UNITED
PUMPS

Manufacturers and Reconditioners of
Pumps and Rotating Shaft Equipment

Introduction

United Pumps Ltd, has Supplied Quality Products and Services for many years, including design solutions and technical advice to contractors for small or large projects in New Zealand and overseas.

Our Qualified Sales and Service technicians provide a friendly and personalized service to ensure total customer satisfaction.

In addition to our United Pumps proprietary UNIFLO brand products, and as an independent supplier of pumps, we work closely with international pump manufactures to insure we are meeting the requirements, and high standards of the New Zealand and overseas markets.

Through off shore associations United Pumps has become a major importer and national distributor for many other pump manufacturers, and their associated spares.

Direct purchase from manufacturers enables us to offer competitive pricing to New Zealand, Asia and the Pacific Rim while ensuring regional shipping cost is kept to a minimum with supply arranged directly from the manufacturer.

United Pumps Ltd has supplied contractors with pumps and pump sets for many Customers throughout New Zealand.

Company Profile

United Pumps is synonymous with the tradition of first class engineering throughout the world. Our pumps and pump systems for heating, cooling, air conditioning, water supply and sewage disposal are used in commercial buildings, municipal facilities, industry and of course also in private homes.

Working closely with our customers over time, we have expanded our knowledge beyond pumps to become full system specialists. This knowledge forms the basis for solutions tailored specifically to the needs of our customers.

Pumps and pump systems by United Pumps convince due to their high quality and technology that sets standards. Individual customer requirements and current market developments have frequently triggered innovations for highly successful product developments.

United Pumps has the experience and knowledge to supply you with the right monitoring and control equipment to make your pumps & pump stations function optimally with our pumps for your application.

QUALITY

United Pumps is synonymous with efficient, versatile products of the highest quality. Before a product is released it is subjected to meticulous performance tests. Only after passing those tests is it issued with our test certificate.

With a seamless range of services, from consulting and engineering through installation and testing all the way to after – sales service – no matter whether it is an individual component or a ground-breaking new system for the entire process of fluid handling.

United Pumps Products

Each United Pumps unit is assembled from perfectly matched Components, motors and hydraulic end modules in order to achieve maximum efficiency and economy.

Our dedicated sales and service teams build quality long-term relationships because we understand the importance of being reliable, innovative and an effective partner helping you achieve success.

As each application of our products is unique, our sales and service team aim to create solutions to meet your needs. Our business is focused on value added customer service where we become an integral part of your project.

Our specialist team will provide you with knowledge, skills, extensive resources and analysis of your application to assist you in the selection of the most appropriate product.

In designing fluid management systems, United Pumps has a wealth of knowledge. Our engineering services also include performance testing on site or in the workshop. The workshop facilities enable test rigging of dry mounted and submersible pumps. Hydrostatic testing to ensure all new pumps are up to stringent United Pumps standards is also available.

Providing good service comprises a number of elements, a fast and efficient response, spare parts being available immediately, getting customers systems up and running again as soon as possible. These are all areas in which United Pumps excels!

Product Types

High Pressure Boiler Feed Pumps . End Suction Centrifugal Pumps. Hot Water Circ Pumps .
Peripheral Vane Turbine Pumps .
In Line Pumps . Dewatering Pumps . Sump Pumps . Split Case Horizontal Pumps .
Back Pullout Pumps . Magnetic Drive Pumps . Diaphragm Pumps .
Screw Pumps . Injection Pumps . Booster Pumps . Pressure Tanks . Pressure Switches .
Valves . Drive Couplings .
Flexible Pipe Couplings. Electric Motors . Gearboxes . Jets . Deep Well Jet Pumps .
Shallow Well Jet Pumps. Vortex Pumps . Submersible Wastewater Pumps .
Open Impeller Pumps . Piston Pumps . Desalination Pumps .
Slurry Pumps . Fire Fighting Pumps . Marine Pumps . Cargo pumps.
Ballast Pumps . Irrigation Pumps . Bilge Pumps . Hand Pumps .
Hydrocarbon Pumps. Injection Pumps . Progressive Cavity Pumps . Hygienic Pumps .
Metering Pumps . Vacuum Pumps . Jet Pumps . Pool Pumps . Pool Filtration Equipment .
. Diesel Driven Pumps . Petrol Driven Pumps .
Hydro turbine Generators . Ultra Violet & Ozone Systems . Monitoring & Control Systems .
Aeration Pumps . Blowers . Solids Handling Submersibles . Grinder Pumps . Cutter Pumps .
Propeller Pumps . Mixers . Aerators . Recirculation Pumps . Pressure Drainage Systems .

Pumps and Rotating Shaft Equipment

UNIFLO PUMPS

United Pumps Ltd, are the Proprietary Manufacturer of the UNIFLO range of centrifugal pumps registered Trademark.

UNIFLO Pumps are available in end suction or inline Bare Shaft and Close Couple configuration, and are manufactured to International Standard EN733 (incorporating DIN 24255)

DIN 24255 pumps are very reliable in pumping clean and cloudy water for industrial applications, and have been regarded with excellence in many industrial applications for over 50 years.

UNIFLO Pumps have component compatibility with many other EN733 (DIN 24255) standard pumps, eg: Wilo N models, KSB Ajax 'E' Series, Regent Dinflow & Dinbloc pumps, MacEwans Dinflow & Dinbloc pumps, and Davies DB & DBC model pumps.

Uniflo DIN 24255 pump sets are assembled in Auckland New Zealand using local suppliers for motors, seals and other components.

United Pumps carry an extensive stock of spares in support of all local DIN 24255 pumps in service nationwide.

Customers Who Trust Our Products

Manufacturers and Reconditioners of Pumps and Rotating Shaft Equipment

Today and into the future, United Pumps focuses on designing and manufacturing environmentally sound products that are in harmony with nature and sustainable development. Products that create a better working environment for the people who use them and that perform efficiently and consume a minimum of energy.

We Build on Experience.

We bring together years of applied knowledge, theoretical experience and all-round experience in the field of fluid control systems. We always take great care to ensure that the insights gained in working on numerous projects are passed on to all our employees. We focus our curiosity, passion and commitment on one goal; to provide solutions that take your company that essential step forward.

We aim to exceed your expectations, to make it happen with enthusiasm and efficiency, not just to look forward but to move forward, to challenge conventional wisdom, to do things differently, to tackle problems others think are impossible, and to never give up when the going gets tough. We demonstrate these strengths time and time again. Our wealth of experience is the solid platform on which our business is based. It allows us to turn our enthusiasm and efficiency into creativity, covert off beat ideas into surprising innovations and put together individual components to create completely new systems that open up unexpected possibilities.

Take advantage of our experience, even if the problem seems irresolvable, challenge us, put United Pumps to the test – it is the tough challenges that drive us, moving you and us forward.

United Pumps Ltd
UNIFLO Pump Range

The advertisement features a central graphic with the text 'United Pumps Ltd UNIFLO Pump Range' in white on a blue background with a glowing arc and binary code. Below the text is a grid of six images showing various blue industrial pumps. In the top left corner of the grid, there is a red pump. The pumps shown include different models of centrifugal pumps, some with motors, and some with various inlet and outlet configurations.

Manufacturers and Reconditioners of Pumps and Rotating Shaft Equipment

Modern Manufacturing Facilities

High efficiency manufacturing to the most exacting tolerances.

Advanced Design Capability

Highly Qualified Engineers utilizing the latest CAD design software to produce high performance & efficient products.

WORKSHOP SERVICE

United Pumps workshop facilities are equipped with full test tank facilities to ensure guaranteed quality and performance of your equipment. We ensure that your pump is working reliably before it leaves the workshop. Our priority is to return your equipment to you as soon as possible in the best possible condition.

SPARE PARTS IN STOCK

United Pumps maintain large stocks & provides guaranteed quality and performance on all genuine parts. We are synonymous with efficient, versatile products of the highest quality.

ON SITE SERVICE

Our fleet of service vehicles, including truck/ crane facilitates on site servicing. Regular maintenance servicing and repairs of your pumping equipment, where practical, are done on site.
