Writing Style and Standards in Undergraduate Engineering Reports: The Online, Annual Edition (ISSN: 2643-6272) is based on the eBook of *Writing Style and Standards in Undergraduate Engineering Reports, 4e*.

The difference between the two *titled* projects is as follows:

- *Writing Style and Standards in Undergraduate Engineering Reports: The Online, Annual Edition* is assigned an ISSN (2643-6272), rather than a book ISBN, just like a journal publication, so it may be more easily ordered directly by Schools of Engineering from the Publisher or by Engineering Libraries via a subscription agent.
- Online access is provided institution-wide to all engineering students via the university's IP address ranges or Learning Management System.
- Our discounted institutional pricing makes the institution-wide access option much more affordable and immediately available to students.
- Continual updates and new materials can be added throughout the year.
- Online access is renewed on an annual basis.
- And of course, if instructors are only interested in the printed book (ISBN: 978-1-932780-18-5) or ebook (ISBN: 978-1-932780-20-8) of *Writing Style and Standards in Undergraduate Engineering Reports, 4e*, for a specific course, then usual book ordering procedures apply.
