

HANNIBAL

The logo icon consists of two stylized white warehouse racks connected by a horizontal line, set against a dark red background.

Industries Inc.

DYNAMIC STORAGE SOLUTIONS

TUBE RACK

FEATURES + BENEFITS

- More capacity in both seismic & non-seismic zones
- Impact Resistant
- Reduces product shedding in the case of impact of seismic events
- Better tolerances and easy to splice
- Superior solution for inferior building slabs
- 1" Beam Adjustability
- Lower Freight Costs
- Modular design allows future flexibility
- High Quality Powder Coated Finish

TEARDROP OPTION

TUBERACK TEARDROP OPTION

The Hannibal Patented TubeRack system provides a stronger, safer and smarter alternative to conventional racking systems.

TubeRack can be used for all of our storage solutions such as Selective, Double Deep, Push Back, Pallet Flow, Drive-in, Pallet Shuttle, GlideRack, Archive, Retail and AS/RS systems.

The Teardrop option offers impact-resistant structure for lighter storage items.

STRUCTURAL

Structural Pallet Rack is manufactured from heavy-duty hot rolled structural steel to withstand the most rigorous of applications. The S Series is available in various sizes and capacities to meet stringent requirements.

FEATURES:

- Heavy-Duty Bolted Connections
- Low Maintenance
- 1" Beam Clip Adjustability
- Impact Resistant
- High Quality Powder Coat Finish

ROLL-FORMED

Roll-Formed Selective Pallet Rack is the most flexible and extensively used pallet rack in the material handling industry. We offer a wide variety of styles, sizes and gauges to meet most capacity and seismic requirements.

FEATURES:

- Fast Clip Beam Attachment
- Compatible with Most Brands
- Welded Frame Design
- Cost Effective
- Flexible Applications
- High Quality Powder Coat Finish

HYBRID SYSTEMS

Hybrid Systems combine the strength and durability of structural frames with the flexibility and cost effectiveness of roll-formed beams.

FEATURES:

- Cost Effective
- Impact Resistant
- Bolted Connection
- 1" Beam Clip Adjustability
- High Quality Powder Coat Finish

PUSHBACK

Hannibal Pushback Systems are manufactured using heavy duty structural tube support rails combined with encapsulated flanged wheeled carts.

FEATURES:

- Up to 3,000 lbs. Capacity
- 2 – 6 Deep Systems
- Flanged Wheel Design with Tube Rails
- Maximizes Storage Capacity
- High Quality Powder Coat Finish
- Rail Drops onto Welded Cleats
- Flanged Steel Wheels
- Strongest Wheels in the Industry

DOUBLEWIDE DRIVE-IN

Doublewide Drive-In offers a unique racking system designed for maximum space utilization and productivity. Hannibal provides turnkey design, seismic analysis, high quality manufacturing and installation.

INDUSTRIES USED IN:

- Beverage
- Agricultural (Fruits & Vegetables)
- Import & Export Facilities
- 3rd Party Logistic Centers
- Grocery
- Dairy
- Food Services
- Food Manufacturing
- Bulk Product Handling
- Petroleum, Chemical and Paint

DRIVE-IN

Hannibal's Drive-In Systems allow a significant increase in pallet storage density for high volume SKUs.

FEATURES:

- Maximizes Storage Capacity
- Space Saver Arm Design
- Roll-Formed or Structural Systems
- Heavy-Duty Saddle Connection
- High Quality Powder Coat Finish

CANTILEVER

Cantilever Racks are ideal for storage of long, bulky products such as carpet rolls, lumber, pipe, tubing and other similar products. Hannibal's Cantilever Racks are available in a heavy-duty structural or medium duty roll-formed design.

FEATURES:

- Strong, Safe, Economical
- Wide Variety of Options Available
- High Quality Powder Coat Finish

SAFETY ACCESSORIES

Hannibal's accessory and specialty products provide multiple solutions for your storage and rack protection needs.

PALLET BACKSTOP

Tube and Structural design provides a safe way to inform the forklift driver they've reached the back of the pallet racking.

END ROW PROTECTOR

Structural steel tubing design reinforces the cross bracing's durability on structural and roll formed frames. Bolt on at any height.

END ROW GUARDS

Heavy-duty welded design can be bolted to floor for maximum protection. Standard and custom sizes available.

BOLTED COLUMN PROTECTOR

Tube and Structural design provides a safe way to inform the forklift driver they've reached the back of the pallet racking.

SIDE COLUMN PROTECTOR

Used on roll-formed racking to reinforce durability with a 3-pin connector for teardrop connection.

BOLLARDS

Heavy-duty welded steel tubing provides long lasting protection indoors or outdoors.

Size:

5" Round x .134 wall thickness

Height:

40"

Footplate:

7" x 7" x 7"

Protect your employees and pallet rack systems from forklift damage with Hannibal's line of racking protection accessories.

MANUFACTURING CAPABILITIES

Hannibal storage systems are made to meet or exceed the requirements of the Rack Manufacturers Institute (RMI).

We hold a City of Los Angeles Fabricators License, one of the most stringent manufacturing certifications in the U.S.A.

All company welders are certified by the American Welding Society through an accredited AWS testing facility.

All systems receive the finest powder coat paint finish in the industry. Custom design and colors available.

Hannibal racking systems are made in the U.S.A.

COMPANY HISTORY

Hannibal Industries, Inc. is the largest U.S. manufacturer of steel pallet rack west of the Mississippi River. A diverse and evolving product line has enabled us to provide turnkey storage systems to some of the largest big box retailers, archive storage and food and beverage operations in the world. Our dealers, distributors and manufacturing representatives work in concert to ensure each project receives the best overall expertise and project management.

ENGINEERING & DESIGN SERVICES

- System Design
- Seismic Engineering
- Permit Administration
- In-House Installation
- Custom Fabrication
