

Vetgene Surface Cleaner

Vetgene can be used on all common hard surfaces that are used in vet clinics, pet stores, animal handling facilities or intensive animal farming installations.

Vetgene is a highly effective cleaner for use on all common hard surfaces in vet clinics, animal housing and high production farming systems, Vetgene Surface Cleaner is proven to be effective against dirt, grime, and a wide variety of soils.

When diluted, Vetgene solution is near pH neutral so will not harm surfaces even after extended contact, yet it is proven to clean a wide range of soils at a dilution rate of 50 to 1 with water. At this dilution rate Vetgene Surface Cleaner is very cost effective while still providing excellent results.

Vetgene products are manufactured in New Zealand which insures a stable and reliable supply.

Directions for use

Never mix this product with other chemicals as effectiveness will not be assured.

- 1) Remove all equipment, bedding, etc. remove any gross soils by manual scraping and discard hygienically.
- 2) Dilute the Vetgene Surface Cleaner to a rate of 50 to 1 with clean water using either a spray bottle or cloth and wipe or scrub the entire area. Allow to contact the surface for at least one minute.
- 3) Wipe out the area or rinse clean the area to remove the cleaning solution.
- 4) Leave the area to dry thoroughly or dry with a clean towel.

This product is safe to use on all common hard surfaces that are used in vet clinics, kennels or intensive animal farming installations. Vetgene solution will not harm plastics, aluminium, stainless steel or fabrics at correct dilution rates.

General Cleaning

- 1) Remove all gross soils by scraping or pre rinsing the surface to remove most of the soils
- 2) Dilute the Vetgene Surface Cleaner

General Cleaning	Dilute 50 to 1 with warm or cold water
Heavy Cleaning	Dilute 20 to 1 with warm or cold water
- 3) Apply the solution to the surface to be cleaned allow to penetrate for up to 5 minutes, scrub or wipe the area thoroughly to loosen any hard to move soils.
- 4) Rinse the surface clean and allow to drain or wipe dry with a clean towel.
- 5) To disinfect the surface after cleaning spray the surface with Vetgene Surface Sanitiser onto the surface until damp, leave in contact with the surface for one minute and rinse the surface with potable water.

Cleaning of animal food and water bowls

This must be done at least on a daily basis or whenever the food or water bowl becomes contaminated with faeces or urine.

Remove the bowl from the enclosure and remove any of the gross contamination from the bowl by scraping. Wash the bowl with warm water and Vetgene Surface Cleaner to remove any of the remaining soils, rinse well and then place in a solution of Vetgene Surface Cleaner and water at a rate of 50 to 1. Allow to soak for at least 1 minute, remove from the soaking solution and rinse well. Allow to dry and then reuse when required
