Baumer
Passion for Sensors

Innovative Sensor Solutions
Product overview

Partnership.
Precise.
Pioneering.

Visibly better: Baumer sensors.

The Baumer Group is leading at international level in the development and production of sensors, shaft encoders, measuring instruments as well as components for automatic image processing. As an owner-managed family business, we employ about 2700 workers worldwide in 38 subsidiaries and 19 countries. With marked customer orientation, consistently high quality and vast innovation capability, Baumer develops specific solutions for many industries and applications worldwide.

Our standards – your benefits.

- Passion coupled with expertise – both have made us a sensor pioneer and technology leader
- Our range of services is hard to beat – we have the right product, developed by our own team, for every task
- Inspiring through innovation – a challenge Baumer employees take on every day
- Reliability, precision and quality – our customers' requirements are what drives us
- Partnership from the start – together with our customers we develop suitable solutions
- Always a step ahead – thanks to our production depth, our flexibility and our delivery reliability
- Available worldwide – Baumer is Baumer everywhere

Object detection

Sensors, proximity switches and light barriers for object and position detection.

Inductive proximity switches

The proven solution for safe, non-contact detection of metal objects

Capacitive sensors

Proximity switch for non-contact detection of liquid as well as solid objects and bulk solids

Light barriers and light sensors

Unique reliable object detection and positioning with Baumer optical sensors

Fiber optic sensors and fiber optic cables

Always close to the action – detecting tiny objects in cramped or inaccessible places

Ultrasonic sensors – the most versatile object detection

Undisturbed by difficult environmental conditions and varying object properties

Magnetic and cylinder sensors

Long-distance detection of magnetic fields

Edge measurement and detection

Number 1 in flawless edge detection

Precison mechanical switches *My-Com*®

Micrometer precision – 70 times more accurate than a hair is thick

Distance measurement

Sensors for detecting distances and distance information
from the µm range to over 40 m.

Optical distance sensors

Precise distance, spacing and position measurements even on challenging surfaces

Ultrasonic distance sensors

Accurate distance measurement regardless of material, surface, color or transparency

Inductive distance sensors – *AlphaProx®*

Measure distances on metal objects accurate to a micrometer

Content

Linear magnetic encoders

Non-contact length measuring operations, cost-efficient and precise.

Measuring wheel encoders

The efficient and reliable solution to measure length

Cable transducers

Linear travel measurement made easy. Easy installation, reliable results

Accessories

An easy and quick way to optimal functionality

Inductive proximity switches

Cylindrical inductive proximity switches for factory automation

The proven solution for safe, non-contact detection of metal objects

- Very small sensors with all integrated evaluation electronics and large sensing distance
- Sturdy, maintenance-free and durable
- Always the right sensor thanks to a wide variety of variants
- Millions of them in use - highest precision and guaranteed reliability thanks to over 40 years of experience

Capacitive sensors

Capacitive proximity sensors in metal housing

Proximity switch for non-contact detection of liquid as well as solid objects and bulk solids

- High switching distance up to 30 mm even through non-metallic walls
- Absolutely reliable even when interfered by ambient conditions, e.g. ambient light or dirt
- Absolutely reliable detection of objects such as wafers, PCBs, paper stacks or hot adhesives up to 200 °C

Light barriers and light sensors

Standard sensors – rectangular and cylindrical

Unique reliable object detection and positioning with optical sensors

- Find the optimum solution quickly through large portfolio
- Easy to set up with clever teach-in function
- Laser sensors for detection tasks in the 0.01 mm range

SmartReflect® – the light barrier without reflector

With *SmartReflect*® Baumer has reinvented the optical light barrier: The reflector as the weak point is eliminated and highly reliable object detection is still guaranteed even for transparent objects. That reduces your costs tremendously.

Your benefits

■ Maximum system uptime and process safety
- Very reliable object detection thanks to barrier principle
- Elimination of the reflector as a potential source of error
- No function impairment through dirt accumulation
- Available in robust washdown or hygiene design

■ Reduction of operating costs
- No reflector means time saving installation
- No need for a reflector eliminates exchange and wear
- No need for a reflector eliminates cleaning effort

■ Raising productivity
- Sensing range up to 1.9 m or 1 m for transparent objects
- High machine performance thanks to short response times of < 0.25 ms
- Fast format changes, easy sensor exchange and additional usage data via IO-Link
Light barriers and light sensors

Transparent detection

The sensor solutions for the detection of bowls, bottles and foils

- Extremely safe and fast with a response time < 0.25 ms
- Unique range without reflector up to 1 m
- Up to 7 m range with retro-reflective light barriers
- In plastic, hygiene or washdown design, depending on the surroundings

proTect⊕

The *proTect*+ impermeability concept by Baumer ensures absolute dependability even under most adverse conditions. Thanks to the specifically conceived construction and the use of high-quality materials, sensors with *proTect*+ provide IP 69K protection and ensure absolute stability even after countless temperature cycles. In order to achieve this, the sensors have been shock-tested over the entire temperature range. The *proTect*+ concept ensures enhanced reliability and extended sensor service life.

Cylinder sensors

- Detecting stop positions of pistons in every standard cylinder with C- or T-slots
- Different versions and versatile installation accessories for maximum flexibility
- Non-contact sensing and absolutely wear-free

Hall and magnetic rotary sensors

Hall and magnetic rotary sensors

- Detection of speed and rotation direction at gear wheels
- Absolute acquisition of part location up to 360° rotary angle
- Wear-free and thus extremely low-maintenance
- Particular robust variants available
- High resolution

	MHRM 12 / 18	MTRM 16 / MTR
function	hall sensors	hall sensors
features	■ Detects gears and racks ■ Sealed metal housing ■ Operating temperature range −40 ... +120 °C	■ Detection of rpm speed and rotational direction of gear wheels ■ Completely sealed metal housing ■ Operating temperature range −40 ... +120 °C
dimensions	M12 × 1 M18 × 1	ø 16 mm
working distance max.	2 mm	2,5 mm
switching frequency / response time	20 kHz	20 kHz
resolution	starting from module 1	module 1 to 3
output	push-pull	push-pull
connection types	cable 2 m connector M12	cable 2 m
housing material	brass nickel plated stainless steel	brass nickel plated stainless steel 1.4404

Distance measurement

Sensors for detecting distances and distance information from the μm range to over 40 m.

Content.

Photoelectric sensors

Optical distance sensors

Precise distance, spacing and position measurements even on challenging surfaces

- Fast, accuracy in the submicrometer range and distances of up to 13 meters
- Reliably even on very rough, shiny or dark surfaces
- Very high ambient light immunity
- Large selection of performance classes, sizes and beam shapes

	OADM 12	OADM 13	OADM 20	OADM 20	OADR 20

Radar sensors

Radar distance measuring sensors

Precise measurements in the most extreme environments

- Smallest radar sensor with very narrow beam profile
- Reliable distance measurement up to 40 m even in harsh environments and when covered with dirt
- Available in Europe, USA and Canada

	RR30.DA (122 GHz)
	for flat or round objects to 40 m
features	- Parallel analog and switching output - Narrow opening angle
dimensions	M30 × 107 mm
measuring distance	0,3 … 40 m
response time	< 1 mm
output	4 … 20 mA / 20 … 4 mA + push-pull 0 … 10 V / 10 … 0 V + push-pull
adjustable parameters	Measuring distance, switching points via *qTeach*
connection types	connector M12 5 pin
housing material	stainless steel
operating temperature	−25 … +65 °C
protection class	IP 68/IP 69K

Ultrasonic sensors

Miniaturized ultrasonic distance sensors

Small and light – for cramped spaces and very small openings

- Smallest and lightest ultrasonic sensor weighing only 4 grams
- Large selection of round and rectangular designs
- Measuring ranges up to 400 mm
- Narrow sonic beam angles for measurement in very small openings

	UNAM 12	IO-Link UNDK 09 UNCK 09	UNDK 10
category	miniature	miniature	miniature
features	■ Narrow and wide sonic beam angles ■ External Teach-in ■ M12 connector	■ High resolution ■ Minimal blind region ■ RS 232 ■ Various mounting options ■ Flat housing ■ Narrow sonic beam angle for detection in openings of up to 3 mm	■ Smallest ultrasonic sensor ■ Internal and external Teach-in ■ Very low weight: 4 g ■ Narrow sonic beam angle ■ Cable and flylead connector versions
dimensions	M12	8,6 × 48,8 × 57,5 mm	10,4 × 27 × 14 mm
measuring distance	20 ... 400 mm	3 ... 200 mm	20 ... 200 mm
response time	< 10 ms	< 7 ms	< 15 ms
resolution	< 0,5 mm	< 0,1 mm	< 0,3 mm
repeat accuracy	< 0,5 mm	< 0,5 mm	< 0,5 mm
output	0 ... 10 mA / 10 ... 0 mA 0 ... 10 V / 10 ... 0 V	0 ... 10 V / 10 ... 0 V RS 232	0 ... 10 V / 10 ... 0 V

specific features	■ with or w/o sonic nozzles	■ with or w/o sonic nozzles ■ cascadable in 9 mm grid	■ wide range of accessories and installation options

Robust ultrasonic distance sensors with flexible parameterization

Extremely resistant and flexible parameterization for any application

- Highest process reliability due to hermetically sealed sensor element
- IO-Link functionality for flexible parameterization
- Short blind range of 70 mm with a sensing distance up to 1000 mm
- Highest quality with high economic efficiency

Linear bearingless encoders

Size 10 mm. Unlimited measuring range.

- Non-contact, wearfree magnetic sensing technology
- Impervious to soiling and resistant against vibration
- Extended life span thanks to robustness and durability in extreme conditions
- Maximized machine and system uptime

	MIL10
category	Linear bearingless encoder
features	■ Linear measuring system ■ Output signals A 90° B with index pulse ■ Output circuit push-pull or RS422
size (sensing head)	rectangular
dimensions (sensing head)	10 x 15 x 45,5 mm
sensing distance	0,1 ... 0,6 mm
interpolation	factor 20, 50, 100
movement speed	<5 m/s (resolution 5 µm) <10 m/s (resolution 10 µm) <25 m/s (resolution 25 µm)
output circuit	HTL/Push-pull TTL/RS422
output signal	A 90° B, R + inverted
total resolution	5 µm (factor 4 evaluation) 10 µm (factor 4 evaluation) 25 µm (factor 4 evaluation)
system-accuracy	±(0,02 mm +0,04 mm x magnetic belt length)
connection	cable 2 m cable 0,3 m with connector M12
voltage supply	10 ... 30 VDC, 5 VDC ±5 %
operating temperature	−40 ... +85 °C
protection class	IP 66, IP 67

Measuring wheel encoders

The efficient and reliable solution to length measurement

- Programmable incremental encoders used in conjunction with measuring wheels
- Particularly easy acquisition of position and speed with high flexibility
- Perfect for ink jet and laser printing applications thanks to precise optical sensing

	MA20
category	Compact, high-resolution measuring wheel system
features	■ Measuring wheel encoder comprising encoder, tether arm and measuring wheel ■ Contact pressure fully adjustable
configurable parameters	16 pre-defined resolutions
configuration	HEX switch
sensing method	optical
dimensions (housing)	ø 40 mm (encoder)
voltage supply	4,75 ... 30 VDC
output stage	HTL/push-pull
output signals	A 90° B
shaft type	solid shaft ø 6 mm
connection types	flange connector M12, cable radial
pulses per revolution	100 ... 25 000
operating temperature	−20 ... +85 °C
protection class	IP 64
operating speed	≤ 3000 rpm
options	measuring wheels available with different rubber surface

	MR series
category	Measuring wheels
features	■ The perfect grip at any surface ■ Different surface profiles to match the application best ■ Circumference 200, 300 or 500 mm ■ For shaft diameter 4 ... 12 mm

Maximum flexibility through versatile configuration options.

	EIL580P-SC		Z-PA-EI-H
category	Incremental encoders – programmable resolution and signals	category	Handheld programming tool
features	■ Solid shaft with clamping flange max. ø10 mm or synchro flange max. ø6 mm	features	■ Simple and quick configuration ■ 4 user-assignable buttons ■ Intuitive menu navigation ■ Standard AA battery supply
configurable parameters	Pulses per revolution, output stage HTL or TTL, zero pulse, signal sequence		
configuration	Programming software, programming tool		
sensing method	optical		
dimensions (housing)	ø 58 mm		
voltage supply	4,75 ... 30 VDC		
output stage	TTL/RS422 HTL/push-pull		
output signals	A 90° B, R + inverted		
shaft type	solid shaft ø 10 mm		
connection types	flange connector M23, radial / axial cable, radial / axial / tangential		
pulses per revolution	1 ... 65536		
operating temperature	−40 ... +100 °C		
protection class	IP 65, IP 67		
operating speed	≤ 12 000 rpm (IP 65) ≤ 6000 rpm (IP 67)		
max. shaft load	≤ 40 N axial, ≤ 80 N radial		
options	isolated hollow shaft, flange variant, connector variant		

Cable transducers

Linear travel measurement up to 50 meters.

- High linearity throughout the entire measuring range
- Measuring length up to 50 m
- High quality and extremely durable designs
- OEM and retrofit

characteristics	■ Self-adhesive or screw-mount reflectors ■ Circular or rectangular ■ All-metal reflectors ■ Ecolab certified types, resistant to cleaning agents	■ Self-adhesive tapes ■ Various widths and lengths	■ Apertures for various sensor types	■ For various sensor types

Beam columnators and deflector (Ultrasonic)	Beam columnators	Beam deflectors
characteristics	■ Replacement nozzles for sensors with sonic nozzles	■ Ideal for cramped spaces ■ Bends the sound 90°

Magnets	Cylindrical magnets	Rectangular magnets and rotors
characteristics	■ For all magnetic proximity switches ■ Magnets in various sizes and strengths ■ Magnetization along the cylinder axis ■ For ambient temperatures up to +180 °C	■ For magnetic rotary encoders ■ Magnets available individually or integrated in the rotor ■ Magnetization throughout the depth ■ For ambient temperatures up to +180 °C

Baumer – the strong partner.

We at Baumer are close to our customers, understand their needs and provide the best solution. Worldwide customer service for Baumer starts with on-the-spot personal discussions and qualified consultation. Our application engineers speak your language and strive from the start, through an interactive problem analysis, to offer comprehensive and user-compatible solutions.

We are close to you across the globe.

The worldwide Baumer sales organizations guarantee short delivery times and readiness to supply. Many of our customers are directly linked via our electronic order system with the JIT logistics process.

A worldwide network coupled with the most modern communication techniques enable us to deliver information quickly and transparently to decision makers in all Baumer locations.

Closeness to the customer for Baumer means being available for your needs anywhere and at any time.

Worldwide presence.
