

Load Lots are marketed at **1:00pm on the SECOND TUESDAY** of most months (in conjunction with the regular cattle auction). Cattle marketed in these lots average **between 550-700 lbs** and must be preconditioned according to the specifications in this document.

Calves not matching the parameters for a given load lot (too light/heavy, heavy ear/pigmentation, frame differences, etc.) will have the option to be taken back by the seller or sold following the load lot, carrying ear tags and described as adhering to preconditioned protocol.

Load Lot Sale Requirements

1. All calves must be weaned **at least 45 days prior to sale.**
2. All calves must be either heifers or steers (properly castrated and healed)
3. Heifers must be **guaranteed open** (a \$100 fee will apply to bred heifers).
4. Calves may be implanted or non-implanted
5. All calves must be **dewormed** within the last 60 days
6. Calves must be identified with a CCALE EID-tag; Steers in the right ear, heifers in the left ear.
7. No horned or exotic cattle (excessive ear/navel/dairy influence/etc.)

Last vaccine must be administered at least 2 weeks prior to Sale Date

8. All calves must have received **two rounds of a respiratory vaccine.** *At least one round must be with Vista Once SQ- modified live vaccine (MLV) containing IBR, BVD Types 1&2, BRSV, and PI3 w/ Pasteurella Multocida & Mannheimia Haemolytica
9. All calves must have received **two rounds of a Clostridial vaccine including Somnus**

Respiratory & Clostridial vaccines may be administered together

****For optimal animal health, cattle should not be vaccinated in a heat index above 85°F and should be handled using low stress practices****

Cattle must be received between 8:00am and 10:00am on the day of shipment. Cattle will be weighed upon arrival with a 2% shrink.

We request cattle be consigned 1 week prior to the sale date.
