Pkt plants 25-30' of row; 1 oz sows 100'. Direct sow 10-15 lbs/acre. Sow seeds 1/2-1" deep, 2-6" apart in rows 12-36" apart. Germs in about 8 days. **Days to maturity are from sowing.**

**3999U Bloomsdale** 30-60 Days. Leaves are heavily savoyed, thick, dark glossy green, crumpled, and twisted. Fast growing with very good yields for OP. Slow bolting, high yielding, resistant to heat and cold. Good for fall or spring markets. Fresh Mkt, Long Distance Shipping, Processing.

**4000 Countryside F1** 23-27 days baby leaf, 43-47 days mature leaf. Very uniform with thick, smooth, dark green oval leaves. Good bolting tolerance for mature-leaf crop. Also good holding ability with moderate growth habit for baby-leaf production. Very broad resistance to DM races. Resistant DM 1-12, 14-16. Fresh mkt.

**4005U Imperial Star F1** 30-37 days. Fast growing Asian type with smooth, spade shaped foliage. Very dark green leaf & upright habit and extra sturdy petioles, an excellent combination for bunching. Quite cold tolerant. Recommended planting window is late fall or early winter. More resistant to bolting than other Asian types. Broad resistance to DM races. Resistant DM 1-7, 9, 11, 13-16. Fresh mkt, Bunching.

**4006 Plymouth F1** 40-45 days. Uniform, upright, full leaf foliage is spade-shaped, thick and slightly savoyed, medium dark green with erect stems. Quick growing with extra broad disease package to promote high yield potential. Resistant DM 1-11, 13, 15, 16. Fresh mkt, Processing.

**4007 Reflect F1** 38 Days. Tremendous broad DM package. Deep green, round semi-savoy leaves for all seasons, fall summer and spring cropping. Suitable for whole fresh bunching, baby or clipped. Strong disease package promotes good yield potential. Improved replacement for Regiment. Resistant DM 1-11, 13, 15.

**4011 Seaside F1** 25-30 Days Baby Leaf, 35-40 Days full leaf. Quick cropping, with great uniformity. Smooth, thick, very dark green spade-shaped leaves with good retention of small to moderate leaf size and slow bolting; great traits for baby-leaf production. Broad DM package and upright habit provide for wide adaptability to both full-leaf and baby-leaf mkts, fresh-local growers as well as shippers. Resistant DM 1-11, 15-16. Tolerant DM 12, 14, Baby leaf. Bunch, clip, shipping, local mkt.

**4015 Space F1** 40 Days. Very upright leaves are dark green, smooth and round. Slow bolting monocious type good for long season of sowings from spring through fall. Resistant DM 1,2,3. Freezing, Fresh Mkt.

### Spinach Disease Codes

DM Downy Mildew

**Elan F1**

## Strawberry

(Fragaria x ananassa)

Crop time 3-5 months from sowing. Sow in winter for setting out after last freeze in spring. Germ at 72° F, approx. 10-14 days. Give plenty of light after germ. Detailed culture schedule available on request.

**4325 Elan F1** 120-150 days from sowing. 8-12" trailing; Day-neutral. Extra sweet fruit June to October. Shiny bright red berries, with classic bi-conical shape of commercial types. White flowers. Tested 30+% more Vitamin C than others. Runners fill baskets, planters and beds. Upick, Fresh Mkt, Bedding Sales.

## Swiss Chard

(Beta vulgaris, Cicla Group)

Approx. 1,600 sd/oz. Also called Leaf Beet. Pkt plants 25' of row; 1/2 oz sows 100'. Direct sow 5 lbs/acre. Sow sd 1/2" deep, 12-15" apart in rows 24-36" apart. Open Pollinated. Germs in about 8 days.

**4329U Bright Lights** 65 Days. This 20" plant has moderated, savoyed leaves. Veins are light green. Petiole colors range from yellow & gold to pink and crimson.

**4333U Eldorado** 60-65 days (30 days for baby salad). OP High class non-staining golden yellow stems. Dark green savoyed glossy foilage with highly contrasting golden veins. Harvest young for salad mix or full size for bunching. Attractive for mixed salad markets. Fresh Mkt.

**4334U Fordhook Giant** 60 Days. Vigorous variety provides heavy yields. Thick, fleshy, savoyed leaves with wide, pearly white stalks up to 2.5" across.

**Plymouth F1**

**Bloomsdale**

**Reflect F1**

**4335U Peppermint** 58-63 Days. Striking appearance. Stalks and ribs are bright with vibrant deep cherry-rose stripes. Glossy intense green leaves are deeply savoyed and borne well above ground. Highly resistant to bolting, adapted to multiple crop seasons. Fresh Mkt, Bunching, Specialty & Restaurant, Ornamental-edible Containers.

**4339 Rhubarb** 60 Days. Edible ornamental variety. Thick, savoyed leaves are reddish green; stalks are brilliant crimson, lending a likeness to rhubarb. Good flavor. Attractive in vegetable or flower plantings.

## Summer Squash

(Cucurbita Pepo)

Approx. 120-400 sd/oz. Packet contains 25 sd; ½ oz sows 100' of row. Direct-sow 2-6 lbs/acre. Sow sd 1-2" deep, 24-48" apart in rows 36-60" apart. Germs in about 7 days. **Days to maturity are from sowing.**

### Crooknecks

**4058 Delta F1** 42 Days. Classy crookneck, butter yellow skin, deep green stem, well proportioned base with thick graceful neck. High quality, very uniform. Trials report good potential for high yields due to disease package and dense bush habit. Resistant PM. Fresh Mkt.

**4079 & 4079U Gentry F1** 43 Days. 6 x 1.5". Well known high quality semi-crookneck, butter yellow with medium bulb and small blossom scar. Comparison trial data report top yields in several trials especially across hot Southeastern states. Open vigorous bush with fewer spines which can help limit damage at harvest. Growers are asking for this variety. Fresh Mkt, Shipping.

**4100 Mabel F1** 40-45 days. Bright yellow crookneck with green stem. Showed high yield in Breeder's trials. Very early & uniform. Open bush habit with low canopy, very few spines and low scratch rate. Rated unusually high in Vitamin A & carotenoids. Tolerant PM.

### Straightnecks

**4070 Enterprise F1** 41 days. Attractive bright yellow straightneck with long tapered fruits. Heavy continuous production over a long season. Vigorous bush with high quality fruits. Tolerant PM. Fresh Mkt, Processing.

Fortune F1

Grandprize F1

**4077 Fortune F1** 39 days. Early productive straight neck type with precocious yellow gene which masks or delays virus symptoms. Attractive, smooth, uniform, bright yellow cylindrical fruit, 6" x 1.25", with sturdy neck which resists breakage. Good ability for continuous setting and high yield have been demonstrated in trials. Strong candidate for early crop of baby squash.

**4095 Grandprize F1** 42 days. Strong enhanced disease pkg for high yield potential and clean fruit. Smooth, bumpy, glossy deep yellow fruit with strong outer walls and great mkt appearance. Fruit size averages 2" diam x 7" L. Erect habit with semi-open branching and reduced spines allows for easy hand harvest and reduced fruit damage. Tolerant PM, PRSV, WMV, ZYMV. Fresh mkt, Shipping.

**4098 & 4089U Lioness F1** 50 days. Main season. Yellow straightneck, 7" x 2" with medium bulb. High quality fruit. Extremely high yield potential due to very strong disease package. Mid-size bush with good vigor and potential for long harvest window. Tolerant PRSV, WMV, ZYMV. Fresh Mkt, Shipping.

**4173 & 4173U Superpik F1** 50 days. Precocious yellow gene masks green streaking caused by certain viruses, delaying its appearance until later in the season than otherwise. (Masking for CMV & WMV 2 have been noted in trial.) Attractive, marketable, bright yellow stem end. Open habit, midsize vigorous bush. High potential for prolific early yield. Fresh Mkt, Shipping. Resistant CMV, WMV 2.

### Green Zucchini

**4035 & 4035U Ambassador F1** 51 Days. Especially good for the South. Uniform, cylindrical fruits are medium dark green. Open plant habit; extremely productive. Fresh

Mkt.

**4068U Emperor's Jade F1** 45 days. Glossy deep green fruit are cylindrical, 7-8" x 2". Flesh tender, firm, creamy white with fine clean flavor. Early quality variety with good yield potential, worth testing for your farm because of PM tolerance trait. Tolerant PM.

**4096 Grinch F1** 45-50 Days. Glossy medium dark green with a dusting of small attractive light green freckles and strong walls. Excellent shipper. Size is 6-7" L x 1.5" diam. Open bush habit with very reduced spines and an extended peduncle allow for easy picking and reduced damage. Vigorous plant and strong disease package allows for long picking season high yield potential. Tolerant CMV, PM, ZYMV. Fresh mkt, Shipping.

**4103 Noche F1** 45 days. Large, cylindrical deeply dark green and glossy fruit with long shelf life. Size 7-8" L x 2.0-2.5" diam. Nearly spineless, with open erect habit for easy harvest & reduced damage. Tolerant WMV, ZYMV. Fresh mkt, Shipping.

**Grinch F1**

**Noche F1**

**4105 Obsidian F1** 45 days. Elongated solid deep green fruit. Open bush habit for easy pick and good air movement. Extensive disease tolerance package encourages high yield. Tolerant PM 2, SLC, ZYMV.

**4119 Paycheck F1** 42 days. 7" x 2" fruit. Widely adapted and highly recommended for Eastern and Midwest regions. Glossy mid-green fruit are smooth, straight, cylindrical, finely speckled. Upright open habit with reduced spines makes for easy, low-damage harvest. Dark green slightly mottled leaves. 4-way disease resistance provides potential for very high yields of top quality fruit through cool or chilly weather. Earlier than Payroll and stronger disease package. Tolerant PM, CMV, WMV, ZYMV. Local Mkt, Regional Shipping, Gdn Plant Sales.

**4120 & 4120U Payroll F1** 47 days. Early. High yield potential due to stronger disease package. Cylindrical medium green fruit with refined flecks. Reaches peak quality harvested at 7" x 1.75". Large, vigorous plants, open habit and reduced spines result in easier harvest and less fruit damage. High yields observed in Eastern green zucchini trials. Tolerant PM, WMV ZYMV. Fresh Local Mkt, Garden Plant Sale, Shipping.

### Summer Novelties

**4065 Eight Ball F1** 45 days. Highly productive zucchini with round medium dark green skin color. Excellent plant vigor and uniform fruit weighing 1-1.5 lbs. Strong plant with open bush habit. Commercial, Fresh Mkt.

**4138U Scallop Benning's Green Tint** 47-56 days. Pale green pie-shaped Patty Pan type, 2.5" deep x 3.5" diam, with deeply scalloped edges. Semi open plant habit, good yield. Best OP sub for Peter Pan when light-green skin is needed. Fresh Mkt.

**4140U Scallop Yellow Bush** 49-54 days. Vigorous bush plants produce nice yields of large, bright yellow 7" fruits. Scalloped shaped fruits have a creamy texture and tasty, distinctive flavor. 'Patty Pan' type.

**4165 Sunburst F1** 50 days. Yellow-skinned 'Patty Pan' type. Attractive, tender, buttery yellow skin, fine flavor and texture. Fresh Mkt.

**4179U Total Eclipse F1** 49 days. 2" deep x 3" diam, prolific dark green 'Patty Pan' type. Pie shaped scalloped fruit. Fine grained, mild sweet white flesh, Compact bush. Attractive deep green shows well with gold and white in baby squash medley. Fresh Mkt, Ornamental.

**4156 Senator F1** 41 days. 7-8". Well known and much requested by growers. Cylindrical and slightly tapered with classic medium green flecked exterior. Vigorous bush with open habit for easy harvest and high yield potential. Fresh Mkt, Shipping.

**4160 Spineless Beauty F1** 43 days. Few or no spines on leaves and stems allow easier harvest. Ambassador type produces medium green, waxy, cylindrical, uniform fruits averaging 7.5-8.5" long. The medium-size, open plants set well. Fresh Mkt.

**4161 & 4161U Spineless Perfection F1** 42 Days. Early. Better yield potential due to stronger disease package. Rich medium green high-gloss cylindrical fruit with refined flecking reach peak quality at 7-8" x 1.5-2". Spineless petioles and large, open plant habit promote easy harvest with less fruit abrasion. Tolerant PM, WMV, ZYMV. Fresh Local Mkt, Regional Shipping, Garden Plant Sales.

**Gold Rush F1**

### Golden Zucchini

**4080 Gold Rush F1** 45 days. Compact, very vigorous plants produce brilliant golden-yellow, smooth zucchini squash. Gourmet quality with sweet, white flesh is best picked at 8-10".

**4087 & 4087U Golden Delight F1** 47 days. Intense golden yellow zucchini, dark green stem. Uniform cylindrical 7" x 1.75" fruit. Trials showed little or no greening under virus pressure due to disease traits, with potentials for high yield and high % grade A. Vigorous upright open bush habit, semi-spineless, for east harvest with minimal damage. Tolerant ZYMV, WMV. Fresh Mkt, Shipping.

**4090 Golden Girl F1** 50-55 days. True golden yellow zucchini. Long cylindrical smooth fruit with consistently high quality. Strong open bush allows easy picking with little scar damage. Good disease rating provides high yield potential. Tolerant PM 2.

**4091 & 4091U Golden Glory F1** 50 days. Intense golden yellow zucchini, dark green stem. Smooth, uniform cylindrical fruit are at top quality when 7-8" x 1.75". Trials showed little or no greening under virus pressure due to disease traits. Enhanced disease package improves potential for high yield, long harvest period and high % grade A. A Vigorous upright open bush habit, semi-spineless, for easy harvest with minimal damage. Tolerant PM, WMV, ZYMV. Fresh Local Mkt, Regional Shipping, Garden Plant Sales.

**4145 & 4145U Sebring F1** 40 days. Semi-spineless, straight, golden 8" fruit. Strong highly productive plant and uniform crop. Bush habit with open plant structure make it easier to see the fruit for a more complete harvest. Commercial shipping, Fresh Mkt. Tolerant PM.

**Table Queen Mammoth**

## Winter Squash

Approx. 120-400 seeds/oz. Hybrid packets contain 25 seeds; OP packets produce 10 hills; 1 oz sows 100' of row. Direct sow 2-6 lbs/acre. Sow seeds 1-2" deep, 36-96" apart in rows 72-96" apart. Seeds germ in about 7 days.

### Acorn Types *(Cucurbita Pepo)*

**4199 Autumn Delight F1** 71 days. Semi-bush vine is compact and bears early maturing crop of large, 6-7", deep green, deeply ribbed fruit with sweet buttery golden interior. High yield potential due to fast maturity combined with the likelihood that a high % of fruit set will achieve full maturity. High Resistant PM.

**4200 Black Bellota F1** 75 days. 2 lb. Deepest dark green with classic acorn shape, including pointed tip. Semi-bush habit. High quality interior, fine grained and sweet with extra long shelf life at 6 to 9 months. Compact vine and good disease ratings enhance the chance for high yield. Tolerant PM 12, Poty Virus Group.

**4220 Carnival F1** 85 days. Acorn squash with a nutty twist. The fruits are flecked and streaked with color, shades of yellow, green gold, each one different. Otherwise performance is uniform and commercially dependable. Midsize fruit are borne near the crown of the semi-bush plant for easy cultivation and harvest. Good for long storage with fine interior quality.

**4232 Cream of the Crop F1** 75 days. Pale creamy white-skinned squash is a novelty for fresh mkts, easy to see and harvest. Golden-creamy flesh with nutty flavor; the 2-3 lb fruits store well. Bush-type plants.

**4257 Table Ace F1** 70 days. Fruit with excellent shape, 4.5" x 5.5", attractive black-green skin. Delicious, sweet flesh is free of stringy fiber. plants spread 3-4ft, 2-2.5ft tall. Commercial, Fresh Mkt.

**Cream of the Crop**

**Black Bellotta F1**

**4267U Table King** 75 days. Dark green fruits 5-6.5" x 4.375-5.25", avg 1.25-1.5 lbs. Thick yellow-orange flesh with excellent flavor; improves in storage. Plants 2-2.5', set 4-7 fruits each. Fresh Mkt, shipping.

**4272U Table Queen Mammoth** 80 days. Selection of Royal Mammoth chosen for its large fruits. Deep green skin and attractive, dark orange flesh avg 5.5"x7". Well adapted for East and South. Fresh Mkt.

**4282U Taybelle PM F1** 90 days. Unusual strength against disease. Good yields of large 6"x7" fruits. Color is deepest ebony green. Semi-bush habit. High Resistant PM.

## Butternut Types

(*Cucurbita moschata*)

**4191U Autumn Crown F1** 95 days. New type of hybrid whose shape lends itself to easier harvest, storage and shipping plus convenience in kitchen. Butternut-like sweet flavor, thick deep orange sweetly aromatic flesh, small seed cavity, buff exterior color and 4-5 lb fruit. Flattened globe shape with ribs and a prominent green handle, somewhat resembling Parisian type pumpkins. Medium vines spread about 10 feet. Storage up to 4 months. Capable of yielding up to 4 fruits per plant in good conditions. Dual use - can be displayed in cornucopia, then eaten after the holiday.

**4197 Autumn Frost F1** 100-105 Days. Combines a unique and useful pumpkin-like shape and handle with the rich, sweetness & smooth texture of a true Butternut Squash. This shape will allow packing, shipping and display in more compact spacing with less likelihood of damage. Fruit size 5-7" tall x 5-6" wide and attractively ribbed. Stores well up to 4 months. Tolerant PM. Fresh mkt, Shipping, Storage.

**4198 Avalon F1** 88 days. Large thick-necked fruit. 3.5-4 lb avg; 8-9" x 5-6" neck. Uniform size and shape; 0.5 lb heavier than Waltham. Attractive smooth tan exterior. Deep orange flesh with firm, fine grained texture and sweet flavor. Good replacement for Butternut Supreme. Fresh Mkt.

**4227 & 4227U Chieftain PMR F1** 85 days. Unusually strong against PM. Uniform 2.5 lb butternuts are attractive mkt size. Compact plant. Good keeper with fine grained flesh. Tolerant PM. Fresh Mkt, Storage, Roadside, Shipping.

**Honeybaby F1**

**4237 Early Butternut F1** 82 days. Earliest Butternut type we offer. Attractive fruits have excellent flavor and texture; each provides two servings. Hard rind assures at least 2 months of storage. Heavy yielding, semi-bush, compact vines; open habit. Commercial, Fresh Mkt.

**4238 & 4238U Frisco F1** 90 days. Large size and very refined quality. Fruit is uniform, avg. 6 lb weight, measures 8" x 3.5" neck, attractive tan rind and bright orange flesh. Long thick neck provides high proportion of edible quality flesh. Very sweet, non-stringy, with smooth, firm texture.

**4239 Honeybaby F1** 90 days. Compact semi-bush Butternut producing large numbers of handsized 6-7" fruits suitable for single servings. Nationwide AAS trials reported avg yields at 8-9 per plant 1-2 lbs per fruit. Plant was reported 10" tall spreading 2-3 ft. Tan fruits with orange interior, slightly bulb shaped, with sweet nutty flavor. Resists cracking. Tolerant PM. Fresh Mkt, Restaurant, Garden Ctr Sales, Container Sales. Heartland.

**4244 & 4244U Indian Brave F1** 85 days. Large 4-5lb fruit, 9"x3", produced in abundance. Quality comparable to Butternut Supreme. Vigorous vine with disease tolerance, extra yield potential. Tolerant PM, resists cracking. Fresh Mkt, Shipping.

**4254U Sweet Max F1** 90 days. Capable of producing 2-3 large 6.5lb per vine. Vigorous vine produces good leaf cover. Great internal color and flavor. Traditional shape.

**4302U Waltham Butternut** 110 days. Very uniform production of fruits free of crooked necks. Large fruits have excellent flavor and color with uniform, straight necks; store well. Fresh Mkt.

**4310 Zodiac F1** 105 days. 4-6lb fruit. Elongate Waltham shaped neck with shallow ribbing. Desirable type for fresh mkt. Extra long neck provides a higher proportion of solid flesh vs cavity. Vigorous vine. Fruit is very uniform for size and shape.

Heavenly Hubbard F1

### Hubbard Types *(Cucurbita maxima)*

**4222U Chicago Warty Hubbard** 105 days. Green skinned processing type produces large, warty fruits averaging 10" x 15". Quality deep orange yellow flesh, standard for pies, canning. Long storage. Commercial, Processing, Fresh Mkt.

**4242U Hubbard Golden** 105 days. Large, red orange, warty fruits about 10 lbs, average 11" x 9". Very tasty flesh is deep orange, dry; excellent for pies, cooking. Long storage. Commercial, Fresh Mkt, Processing.

**4243 Heavenly Hubbard F1** 105 days. Large 15 lb fruit. Vigorous vines with high yield potential and more uniform fruit than traditional strains, because of hybrid traits. Fine sweet flavor and excellent smooth texture. Uniform size and shape.

**4253 Red Kuri** 90-95 days. Japanese Winter Squash with bright reddish orange exterior, 5-10 lb fruit with fat teardrop shape, potential for high yields.

**4250 Red October F1** 95-100 days. Striking, brilliant red deep Hubbard. Sells itself, a great color to take to mkt. 6.5-11 lb fruit, with excellent uniformity of size, shape and color. Edible and ornamental. Fresh Mkt, Shipping, Cornucopia, Restaurant Specialty, Gdn Plant Sales.

Red Kuri

### Kabocha/Buttercup Types

*(Cucurbita maxima)*

**4202 Bonbon F1** 95 days. Buttercup type winter squash average 4-5 lbs. Deep green, blocky shape, smooth skin and thick, sweet orange flesh on vigorous, medium vines. High sugar content, dry weight. Commercial, Fresh mkt, Shipping.

**4212U Buttercup [Burgess Strain]** 100 days. Favorite winter squash variety. Round fruits with button have dull green rind striped with gray. Flesh of excellent quality and taste; deep golden yellow fine-grained, sweet, flavorful and free of fiber. Cooks, freezes and stores well. Commercial, Fresh Mkt.

**4247 Sunshine F1** 95 days. Highly desirable combination of traits. Bright deep orange skin for sales appeal. High sugar (avg Brix 15%), light, sweet nutty-starchy flavor, completely smooth and stringless when baked. 3-4 lb fruits slightly flat-round, with bright orange interior and high dry matter content (avg 17%). Vigorous short internode 8' vine.

**4252 Sweet Mama F1** 85 days. Big yields of fruits with very dark, green skin, 2-3 lbs each. Moderately thick, sweet, yellow flesh; excellent storage ability, 4 months or longer. Semi-short plants produce 2-3 fruits each, can be pruned back to 4'. Commercial, Fresh Mkt.

**Pinata F1**

**Bush Delicata**

**Vegetable Spaghetti**

**Tivoli F1**

**Pinnacle F1**

**Turk's Turban**

### Mixed Types

**4207 Bush Delicata** 80 days. OP 8" x 4". Bush habit, high yields. 3' spread and crown set dense planting. Has the sweet, smooth bright golden flesh characteristic of Delicata types, for which they're sometimes called sweet potato squashes. Ornamental deep green striping over white background, oblong oval shape. Long keeping. Strong tolerance PM. Fresh Mkt, Shipping, Storage. Roadside.

**3760U Cushaw Orange Striped** 110 days. (*Cucurbita mixta*) Also called Cushaw Pumpkin. Pear shaped with crookneck, 25-30 lb fruit. Hard thin smooth rind, marked with golden orange stripes over creamy white background. Fine grained sweet golden flesh is excellent for baking or pies, good keeper. Roadside, Cornucopia, Ornamental Gourd, Pie.

**4246U Pinata F1** 85 days. 9" x 3"; 2-3 lb. Long blimp shaped fruit, striped cream with narrow dark green stripes in razor sharp contrast. Fine grained, very sweet flesh with rich nutty flavor like old-fashioned sweet potato pie. Excellent eating quality and long keeper. Productive semi-bush vines. Tolerant PM. Cornucopia, Roadside, Shipping.

**4292 Turk's Turban** 100 days. Also called Mexican Hat. Very popular at fresh market. Colorful ornamental fruits are edible, too. Bright orange fruits with button have red, white and dark green markings, average 8-10". Fine for baking, stuffing. High yields of uniform fruits. Fresh Mkt.

**Cushaw Orange Striped**

### Vegetable Spaghetti

(*Cucurbita Pepo*)

**4249 Pinnacle F1** 85 days. Early semi-bush habit allows for higher plant density and potentially higher yields per acre. 3 lb fruits measure 7"x 5". Color of ripe fruit is appealing bright yellow and interior strands offer delicious nutty flavor. Commercial, Fresh Mkt.

**4287 Tivoli F1** 100 days. New bush-vine habit; fine for smaller home garden. Plants bear 3-5 uniform, oblong fruits each; average 3-4 lbs. each, 8-10". crunchy texture. High-yielding, vining plants. Long storage ability. Commercial, Fresh Mkt.

**4297U Vegetable Spaghetti** 110 days. Large fruits 3-4 lbs. each, 8-10". crunchy texture. High-yielding, vining plants. Long storage ability. Commercial, Fresh Mkt.

## Plus Series

Welcome to a new generation of old favorites. Each **Plus** variety offers all the great characteristics of an original top-selling variety "plus" improvements in flavor, modern disease resistance and adaptability.

**Plus** varieties have potential for longer harvest, higher yield and even more market appeal than their class namesakes.

**Better Boy Plus** (see page 75) has added disease resistance, higher brix, firm fruit and lower possibility of radial cracking.

**Big Beef Plus** (see page 75) offers improved color for market appeal, a wider range of disease resistance and larger fruit.

**Celebrity Plus** (see page 72) offers improved wide-spectrum disease resistance, better crack resistance, larger fruit and higher brix.

Note: The **Plus** tomatoes were created using traditional breeding methods and are not genetically engineered. Nearly all the genetics of the original hybrids are still present in the **Plus** hybrids.

**Celebrity Plus F1**

**Big Beef Plus F1**

**Better Boy Plus F1**

### Selecting Tomato Varieties

With so many varieties, it may be difficult to choose which tomato to grow for your crop. Twilley continually look for new varieties with better performance traits. The following information will help you select the best varieties for your production. We especially suggest any of the tomatoes in Twilley's tried and true "Professional Seeds Series".

#### Maturity

Consider the number of frost free days in your growing area. Early crops are often useful to make early market windows, even though some trade-off in fruit size may be necessary.

#### Determinate vs Indeterminate

Determinate plants grow shorter, with more concentrated fruit set, and need less pruning or support. Indeterminate plants usually have a more extended harvest season, and can yield larger, more perfect fruit if supported and pruned.

#### Fruit Type and Use

Various sizes, shapes and colors are available to meet market demand in different regions and applications.

#### Jointless vs Jointed

Jointless fruits, when picked, leave the stem (pedicel) on the plant resulting in a smooth fruit surface. Smoother fruit can show less damage in shipping with less need for special packing materials. Jointed fruits have an enhanced appearance in fresh market settings because stem remains attached to fruit.

#### Shipping/Fresh Market

Descriptions indicate suggested best uses for many varieties. Shipping types usually are very firm, produce a concentrated fruit se and can ripen to a red color in storage after green harvest.

#### Adaptability

Many varieties perform well in certain regions; we include this information when possible.

#### Disease Tolerance or Resistance

Many new varieties have been improved for a broader range of disease traits, as new research results become available for commercial use. As part of your disease management, you may choose varieties that are strong against the diseases that make the most problems in your area. It is recommended that you contact and extension service agent in your area to identify the cause of growing problems. They can help identify the problem so you can better deal with it. We have found that land grant universities offer excellent information on their websites. See Page 113 or ask your Twilley salesperson for universities in your region.

Indicates varieties resistant to Tomato Spotted Wilt Virus, which is now a growing problem in many states. TSWV can wipe out entire tomato crops. Symptoms are hard to detect in early stages and no treatment is known to be effective at saving an infected crop. TSWV is hard to control because the tiny thrips that feed on infected plants spread quickly through a field and carry the virus to healthy plants. Disease resistance is the only known method to control this problem.

Indicates varieties resistant to Tomato Yellow Leaf Curl. Transmitted by white fly, TYLC has recently come on as a disease problem.

**Celebrity F1**

## Tomato

(*Lycopersicon esculentum*)

About 11,500 seeds/oz. Germs in about 8 days. Set plants 18-48" apart in rows 36-60" apart (if staked, 12-24" apart in rows 36-48" apart). Days to maturity are from transplant.

### Large Round Determinates

**4359 & 4359U Amelia F1** 75 days. Aggressive disease package including Tomato Spotted Wilt resistance. Vigorous plant with good leaf canopy has yielded large to extra large fruit under moderate to heavy pruning regimes and is a good subject for stake culture. 7-8 oz fruit are very firm, uniform red ripening, suitable for green or ripe harvest, and crack tolerant. Bred primarily for Southeastern U.S. shipping markets but could be tested for other areas and applications. Resistant FW 1,2,3; N, St, TSWV, V.

**4371 Bella Rosa F1** MidEarly. Large fruited with superb disease package including TSWV and heat tolerance. Vigorous vines. Bright red fruit is uniformly large, round, firm fleshed and highly flavored with good balance of acid to sugars. Superb trial results in Southeastern U.S., especially Florida, and worth testing in any area with strong disease pressure. Resistant ASC, FW 1-2, TSWV, V. Fresh Mkt, Roadside, Shipping.

**4380 BHN1021 F1** 75 days. Good flavor & texture Disease package well suited to southeastern US crops for fresh & local market. Resistant V, FW, N, TSWV. Fresh Mkt, Shipping.

**4386 Biltmore F1** 65-70 days from TP, 80-85 days from sowing. Widely accepted as a fresh mkt workhorse in SE & mid-Atlantic states. Continuous set, with exceptional cropping of larger fruit high on plant - a good proportion ranging 10-14 oz. Uniform-ripening fruit with excellent eating quality. Deep globe shape, very smooth with small blossom scar. Vigorous plant sets fruit to top. High potential yield of firm, round grade A fruit. Rugged plants well adapted to open field production, with minimal to no pruning or pampering. Resistant ASC, FW 1-2, St, V. Fresh Mkt, Local Shipping.

**4409 Carolina Gold F1** 75 days. 8-10 oz. Vigorous with large yield of clean, uniform ripening, round beef fruit. Golden tangerine color very attractive for specialty sales. Resistant V, FW 1-2, Highly Tolerant Graywall. Tolerant cracking, Weather checking. Fresh Mkt, Roadside.

**Biltmore F1**

**4419 Celebrity F1** 72 days. Mid-early variety for main crop; widely adapted, with wide-spectrum disease resistance. Large, red, deep oblate fruits are firm, flavorful, average 8 oz; show crack resistance.

Medium size, strong plants. Grow on ground, caged or staked. Pruning not recommended. Resistant ASC, FW 1-2, N, ToMV 0-2, V. Fresh Mkt, Commercial, Gdn.

**4410 Celebrity Plus F1** 72 days. Mid-early variety for main crop. Widely adapted, with wide-spectrum disease resistance. Large, red, deep oblate fruits with bright red flesh are firm, flavorful, average 8 oz. & show crack resistance.

Medium size, strong determinate plants. Grow on ground, caged or staked. Pruning not recommended. Vigorous plants with good fruit protection. Highly productive. All the original original Celebrity genetics but with modernized disease resistance, higher brix and improved uniformity of shape & size. Resistant ASC, FW1,2, N, TMV, TSWV, V. Fresh mkt, UPick, Gdn.

**4420U Charger F1** 72 days. Extra large 8-10 oz fruits are 2.75-3" x 3-3.5", with lots of good flavor, very firm flesh and smooth shoulders. Good red color inside and out. Strong disease package. Widely adapted, showing good yield potential and quality in trials across Eastern US, in both mature green and vine ripe harvest regimes. Mid tall plants need no pruning but respond well when pruned. Resistant ASC, FW 1-3, V 1. Tolerant St, TYLC. Fresh Local Specialty, Restaurant, Garden & Container Plant Sales.

**4437 Dixie Red F1** 85 days from sowing, 65 days from transplant. Quite early for such a large fruit type. 11-11.5 oz, deep oblate fruit range in size from 3" x 2.5" up to 3.5" x 3". Strong, broad 6-disease package includes F3, TSW and Nematode resistance and confers good potential for high yield of large fruit, even in hot-set conditions. Good red color inside and out. Can be used for green ripening or for vine ripe harvests due to earliness and large size. Vigorous medium-determinate vines form good leaf canopy for sunburn protection. Recommendation: DO NOT PRUNE. Dixie Red bodes well to become a workhorse tomato. Resistant TSWV, ASC, F 1-3, St, VW 1. Med Resistance N. Fresh Local, Shipping, Vine Ripe, Green Ripening.

**Red Pride F1**

**4450 Florida 91 F1** 72 days. Smooth, round 10 oz fruit ripens in groups of uniform, deep red. Plant produces high yields of solid old-fashioned tomato flavor fruit. Strong vines with good heat-set capability. Pruning not recommended. Resistant ASC, FW 1-2, St, V 1. Fresh Mkt, Roadside, UPick.

**4486 Jolene F1** 73-79 days. Large to extra large 12-14 oz with firm meaty flesh and deep red interior. Early bearing with clean blossom end and uniform smooth shoulders. Was noted best in class for heat set in trials throughout Eastern US and was especially strong in SE. Resistant FW 1-2, St, TYLC, V. Fresh mkt, UPick, Gdn.

**4534 & 4534U Mountain Fresh Plus F1** 79 days. Large, deep oblate fruits 3.5" across and weighing 8-12 oz. Excellent resistance to cracking, blossom end rot, puffiness and angularity. Resistant N. Tolerant FW 1-2, V 1-2. Commercial.

**4536 Mountain Gem F1** 75 days. New addition to Randy Gardner's Mountain series featuring Late Blight resistance within its broad disease package. Nearly unique flavor quality, important for growers aiming at fresh markets. In trial locations, mid-size determinate plants to 3 ft tall retained clean green foliage and continued fruit set well after other comparisons were blighted out. Large flattened globe fruit reached 3.5"-4" diam in trial and retained a high pct free of blossom end rot even after long weeks under pressure from rainy weather. This variety contains the "crimson gene." Meaty, thick flesh is deep red for strong eye appeal at mkt. High yields were observed in 2017 trial. A visiting grandson who helped with taste testing in the trial exclaimed "Now this one has zing!" Resistant F 1-2, LB, TMV, TSWV, V. Fresh mkt, Shippers.

**Florida 91 F1**

**Jolene F1**

**4537U Mountain Gold** 72 days. OP Deep tangerine-yellow fruits are 3-4" with mild low acid flavor. Superb in both appearance and holding quality. Fresh Mkt, Home Garden.

**4542 Mountain Merit F1** 75 days. Superb disease package. A unique combination of Late Blight, Early Blight, TSWV, VFNT, plus top commercial & table traits. Round Beefsteak fruit reach 10-14 oz. Deep Red exterior and firm deep red fruit with delicious full-bodied flavor. Vigorous habit, with vines reaching 5' at full growth. High yield potential. A must-try variety. Resistant FW 1,2,3, TMV, TSWV, V. Tolerant EB, N. Fresh Mkt. *Heartland*.

**4544 Mountain Spring F1** 69 days. Jointed. Firm, uniform, bright red color inside and out. High market yields all over East. Low susceptibility to cracking, blossom end rot, puffiness, angularity. Average 10-12 oz. Tolerant FW 1-2, V 1, Fresh Mkt, U-Pick.

**4568 Red Pride F1** 78 days. Main Season. Round oblate fruit with refined blossom end and good color, well proven in Eastern stake tomato production, where it has been found to produce a high percentage of large to extra large grade A fruit. Vigorous plant with good possibility of high yield. Abundant large flat leaves provide good sun cover which helps to avoid blemishes. Resistant ASC, FW 1-2; V 1. Tolerant St. Fresh Local Mkt, Roadside, Garden Plant Sales.

**Tasti-Lee® F1**

**Top Gun TSWV F1**

**Saybrook F1**

## More Large Round Determinates

**4570 Sanibel F1** 75 days. Large 8 to 12 oz fruit borne in concentrated set on 3 1/2' vines. Great flavor from high acid/sugar balance. Main crop comes on in a 14 day window. Excellent disease package. Pruning not recommended. *Pelleted seed only*. Resistant V, FW 1, FW 2, N, ASC, St.

**4574 Saybrook F1** 80-85 days. A standout in precommercial eastern US & Canadian trials, **TSWV** Saybrook was noted for large sets of extra large, smooth 8-10 oz fruit with little cracking, all the way from bottom to top of vine. Some growers reported lots of 12-oz fruit. Vigorous determinate plant provides good protective canopy against sunscald. Showed potential to yield well even in later harvest due to robust disease pkg. Do NOT prune Saybrook. Resistant ASC, FW 0-2, St, TSWV, V 0. Tolerant N. Fresh mkt, Shipping, Vine Ripe, Green Harvest.

**4576 Stellar F1** 70-75 days. Super disease package includes Septoria Leaf Spot and both Blights, enabling high yield potential and long lasting harvest from clean plants. Round 5-7oz fruit load up on 30-36" vigorous plants. Excellent slicing quality. Best for trellis culture in open ground. Resistant FW 2, LB, V. Tolerant EB, SLS. Fresh Mkt.

**Sunny Boy F1**

**Stellar F1**

**Sanibel F1**

**4580U Sunny Boy F1** 70 days. Bright golden yellow, very sweet. Nice interior is firm enough to ship well and contains few seeds. 6-oz globe shaped fruit. Sets well across a wide range of growing areas. Fresh Mkt, Shipping.

**4612 Tasti-Lee® F1** 75 days. 8-10 oz, 3" x 3.25". A breakthrough in vine-ripe shelf quality. Brilliant deep red inside and out (crimson gene). High lycopene trait (50% above avg). Tremendous flavor and very firm texture. All of this with unique shelf-life traits. Repeated shelf-life tests indicate strong potential for retention of top flavor and firm texture up to 2 weeks from vine-ripe harvest. Worth testing out for any roadside, fresh mkt or shipping situation where fresh local quality is demanded at table. Good dense foliar protection. Widely adapted from FL to ME. Sets well in heat up to 90°F days. Resistant to FW 1,2,3, V 1. Premium quality for Fresh Mkt & Shipping.

*Tasti-Lee® Orders over 5000 sd require breeder's marketing agreement. Please call for information.*

**Note - Sales to supermarket chains require participation in a brand-name marketing program. Please ask if your plans include supermarket distribution.**

**4604 Top Gun TSWV F1** 75 days. Great yield potential of 7-8 oz fruits, deep-oblato to round on vigorous plants. Uniform color gene ripens all at once, without green shoulders. Also bred with a hot-set gene, it is able to set fruit in hot weather when other varieties drop their blossoms. Resistant TSWV, ASC, St, V 1, FW 1,2. Fresh Mkt, Roadside, UPick, Local Shipping.

## Large Round Indeterminates

**4374 & 4374U Better Boy F1** 75 days. Large, globe-shaped fruits up to 1 lb or more, with bright red flesh. Vigorous plants with good fruit protection. Highly productive. Grow on ground or stakes. Tolerant ASC, FW 1; N, St, V. Fresh Mkt, U-Pick.

**4375 Better Boy Plus F1** 75 days. Large, globe-shaped fruits averaging 1 lb. or more, with bright red flesh. Vigorous plants provide good fruit protection. Highly productive. Grow on ground or stakes. All the original Better Boy genetics but with modernized disease resistance, higher brix and less radial cracking. Tolerant ASC, FR, FW1, N, St, TMV, TSWV, V. Fresh mkt, UPick, Gdn.

**4384 & 4384U Big Beef F1** 73 days. Early red beefsteak-type with round smooth shoulders, fruits weighing 8-12 oz. Best grown on stakes. Rave reviews nationwide. Tolerant ASC, FW 1-2, N St, TMV 0-2, V. Fresh Mkt, Gdn.

Gdn.

**Big Beef Plus F1**

**Burpee's Big Boy® F1**

**4387 Big Beef Plus F1** 73 days. Early red beefsteak-type with round smooth shoulders, fruits weighing 8 to 12 oz. Best grown on stakes. All the original original Big Beef genetics but with modernized disease resistance, even larger fruit, and crimson gene for deeper red color. Tolerant ASC, FR, FW 1-3, N, St, TMV, TSWV, V. Fresh mkt, UPick, Gdn.

**4404 Burpee's Big Boy® F1** 78 days. Popular variety asked for by name as plants or produce. Smooth, red, deep globe-shaped fruits have fine flavor, thick walls and bright red, meaty flesh. Many fruits weigh 1 lb./more. Large, extremely vigorous plants are heavy producers. Fresh Mkt, Gdn.

**4407 Carmello F1** 73 days. Premium quality for fresh market. Produces large trusses of medium large round 5-7 oz fruit. Luxurious flavor, rich and balanced, sweet and juicy. Thin non-cracking skin. Vigorous vine grows 4-6' staked, Comprehensive traditional disease package, capable of large yields of deluxe fruit. Resistant FW 0, St, V, ToMV 0-2. Tolerant N. Fresh Mkt, Roadside, Bedding Sales.

## More Large Round Indeterminates

**4417 Chef's Choice Black F1** 75 days. Indeterminate. Produces large hands of medium sized, 5.5oz intense red fruit, 5-6 the cluster. Excellent disease package. Resistant FW, TMV, V. Tolerant TYLC, N. Greenhouse or open field, cluster tomato, Fresh mkt, shipping. *Mountain/Southwest.*

**4421 Chef's Choice Green F1** 90 days. Green ripe type. 9-10 oz fruit. Exterior is beautiful deep green and crack resistant. Subtle golden stripes develop with maturity. Flesh stays green even when ripe, just right for fried green tomatoes. Firm meaty interior with outstanding flavor, sweet with tangy citrus tones. Vine grows 2' and up. Multiple disease package promotes a beautiful deep green plant and high yield potential. Tolerant ASC, TMV, F, V, Scab. Fresh Mkt, Specialty, Restaurant, Roadside.

**4423 Chef's Choice Orange F1** 75 days. AAS Winner 2014. Bright neon-orange flesh and skin which retains color in cookery. Very fine fresh sweet flavor. Good acid balance. Meaty flesh has small locules and nice firm texture. Heirloom hybrid derived in trials, up to 20 per plant, with 16 oz fruit at peak season when kept picked. Fruit is flat round with heirloom boat shape. Large determinate habit to 5ft spreading 2ft. Benefits from some trellising. Tolerant A, TMV, Cracking. Fresh mkt, Chefs, Bedding.

**4424 Chef's Choice Yellow F1** 90 days. Golden yellow beefsteak type fruit. AAS trials reported up to 30 meaty 10 oz, 5" x 6" fruit per plant. Very tasty with good citrusy acid to sugar balance and smooth firm texture. Deep green foliage, 4-5 ft plant frame, Strong disease package promotes high potential yield of quality fruit. Harvest deep yellow while still firm. Resistant FW, TMV, V, Cracking, Scab. Fresh Mkt, Specialty, Restaurant, Roadside. *Southeast.*

**4459 Grandeur F1** 75 days. Long yielding with strong disease package and short internodes. Crop starts early with large 8-9 oz fruit. Large leaved vigorous plants protect fruit from sun scald entire season. Produces 5-7 fruits per cluster, with green-shouldered trait to mark vine-ripe readiness. Deep oblate, smooth, red fruit with great taste, firm meat and crack-resistance. High Resistance FW 1, N, St, ToMV, V Fresh Mkt, Roadside, Staking, All-summer Picking.

**4543 Mountain Rouge F1** 73 days. Truly wow! taste. Full of robust flavors, lots of acid, sugar and rich undertones. Nationwide trial sites reported consistent, large harvests of big, 12-14oz pink beefsteak tomatoes. Fleshy fruit with few seed, small locules, restricted core. Vigorous indeterminate plants reach 4-6" on trellis and are capable of long extended harvest, enabled by tolerance to late blight. Sets well even in cool weather. Tolerant FW, LB, N, V Fresh mkt. *Northeast, Southeast, Heartland.*

**4550 Pamella F1** 85 days. Large (7-7.5 oz) globe-shaped red fruit. 6-way disease protection, more than any other large-fruited tomato of our knowledge. Suitable for greenhouse or field culture. Vigorous vine develops strong leaf canopy for protection against sun scald and provides opportunities for large potential yields. Tolerant FW 2, N, TMV, TSWV, TYLC, V.

**4572 Rubee Dawn F1** 57 days. Large, firm 8-12 oz fruit with great Zing flavor balance of sweet & tart. VERY EARLY! 3-4 ft plants with amazing disease package yield over a long season and offer potential for high yield. Deep red globe shaped exterior. Resistant ASC, FR, FW 1,2, LM A-E, ToMV 0,1, V. Tolerant N, St. Fresh mkt, Shipping.

**4573 Rubee Goddess F1** 65 days. Large firm 8-10 oz fruit with mild balanced flavor, thick walled flesh, deep red inside and out, with green shoulders and smooth flattened globe shape. Compact-to-midsized plants with VERY Broad disease package including Late Blight, show potential for high yields over a very long harvest season. Resistant ASC, FR, FW 1,2, LB, LM A-E, ToMV 0,1, V. Tolerant N, St. Fresh mkt, Shipping.

**Marinara F1**

## Cluster Types

**4474 Carina F1** 76 days. Intense red 5-6 oz fruit borne in clusters of 5-6 fruits per hand on vigorous indeterminate plants. Best replacement for Red Eclipse. Resistant FW, ToMV, V. Tolerant N, TYLC. Greenhouse or field production. Fresh mkt or shipping.

**4494 Juliet F1** 60 days. Indeterminate. Early, producing glossy deep red ripe 1 oz 125" x .75" fruits in about 60 days from transplant. Oblong grape-like shape. Clusters like grapes on a vine. Holds on the vine with less cracking than most. Vine is 5-6 ft.

## Campari Type

**4540 Mountain Magic F1** 72-75 days from transplant. Flavor, uniformity and disease resistance in a high-sugar Campari-type. Produces round to deep round 2 oz fruit on somewhat compact plants. Fruits are flavorful, highly crack resistant and uniformly red inside and out, with a long shelf life. Flavor stands up in taste comparisons with heirloom varieties. Tolerant EB, LB, FW 1-2, V 1-2.

## Plum/Roma/Saladette Types

**4439 Early Resilience F1** Up to 25 fruit per plant 3.5 oz blocky, rounded Roma fruit. Excellent flavor and deep red color. Surpassed the comparisons in nationwide trials. Blossom end resistance enables high harvest of usable fruit from bushy 2ft vines. Flesh good quality for canning and cooking. Tolerant V 1, FW 2, ASC, Clavibacter, Xanthomonas, LB. Fresh mkt.

**4479 Hybrid 46 F1** High quality Roma type. Determinate. Large, elongated, cylindrical fruit, very uniform size and shape. Jointless and uniform green ripening. Sets fruit up the plant, well protected by heavy leaf canopy. Widely adaptable across eastern U.S. and Mexico. Resistant ASC, FW 1-2. FR, N, St, ToMV 0-2, V 1. Tolerant BSp. Fresh Mkt, Shipping, Garden.

**4507 Marinara F1** 80 days. Large Roma type; 4-5 oz fruit that fits your palm. Wonderful flavor, vigorous determinate habit and superb broad disease package, capable of high yields in many areas. Much needed addition to the large-Roma category. Tolerant FW 1,2. N, ToMV, TSWV, TYLC, V.

**4521 Mochomo F1** 80-85 days. Roma type. 6 oz fruit. Suitable for greenhouse and field production. Dark red fruit with dense flesh. Strong foliar development provides excellent protection from sunburn. Strong, compact, indeterminate vine with superb disease rating capable of high yields. Tolerant FW 3, TMV, TSWV, TYLC, V.

**4558 Plum Regal F1** 80 days. Determinate Roma type with superb disease package & high potential yield of large fruit 3-3.5" x 2-2.25" and 9-10 oz. Strong determinate providing dense foliage cover for fruit. Deep red interior and very small blossom scar. Resistant V, FW 1-2. TSWV, LB. Tolerant EB. High Resistant Graywall, Cracking, Fresh Mkt, Vine-ripe or Shipping at Mature Green Harvest.

**Plum Regal F1**

**Mountain Magic F1**

**4565U Red Torch F1** 60-70 days. Nationwide trials noted excellent taste and yield across a wide range of conditions. Striped oblong 1.5 oz fruit 1.5" long has beautiful flavor, excellent balance of sugar and acidity, smooth interior with good meatiness. Color of skin and flesh is red striped with yellow. Early maturity and high yields of over 100 fruits per plant were reported. Vigorous vine bears over a very long season. Needs staking. Fresh mkt, UPick, Gdn.

**4578 Shelby F1** 75 days. Extra large 3.5-5.0 oz Roma with extensive disease package that enables potential for high yield in a broad range of weather conditions, including humid heat. Fruit are firm, bright red, very sweet with good acid balance. Classic elongated barrel shape. Firm fruit with low gel content hold well on the plant and store well after picking. Vigorous determinate vines provide good cover. Benefits from pruning. Resistant ASC; BSp 0; FR, FW 1,2; V 1. Tolerant TSWV, TYLC. Fresh mkt, Vine Ripe & Mature Green Mkts.

## Cherry Types

**4372 Bellini F1** 65 days. Indeterminate. Orange cocktail tomato with premium great flavor, firm texture and crack resistance. Smooth round fruit avg 1.5-1.75 oz, about 1.75". Medium vigor vines with multiple disease package and high yield potential. Resistant LM A-E, FW 1-2, V. Tolerant N, St.

**4406 Candyland Red F1** 55 days. Current type. Very small 0.5" fruit is dark red, very sweet and rich flavored. Prolonged harvest. 2-3' vine with tidy habit bearing numerous fruit near perimeter of plant for easy picking. Fresh Mkt, Specialty, Restaurant, Garden Ctr Sales.

**Juliet F1**

**Shelby F1**

## More Cherry Types

**4470U Honeybee F1** 60 days. Large determinate semi-vining yellow cherry. Extra sweet, 1" round, golden yellow fruit set in multiple branching clusters. Large 4-6 ft determinate vines, Fruit counts of dozens at a time were noted in trials. Best replacement for Sun Sugar. Fresh Mkt, Regional Shipping, Cello, Salad Bar, Restaurant.

**4481U Jasper F1** 60 days. Rich sweet flavor & good firm flesh. Holds well on vine and tends to retain fruit quality well post-harvest. Extended crop season and durability through weather problems. Potential for high yield is supported by nice disease package, including both Early and Late Blight tolerances. AAS trials showed wide adaptability. Indeterminate vines grow over 2', excellent for staking; produces hundreds of 0.3 oz fruits averaging 0.75". Tolerant EB, FW 1-2, LB. Fresh Mkt, Restaurant Special, Salad Packs.

**4503U Lizzano F1** AAS Winner 2010. 63 days. Low growing bushy semi-determinate to 18". Very sweet 1" baby cherries, avg just under 0.5 oz. Tested at 7.0% Brix. Abundant fruit set over long season. Tolerant LB. Fresh Mkt. Low Staking, Home Gdn, Basket, Bedding.

**4512 Midnight Snack F1** 68 days. Indeterminate indigo tomato ripens from red to glossy black-purple at maturity when grown in strong light. Color is due to high levels of anthocyanin pigment, a healthy antioxidant. 5-6 ft vines produce large trusses. Fruits avg 0.5 oz and 1.5" diam. Up to 100+ fruit per plant were counted in nationwide trials. Ripens all season long with sweetly balanced, juicy flavor. Fresh Mkt, Restaurant, Gourmet Salad.

**4552 Patio Choice Yellow F1** 45 days. Compact determinate plant bears masses of bright yellow 0.5 oz, 1" diam fruit in trusses that cover the deep green leaf canopy. Sweet and mildly acidic. Judges reported 100+ fruits per plant in national trials. V, F, TMV. Gdn Plant Sales, Container.

**4569 Red Robin F1** 55 days. Compact branching plant for container sales. 8". Profuse tight clusters of glossy bright red 1" round-oval fruit with nice sweet-acid flavor. Dense foliage covers well to protect fruit.

**4584 Super Sweet 100 VF F1** 65 days. Indeterminate. Improved Sweet 100 with disease tolerance. Small, round, red fruits have very sweet flavor, high Vitamin C content; borne in long, hanging clusters of up to 100 fruits each, productive. Tolerant FW, V. Fresh Mkt.

**4606 Sweet Treats F1** 66 days. Uniquely delicious pink cherry tomato. Very sweet and richly flavored with excellent firm texture. Capable of prolific extended yield due to resistance to a broad range of 5 diseases. Round 1-oz cherry fruit are deep pink inside. Smooth exterior. Resistant LM; FW 1,2; ToMV 0,1. Tolerant FR. Fresh Local Mkt, Restaurant, Garden Plant Sales.

**4617 Yellow Canary F1** 55 days. Small determinate 1" round canary yellow cherry. Ornamental edible for containers and baskets. Very compact, vigorously branching plants. Early, abundant yields of sweet tasty fruit. Gdn Plant Sales.

## Grape Types

**4441U Fantastico F1** 60 days South, 75 days North. Patio tomato with miniature plum fruit. Produces large numbers of small blocky oval fruit weighing from 0.5 to 0.6 oz, about 1.25" x 1". Quite sweet at 9-10% Brix, but firm and showing excellent shelf life in the AAS trials. Stem length is about 30" staked. Plants trail to about 20" in basket and stand about 10" unsupported. Some of the AAS trial sites recorded picking sweet ripe fruit as late as Dec. in areas with late frost dates. Tolerant LB. Fresh Local Specialty, Restaurant, Garden and Container Plant Sales.

**4454U Gabrielle F1** 60 days. 1/2-3/4 oz. Classic round-oval grape shape, just the right size for one-bite eating. Exceptional high-brix flavor. Loads of small fruit in big clusters.

**Sweet Canary F1**

## More Grape Types

**4462 Gold Spark F1** 65-70 days. Beautiful 1/2 oz canary yellow fruit borne in generous hands on vigorous medium-size indeterminate plants. Fruit is firm with great flavor and excellent shelf life. Breeder's trials indicate high yield potential. Works well in both open field or hoop house production, or low-tech hydroponics. Breeder's advice is to prune ground suckers 2" from ground. Resistant ToMV 0-2.

**4579 Sun Bliss F1** 65 days. Semi-determinate. Golden grape tomato with vigorous plant and prolific harvest of very sweet .7-9 oz fruit. Color is pure golden. Tolerant TMV, V. Fresh mkt, Cello pack.

**4586 Sweet Canary F1** 62-65 days. Semi-determinate, deep gold .5oz grape tomato. Early sweet & firm.

**4602 Sweet Hearts F1** 73 days. Large indeterminate, productive vine bears large hands of firm extra sweet 0.25 oz fruit. Brilliant red, uniform grape shape and size. High yield potential with continuous set of full clusters to top of plant. High Brix & above-average shelf life. Resistant LM, ToMV 0-2. Cracking, Fresh Mkt, Roadside, Shipping.

## Heirloom Trait Hybrid

**4458 Grandma's Pick F1** 70-80 days. Indeterminate. Strong growing Heirloom-trait hybrid gives the best of tradition productivity. Large 10-14 oz fruit are intensely flavored, gnarley, lobed, contorted and deep crimson. Highly flavored and high in lycopene. Can be cropped like regular hybrids for fresh market produce. Tolerant V, FW 1, N 1, St. Fresh Mkt, Home Gdn.

**4563 Purple Boy F1** 65-70 days. Heirloom taste in a modern disease tolerant hybrid branching indeterminate habit. Skin is red with purple tones. Interior is red fleshed with purplish locules. Good disease package gives good chances for plenty of yield. Prune aggressively. Resistant FR 0, FW 0, ToMV 0-2, V 0. Tolerant N. Fresh Mkt, Roadside.

**Mortgage Lifter**

**Brandywine Red**

## OP Heirlooms

**4394U Brandywine Red** 75 days. Large, deep globe shape 1 lb fruits. Deep skin color. Soft with excellent flavor and smooth red flesh. Indeterminate. Fruit with green shoulders, fairly large stem scar, may be potato leaf or regular leaf, depending on availability. A very popular 1800's heirloom best known for high flavor.

**4399U Brandywine Yellow** 80-100 days. Heirloom. Indeterminate fuzzy potato leaf vines. Large fruit up to 2 lb, fine flavor for a yellow, creamy texture, exceptional quality heirloom.

**4456U German Johnson** 76-80 days. Big, rough fruit, averages a meaty 9-24 oz. Skin deep with pink with yellow shoulders, mild low acid flavor with few seeds. Fresh Mkt, Home Gdn, Bedding.

**4523U Mortgage Lifter** 83-90 days. Old-time indeterminate variety with large smooth 1 lb fruit and deep pink skin. Meaty interior, very tasty with few seeds. Several growers have asked for this in recent years, so we've brought it back to our catalog. Fresh Mkt.

**4545 Mr. Stripey** 80 days. Bicolor red and yellow skin and flesh. Big, meaty 9 oz fruit, sometimes reach 2 lb, with low acid flavor. Bedding, Farm Mkt, Gdn.

## Tomatillo

**4349U Toma Verde** 100 days. Indeterminate. Used in a variety of Mexican and American dishes and salsas. To enjoy the tart flavor harvest while still green (before they turn yellow). Globe-shaped 2-3 oz fruit is enclosed in a thin husk which should be removed before the fruit is used or consumed. Large fruited variety; widely adapted. Approx 15,000 sds./oz. Similar culture to tomatoes.

## Rutabaga

(*Brassica napus*, *Napobrassica* Group)

Approx. 12,000 sd/oz. Pkt plants 25-30' of row; ¼ oz sows 100' Direct sow 1-2 lbs/acre. Sow sd ¼-½" deep, 2-6" apart in rows 12-26" apart. Germs in about 9 days. **Days to maturity are from sowing.**

**3980U American Purple Top** 90 days. High quality, selected strain. Large round roots are deep purplish red above, yellow below; small tap root. Fine grained flesh is firm, crisp, mild and sweet. Small tops, short necks.

## Turnip

(*Brassica rapa*, *Rapifera* Group)

Approx. 15,000 sd/oz. Pkt plants 40' of row; ½ oz sows 100'. Direct sow 1-2 lbs/acre. Sow sd ¼-½" deep, 2-6" apart in rows 12-36" apart. Germs in about 7 days. **Days to maturity are from sowing.**

## Hybrids

**4619 Alamo F1** 33 days. Excellent taste, yields and regrowth ability. Short petiole with the greens having broad leaves and the roots are small, narrowed and tapered.

**4624 All Top F1** 35 days. Greens only; does not form roots. Uniform plants produce large, broad, smooth green leaves with sturdy green stems; excellent for greens, forage.

**4629 Just Right F1** 28 days for greens; 60 days for roots. Dual purpose type best for fall planting. Produces glossy, tender leaves for greens; or grow on for roots. Snow white roots are smooth, up to 6", high quality.

**4644 Royal Crown F1** 40 days. Improved hybrid of Purple Top White Globe type. Tops are taller, more erect and deeper green, with more intense deep purple color on flat, globe shaped root crowns. High yield potential of uniform roots and quality dark greens. Regrows rapidly after cutting and hold well in field. Roots harvested at 3-6" average 14 oz., are sweet, smooth textured, resist pithiness until late in the season. Thick strong stems to 24". Fresh Mkt, Roadside, Shipping.

**4659 & 4659U Tokyo Cross F1** 35 days. Early harvest of high quality. Perfectly globe-shaped roots are pure white, smooth; 2" roots ready in only 35 days. Plant closely and reduce nitrogen fertilizer. Plants can be harvested over longer period; roots grow up to 6" without pithiness.

**4664 Topper F1** 36 days for greens. 80 days for roots. Very heavy-yielding. Seven Top type. Vigorous tops up to 28"; thick, smooth, lobed leaves are broad and dark green.

**4669 White Lady F1** 28-35 days. Sweet, tender and delicious. Medium-size, pure white roots are flattened-round, slow to get pithy. Bright green tops to 20". Harvest roots at any stage. Plants resist bolting.

## Open Pollinated

**4634U Purple Top White Globe** 55 days. Improves strain. Uniform, smooth, attractive roots with purple and white skin. Fine-grained, tender white flesh.

**4649U Seven Top** 45 days. For greens only. Produces large quantities of tender, flavorful leaves for greens, forage.

### Important Notice To Watermelon Seed Buyers

Please read the important information on the back of the order blank. We must have your signature on the order form if you are going to order more than 1,000 seeds or 1 lb of a variety.

#### Waiver concerning all watermelon seed purchased from Otis S. Twilley, Inc.

(Growers, Brokers, Packers/Shippers)

In addition to the Twilley waiver agreement, a Nunhems waiver agreement must be signed for any Nunhems watermelon variety marked with the following symbol:

A Nunhems waiver form is in the centerfold of this catalog, and these forms can be downloaded from our website: [www.twilleyseed.com](http://www.twilleyseed.com).

We want to advise you that the bacterial fruit blotch disease of watermelons has again appeared in watermelon fields in many watermelon producing areas. This disease has been periodically reported since its initial detection in 1989. Losses from this bacterial disease have ranged from minor to as high as 100% of the marketable fruits.

The causal agent of the fruit blotch disease appears to be closely related to *Acidovorax avenae* subsp. *citrulli* (synonym: *Pseudomonas pseudoalcaligenes* subsp. *citrulli*). The pathogen could be seed-borne from the original seed lot, or result from other host infection. The disease has attacked many varieties of watermelon from different seed producers.

Although new testing procedures are currently under development, it is impossible to conduct any test procedures that will give 100% reliable results with regard to the identification of any seed-borne watermelon fruit blotch infections. Work is being done by public and private researchers, seed companies and growers, to determine improved identification and control measures and to develop statistically reliable testing procedures.

Work is also being done to determine if different varieties of watermelon, both diploid and triploid, have any level of resistance or tolerance to this disease. No varieties to date have been identified as having any significant level of resistance.

The symptoms on young seedlings appear as dark water-soaked lesions on the lower surfaces of the cotyledons or the true leaves. These initial water-soaked lesions later turn necrotic and may also have chlorotic halos surrounding the dead tissues. The lesions will also often appear on the hypocotyls of young seedlings, resulting in the wilting and death of these young plants. The most dramatic and destructive phases of this disease are the fruit infections that occur much later in the growing cycle. The lesions on the top surface of the fruits appear as small, water-soaked areas, which under the right conditions of high temperature and humidity, enlarge rapidly to cover most of the surface of the fruits. Fruit decay often follows. This later condition of the disease cycle could lead to significant economical losses to the grower.

In cases where the pathogen is carried in the seed, the typical lesions described above will appear on the young seedlings within 7 days after seedling emergence. If no symptoms are observed on the young seedlings within three weeks after emergence, it is unlikely that the bacterium is carried on the seed and that any subsequent infection is most likely from other sources. It is imperative that each grower inspect the young plants during this early stage, in order to determine the presence or absence of these symptoms and to mitigate any potential economical losses.

**Caution:** Symptoms that appear on plants in the early stages of growth, and especially those symptoms caused by secondary infections, may not be evident on new foliar parts as the plants develop. The pathogen, however, may still be alive in infected tissues, and may infect the fruits if favorable conditions of temperature and humidity prevail. Do not retain any plants that show any symptoms at any time.

### Growing Triploids

If you grow for fresh market, triploid F1 watermelons are a crop you can count on to attract plenty of attention. They are waxier than diploid varieties, and bring high prices wherever they're marketed. The flesh is absolutely tops in eating quality, market preference and consumer demand. No seeding necessary! And cut fruit displayed in shrink wrap is a sure seller.

Sometimes incorrectly referred to as "seedless", triploids are sterile hybrids which, because of their genetic makeup, characteristically produce fruit with few or no true seeds. Sometimes cultural practices or weather conditions may result in fruit with some vestigial seeds or empty white seed coats. Because of this, triploid F1 watermelons are not guaranteed to produce seedless fruit.

A special note to growers of triploid F1 watermelons: Please follow careful practices to grow triploid F1 watermelons successfully. We supply detailed growing instructions with your seed. For best results, we suggest starting seed in the greenhouse in peat pellets (on page 113) 3 weeks before outdoor planting time. Because of their genetic makeup, triploid F1 watermelons must be planted with a diploid (regular hybrid or open-pollinated) variety as a pollinizer in order to assure fruit set. Approximately 600 pollinizer per acre.

#### Days to maturity are from transplant.

### Special Limitation of Warranty

#### TRIPLOID HYBRID WATERMELONS

**A. NOTICE:** Hybrid triploid watermelons are sterile, or true, hybrids which characteristically produce fruits with few or no true seeds. Because the absence, or relative absence, of "hard" or true seeds in the fruit of the melon is its chief distinguishing characteristic, the hybrid triploid watermelon is often referred to as a "seedless" watermelon. Despite the popular perception, hybrid triploid watermelons are not true "seedless" watermelons. The first melons to ripen in a field of hybrid triploid watermelons often contain small, vestigial seeds. In addition, certain genetic, cultural and climatic factors are known to cause the formation of empty seed coats, small, white, immature seeds and/or hard seeds in the flesh of the melons. Due to the wide variety of possible causes of hard seed or ovule formation, Hybrid triploid watermelons are not guaranteed to produce seedless fruit.

Hybrid triploid watermelon production requires a high level of grower sophistication. Hybrid triploid watermelons require a pollen source and bees to serve as pollen vectors. The general rule is one pollinizer plant for every 3-4 seedless plants. Hybrid triploids also require special care for satisfactory germination. Growers are encouraged to contact university extension personnel for government publications and information concerning recommended cultural practices. Otis S. Twilley Seed Co., Inc. can also supply certain information on request. Growers are encouraged to develop expertise in growing hybrid triploid watermelons prior to instituting large-scale commercial production.

**B. SPECIAL LIMITATION OF WARRANTY:** All hybrid triploid watermelon seeds are sold pursuant to Otis S. Twilley Seed Co., Inc.'s standard terms and conditions of sale. Descriptions and illustrations of hybrid triploid watermelons appearing (in the seed catalog and elsewhere) represent hybrid triploid watermelons as grown under favorable growing conditions in favorable growing areas. Appearance and performance may vary in other geographic locations and under different growing conditions. Otis S. Twilley Seed Co., Inc. expressly excludes any warranty of conformity to description, illustration or sample and extends no warranty that the hybrid triploid watermelon seed sold will produce "seedless" fruit. All implied warranties, including but not limited to any implied warranties of merchantability and fitness for a particular purpose, are expressly excluded.

**C.** For Nunhems triploid watermelons marked with the following symbol:  There is a Nunhems triploid waiver agreement in the centerfold of this catalog and also available for download from our website: [www.twilleyseed.com](http://www.twilleyseed.com). You can also contact us for a copy.

# Watermelon Triploid (Citrullus lanatus)

Approx. 400-500 seeds/oz = approx 7,200 / lb

Please reference page 81 for complete information on growing triploid watermelons.

Variety	Days (from transplant)	Size	Shape and Color	Disease	Description
<b>Red Fleshed</b>					
4885 Arcadia F1	88-90	23 lbs		Tolerant A 1-3, F 0-1	Flesh is dark red, very crisp. Sweet, rich flavor. Extra firm makes it an excellent candidate for cut melon market. High yield potential reported. Fresh Mkt, Shipping, Contract Growing.
4874 Belmont F1	90	6-10 lbs			Miniature size range. Round-oval fruit weighs 6-10 lb. Vivid deep red flesh is extra firm & crispy, with very small pips. Highly contrasting rind is clean bright white. Crimson Sweet type rind appearance, mid green with broad deep stripes. Vine is vigorous growing and strong with high yield potential of multiple fruit per plant. Use an early pollinator variety. Fresh local mkt, Garden Plant Sales, Sale wrapped.
4883 Charismatic F1	83	16-20 lbs			New generation breeding from Sakata. Early, consistent yields with good cold-setting ability. Flesh very crisp, dense, sweet and bright red with inconspicuous pips. Rind has dark green stripes on mid-green background, with bright white shell providing sharp demarcation around flesh. Widely adapted. Major market appeal. Use an early pollinizer for best results. Strong vigorous vines provide excellent yield potential. Best sub for Affirmed when needed.
4872 Eclipse F1	80	10-12 lbs			Seedless sugar baby type. Round-oval, shiny black green exterior. White inner rind crisply defined in sharp contrast to intense red flesh. Potential for high yields. Excellent flavor, very sweet and with aromatic undertones. Customers have been asking for Eclipse. Fresh Mkt, Shipping, Wrapped slices.
4876 Fascination F1	83	16-20 lbs		Tolerant A, F1	Crimson Sweet type rind. Interior is dark red and firm with small pips. Performed well in yield trials across major watermelon areas of U.S. Good uniformity of size and shape. Fresh Mkt, Fresh Cut, Cello Pack, Shipping.
4877 Harvest Moon F1	80-100	18-20 lbs			This is a seedless hybrid with the mottled rind pattern of the old "Moon & Stars" heirloom. Crisp flesh can hold well on vine and after harvest. Compact 3-5' vines. Averages 3-4 fruit per plant.
4875 Joy Ride F1	80-85	19 lbs		Tolerant F1	Widely adapted. 2015 Southeast & Midwest trials resulted in superior avg scores for sweetness, firmness, recorded yield and low percent Hollow Heart. Uniform fruit set. Vigorous vine makes dense canopy for sun protection. Fresh Mkt, Shipping, Cut Fruit Cello Pack.
4879 Kingman F1	85	18-22 lbs			Top performer in university trials, including highest total and highest 36-count yields at UGA. Crimson gene type with extremely bright red flesh. Firm and crisp with small pips.
4880 Lamar F1	83	12 lbs		Resistant FW	Sugar Baby type. Flesh is bright red, sweet, clean flavored. Sharp boundary between flesh and hard white inner rind creates appealing look. Vigorous vines give potential for heavy crops. Excellent For Cut Fruit Sales. Fresh Mkt, Roadside, Shipping.
4886 Melody F1	60	14-16 lbs		Tolerant A 1	Growers have been asking for this variety. Great earliness. Deeper color than most triploids. Breeder trials indicate capability for heavy, concentrated fruit set under cool conditions. Good eye appeal. Fresh mkt, Shipping.
4892 Revolution F1	84	18-24 lbs		Tolerant A 0-1, FW 0-1	Classic Allsweet rind pattern. Interior is intense dark red with texture. High brix levels. Vigorous vines with broad dense foliage provide strong fruit protection. Melons handle well in local mkt and in shipping. Fresh Mkt, Shipping, Cut Fruit Cello Pack.
4893 & 4893U Ruby F1	85	15 lbs		A 0-1, FW 1-3	Crisp, sweet red flesh. Small pips. Sharp internal contrast at flesh-rind boundary. Strong waxy rind improves retention of color and quality. Commercial, Fresh Mkt.
4894 Secretariat F1	80	26-20 lbs			Crimson Sweet type rind. Early maturing with good cold setting ability and high yield potential. Crimson gene type with deep red flesh.
4895 Summer Breeze F1	80-85	16 lbs		Resistant A, Tolerant FW	Tests from 2015 SE trial locations recorded high readings for sugar and firmness as well as high yield potential. Has the desirable combo of rind traits: thin but very strong for shipping
4920 SuperSeedless® Brand Variety 7387 F1	93	17-22 lbs		Tolerant A	Dark red flesh with small pips. Excellent fresh cut or shipped. Strong vines with high yield potential. Fresh Mkt, Fresh Cut, Shipping.
4921 SuperSeedless® Brand Variety 7167	90	14-18 lbs		Tolerant A 1	High yield potential of quality deep red-fleshed fruit. Vines have very large leaves for good sun protection.
4923 SuperSeedless® Brand Variety 7197HQ F1	93	16-20 lbs		Tolerant A 1	Good size for a seedless melon. Suitable for commercial production. Deep red flesh, small pips. Med. length vigorous vine.
4915 SV0241WA F1	80	12-13 lbs		Resistant A 1, Tolerant FW 1	Excellent yield among triploids at 2012 NC State trial. Vibrant, deep shiny red flesh. Firm, sweet & crisp. Very small pips. Vigorous vines are strong against disease & provide late-season cover to protect fruit. Fresh Mkt, Fresh Cut, Shipping.
4918 Sweet Eat'n F1	85	18-24 lbs		Tolerant A, F	Very large for a seedless variety. High indexes for sugar and fiber content result in firm, extra sweet eating. Thin but tough rind makes it an excellent shipper.
4945U Triple Baby F1	75	5-7 lbs			Sugar Baby type in size and color but with triploid advantages of high sugar and long shelf life. To achieve small personal sized fruit, transplant small plants 20-24" apart with a pollinator every 5th or 6th plant. Any oval diploid variety is recommended as the pollinator.

## Watermelon Diploid

See page 85 for photos and prices

Approx. 200-300 sd/oz for large-seeded types (500 sd/oz for small-seeded types). F1 packets contain 25 sd; o.p. packets produce 6-10 hills; 3¼ lb produces approx. 10,000 plants (1½-2 lbs if small-seeded). Germs in about 8 days. Set plants 24-36" apart in rows 72-96" apart (closer for bush types). Days to maturity are from transplant.

Variety	Days	Size	Shape and Color	Disease	Description
<b>Allsweet Types - Red Fleshed</b>					
<b>4679U</b> Allsweet	90	25-30 lbs		Tolerant A 1-3, FW	A classic, Bright red flesh, high sugar content, exceptional firmness. Shipping.
4737 Estrella F1	80	20-24 lbs		Tolerant A, FW	Vigorous vines, large leaves for great protective canopy. Has performed well in all watermelon areas needing early maturity. Can be use in frost-free winter production. Fresh mkt, shipping, cut & wrapped.
4749 Jamboree F1	88	23-27 lbs		Tolerant A, F	Allsweet type with advantages for cool season production or when growing conditions limit size. Bright red flesh, firm texture. Rind has a waxy exterior and skin is somewhat grey, making it more tolerant to sunburn. Fresh Mkt, Roadside, Shipping, Garden.
4794 & <b>4794U</b> Sangria F1	85	20-26 lbs		Tolerant A 1, Resistant FW	Sweet and refreshing. Dark red flesh with unsurpassed eating quality. Fresh Mkt, Garden, Shipping.
4835 Summer Flavor® Brand Variety 720 F1 	85	28-30 lbs		Tolerant A 1	Excellent shape and size. Medium to large vines with high yield potential. Sweet, bright red flesh.
4839 Summer Flavor® Brand Variety 790 HQ 	85	24-28 lbs		Tolerant A 1	Sweet deep red flesh. Vigorous large vine. Good yield potential. Very ship-pable.
4841 Summer Flavor® Brand Variety 840 F1 	93	22-26 lbs		Tolerant A 1, F 1	Deep red flesh. Large vigorous vine. Potential for high yield.
<b>Charleston Grey - Red Fleshed</b>					
<b>4708U</b> Charleston Grey	83	26-33 lbs		Tolerant A, FW	Rind characterized by distinctive, marbled light green color. Bright red flesh is very sweet. Good shipper.

Set plants 24-36" apart in rows 72-96" apart (closer for bush types). Days to maturity are from transplant.

Variety	Days	Size	Shape and Color	Disease	Description
<b>Crimson Types - Red Fleshed</b>					
4730 Compadre F1	84	20-25 lbs		Tolerant A, FW, GSB	Firm red flesh. Strong vines have shown ability in trial to produce heavy set of quality fruit.
4719U Crimson Sweet	85	25 lbs		Tolerant A, FW	Very popular shipping type. Delicious deep red firm flesh has high sugar content. Small seeded. Shipping.
4769 PS11018330 F1	75-85	30 lbs			Shiny red flesh. Small seeded. Compact vigorous vine has tight sun cover over fruit. CA and Southeast trails very positive. Capable of jumbos as wide spacing.
4796 Shiny Boy F1	90	20 lbs			Beat out comparisons in AAS taste tests. Sweet, tropical flavor with shiny rind. Vigorous vines can grow up to 12". AAS judges noted plants produce high yields tolerant of severe weather.
<b>Ice Box Types - Red Fleshed</b>					
4701U Bush Sugar Baby	65	7 lbs			Very early with compact, determinate vines. Worth testing as pollinator of seedless types because of "bush" habit. Firm sweet red/orange flesh.
4744 Jade Star (Pata Negra) F1	75	15 lbs		Resistant F	Dark green rind contrasts beautifully with delicious bright red flesh. Small seeded. Note: Sold for export as Pata Negra. Fresh Mkt, Commercial, Shipping, Roadside, Garden.
4764U Mini Love F1	70	6-9 lbs		Tolerant A	AAS trials reported good yield for 4-6 melons per vine, shiny exterior with Crimson Sweet pattern. Thin but strong rind reported as not prone to cracking. Compact vines spread 3-4'. Fresh Mkt, Shipping, Garden Ctr Sales. <b>No sales to South Carolina.</b>
4799 Smile F1	80	6-8 lbs		Tolerant Fruit Cracking	High sugar and outstandingly tough rind. Excellent for long distance shipping. Withstands rough handling and wet ground prior to harvest. Stores up to 12 days after harvest. Long Distance Shipping, Garden, Roadside.
4809U Sugar Baby	84	6-7 lbs			Very popular type with good keeping quality. Distinctive dark rind is thin but fairly tough. Small seeded. This is the pollenizer we supply with most triploids.

# Business is Blooming!

Locally grown cut flowers are a blossoming trend. There has been an increase in demand for them, whether for grand occasions such as weddings or for simple home table settings. They are fresher, brighter, more fragrant, more economical, and longer lasting than imported varieties. Local cuts save on shipping and leave a much smaller carbon footprint.

Both large and small farms are expanding their flower operations, as cut flower sales can strengthen and compliment income from locally grown fruits, vegetables and herbs. Flowers also attract honeybees and other beneficial pollinators, and this helps farm production.

In addition to zinnias, sunflowers, celosia, and gomphrena, cut flowers can include ornamental grasses, herbs (such as basil or dill), foliage, or grains. Twilley Seed is delighted to offer many varieties of cut flower seed; look for this symbol throughout our flower section: ☞

*For an even more extensive selection of cut flower seeds, please contact us.*

## Sweet Pea (*Lathyrus odoratus*) A

Approx. 300 sd/oz. Sow 4-6 weeks before spring sales or direct sow as early as ground can be worked. Germ in 10-14 days at 55-65°F. Excellent for cut flowers. Full sun; space 10" apart.

**9358 Mammoth Mix** Climbing variety w' long stems and extra large flowers, good for cutting. 6 ft vine.

100sd 1.95 500sd 8.30 1000sd 13.75 5M 10.80/M

## Sweet William

See *Dianthus barbatus* page 95

## Thunbergia alata

(Black-Eyed Susan)

Approx. 1,200 sd/oz. Sow 4-6 weeks before spring sales. Seeds germinate in 2-3 weeks at 70-75°F. Screens, baskets and ground covers. Full sun to part shade. Blooms from summer to frost.

**Susie Series** Dense branching vines with abundance of bright colors. Ideal for containers and hanging baskets.

**9386 Mix** Contains orange, white and yellow in plain and bicolor (dark eye).

**9381 Orange Eye**  
100sd 8.00 500sd 37.15 1000sd 68.75 5M 56.30/M

## Torenia A

Approx. 26,000 pels/oz. Sow about 8 weeks before spring sales. Seeds germinate in 14-20 days at 70°F. Old-fashioned annual for beds or pots in partial shade. Blooms summer to frost. Space 6-12".

**9411 Kauai Mix** Pelleted. Offers the fullest range of bright, eye-catching colors. More manageable and cost effective on the bench. More compact habit, tighter 8-day bloom window and earlier than 'Clown'. Ht. 8".

100sd 3.25 500sd 14.20 1000sd 24.35 5M 20.70/M

## Verbena A

Approx. 10,000 sd/oz. Sow 12-14 weeks before spring sales. Germ in about 20 days at 70-75°F. Fine for bedding, pots in hot, dry areas. Blooms late spring to frost. Space 6-12" apart. Ht. 10-12", spread 18".

**9475 Quartz Mix** Large flowered with stronger germ than most Verbena. Prolonged bloom and stress tolerance due to Powdery Mildew resistance. Ht. 10-12".

100sd 2.50 500sd 10.65 1000sd 17.65 5M 15.00/M 10M 13.60/M

## Verbena speciosa P

**9417 Imagination** Primed. Glowing color, lacy foliage, free-flowering habit. Violet blue blooms on spreading plants. Suggested for massing in landscape and hanging baskets. Performs in hot and dry soils. Ht. 12-24", spreading to 20".

100sd 3.25 500sd 14.15 1000sd 24.15 5M 20.50/M

## Vinca (*Catharanthus roseus*) A

Approx. 20,000 sd/oz. Sow 10-12 weeks before spring sales. Seeds germ in about 15 days at 70-75°F. Heat-tolerant plants for bedding, ground covers in full sun. Blooms summer to frost. Space 12" apart.

**Cora Cascade Series F1** Trails to 3 plus feet. Extra large 2½" flowers tend to fill center of plant. Thick, dark glossy foliage, dense branching. Resistant to phytophthora. Ht. 6".

**9526 Cherry 9525 Mix 9527 Polka Dot**

## Wildflowers

*The ideal solution for a natural look where grassy lawns cannot be maintained. Once established, wildflowers are virtually maintenance-free and increase the value of your property. Perennial wildflower mixes are also popular along highways as they return every year.*

**Culture:** Prepare seed bed as you would for any garden. For large areas, use a disc. Scatter the seeds evenly on the surface of loose soil. For fine seed, it is recommended to blend with coarse sand before sowing. Rake the seeds lightly into the soil but do not cover. In dry areas, sprinkle the seed lightly. Average germ is 80-90%.

**9906 Cut Flower Mix Annual.** Approx. 692,000 seeds/lb. Composed of 16 different tall annuals with colors ranging from blue, yellow/maroon, yellow, sky blue, white, pink, red. Approx. 7 lbs./acre.

**9918 Northeastern Mix** Approx. 664,400 seeds/lb. Contains 19 varieties (9 annuals and 10 perennials) with colors including white, pink, purple, violet, blue, orange, yellow, maroon, red, and scarlet. Approx. 7 lbs./acre.

**9924 Perennial Mix Perennial.** Approx. 812,000 seeds/lb. Composed of 12 perennials with colors ranging from white, red, violet, blue, orange, maroon, pink, purple, cream, and yellow. Approx. 6 lbs./acre.

**9930 Southeastern Mix** Approx. 425,000 seeds/lb. Contains 23 varieties (13 annuals and 10 perennials) with colors ranging from white, yellow, maroon, orange, pink, crimson, purple, red, violet, scarlet and rose. Approx. 11 lbs./acre.

### **Prices for all Wildflower Mixes:**

1/4 oz 1.55    1 oz 3.85    1/4 lb 12.85    1 lb 43.00    5 lb 37.75/lb

## Sowing Wildflower Seed

### **When to Plant Wildflower Seed**

The best time to plant in your area depends on the climate and rainfall patterns, as well as the species you are planting. In cool climates plant annuals, perennials or mixtures of annuals and perennials in spring, early summer or late fall. Fall planting should be late enough so that seeds do not germinate until spring. Perennials can also be sewn in early fall provided that there are at least 10-12 weeks of growing time before the plants go dormant for the winter. Late fall plantings are advantageous when supplemental irrigation cannot be provided and adequate rainfall is anticipated in the spring. In mild climates, plant during the cooler months of the year, fall through spring, for best results. Fall plantings done prior to periods of rainfall will insure an early display of flowers the following spring.

### **Site Preparation**

**Proper site preparation is important for prompt germination of seed and healthy growth of seedlings.** Best results will be obtained by planting on cleared ground. Remove existing vegetation to avoid competition from other plants. This may be done by pulling, tilling under, spraying with a general herbicide, or by a combination of these methods, depending upon the size of the area, type and density of vegetation and other factors. Loosen soil by scraping, tilling or scarifying. Tilling should be used utilized only when soil is very compacted and further weed control measures can be taken.

### **Seed Application**

Method of application depends on the size of the area and the terrain. On small areas, broadcast seeds evenly either by hand or by use of a drop or cyclone spreader. It is helpful to mix in a carrier such as clean dry sand with the seed; sand adds volume and aids in even distribution of your seeds. We recommend using a ratio of 1 to 2 parts sand to 1 part seed. Rake in lightly covering seeds to a maximum depth of 2-3 times their thickness. Or drag the area lightly with a piece of chain length fence to mix the seed into the surface of the soil. For seeding large areas over one acre, specially designed seed drills are most effective. Drill to a maximum of 1/4 inch and firm soil with a culti-packer; this maximizes seed/soil contact.

### **Moisture**

All seeds, including wildflowers, need ample moisture to germinate and to develop into healthy seedlings. Best results will be obtained by soaking the planted areas thoroughly and maintaining consistent moisture for 4 to 6 weeks -- then gradually reducing watering in non-irrigated situations, plant in the spring or before periods at anticipated rainfall. After seedlings are established, watering may be reduced depending on the climate and rainfall. In arid climates or during drought conditions, up to 1/2 inch of supplemental water per week may be required to maintain an optimal display. If weeds are present, remember that they benefit from moisture as much as the wildflowers and may dominate over watered areas.

# Commercial Growing Supplies

Please call for shipping charges on Jiffy products which are shipped direct from Jiffy to you. Prices may change at any time of the year due to availability.

## Jiffy-7 Peat Pellets

Pot and planting mix in one. Compressed pellets of peat moss expand when wet to form self-contained pots for direct-seeding, transplanting or sticking cuttings. Provide conditions for better root development and growth, consistent plant quality. Won't fall apart; transplant as is without disturbing roots. Expanded size 2 1/8" x 1 3/4" across.

### 9978 Jiffy-7 Peat Pellets for Florists (42mm)

Larger opening for sticking cuttings; also fine for seedlings. Case of 1,000 pellets (weight: 26 lbs.)

**\$106.25/case plus delivery**

## Jiffy® Peat Pots

Compressed natural sphagnum peat moss and wood fiber combined to form biodegradable, lightweight pots you can set right into ground without disturbing roots, minimizing transplant shock. Pots contain nutrients for better plant growth.

### 9954 Pots, 2" round. \$148.20/case plus delivery

Case of 2,816 pots (weight: 27 lbs.)

### 9956 Pots, 3" round. \$106.70/case plus delivery

Case of 1,404 pots (weight: 27 lbs.)

### 9960 Pots, 2 1/4" square. \$148.20/case plus delivery

Case of 2,560 pots (weight: 27 lbs.)

### 9962 Pots, 3" square. \$146.70/case plus delivery

Case of 1,260 pots (weight: 26 lbs.)

## Jiffy® Strips

Same pots described above; 2 1/4" square. Joined together in strips of 12 for quicker, easier handling; more economical, too.

### 9968 Peat Strips, 2 1/4" square.

Case of 200 strips/2,520 pots (weight: 26 lbs.)

**\$146.00/case plus delivery**

**Please note: Otis S. Twilley Seed Company, Inc. does not offer any genetically engineered product in this catalog.**

## Planting Information

1 acre = 43,560 square feet

To determine the number of seeds to plant per acre, multiply the number of seed you intend to plant per foot by the feet of row per acre as shown in right hand column below. For example, if you plant 10 seeds per foot in rows 12 inches apart - 10 x 43,560 = 435,560 seeds.

Distance Btwn Rows	Ft of Row per Acre
12" .....	43,560
14" .....	37,337
16" .....	32,670
18" .....	29,040
20" .....	26,136
30" .....	17,424
40" .....	13,068
60" .....	8,712
72" .....	7,260

## Plastic Plant Labels

Durable, flexible, unprinted white plastic labels 4" x 5/8".

9964 Pack of 200 \$16.15/each

9986 Pack of 1,000 \$87.30/each

## Twist-Ems Ties

Economical, continuous handy roll for tying all plants, vines and vegetables.

Ideal for use in flower arrangements. Easy to cut to any length. 200 ft. roll.

9985 \$10.35/each

### Hardiness rating

VT = very tender; killed by frost; could be damaged by temperatures under 40

T = tender; killed by frost

MH = moderately hardy; survives light frosts

H = hardy; survives frost usually into the low twenties

VH = very hardy; will overwinter if protected

# All-America Selections Trial Gardens

Twilley Seed owners, George and Barbara Park contribute knowledge and a passion for growing to All America Selections, the country's most prestigious home garden testing program. Independent judges across the U.S. compare blind entries to similar tried-and-true varieties and carefully score each one to determine AAS winners. Judges look for many elements of success, including total yield, disease resistance, length of harvest, novel color or flavor and overall performance. Twilley Seed is honored to have the opportunity to host a trial garden every year. Keep an eye out for the AAS Winner symbol throughout this catalog!

## All-America Selections Winners

### Regional

Acknowledging that geographic differences are an important part of agriculture, AAS rewards entries that have superior regional performance. A variety that performs well in a specific area or region gives the consumer greater potential for success. To keep the regional division fairly simple, North America was divided into six regions: *Northeast, Southeast, Great Lakes, Heartland, Mountain/Southwest, West/Northwest*.

**Marigold**  
**Big Duck Orange F1**  
Heartland

**Shallot**  
**(Echallion) Creme Brulee F1**  
Southeast/Great Lakes/West/Northwest

**Tomato**  
**Mountain Rouge F1**  
Northeast/Southeast/Heartland

**Petunia**  
**Evening Scentsation**  
Heartland/Great Lakes/West/Northwest

# All-America Selections Winners

## National

For years, Twilley has been proud to offer you the AAS winners — and they have been wonderful performers. We confidently recommend these newcomers as excellent varieties for pack, pot and garden. Grow and feature them because your customers will ask for them by name due to widespread press coverage.

You'll see a difference in your profits!
