

ANNOUNCING

Very Affordable, easy-to-use
Construction Estimating Software:

The Production Rate Calculator for Metal Stud Framing™

Estimate **virtually any metal stud framing configuration** ANY SIZE, ANY GAGE:
(1-5/8"-25 gage through 16"-10 gage)

Estimate **AUTOMATICALLY** - within seconds - with fine-tuned accuracy.

Initial set-up (calibration to accommodate your specific needs) takes just a few minutes with very simple, step-by-step instructions.

The calculator automatically generates both labor unit pricing and production rates based on two basic inputs. Select the stud size and gage; then type in two numbers:

1. Wall Height (or total length of stud if it's not a wall)
2. Number of connections (pieces of track, etc.)

Click on the link below to download (an Excel® File) for a sneak peek at a few **FREE SAMPLE screen-shots**:
