

## CYCLOPS 10 INCH SUB

One of our most versatile subwoofers, incredible punch combined with a low frequency extension reaching right down to 25hz without any equalization. Features 16 mounting points allowing for wall, roof, under seat or floor mounting. All this in a footprint that seems impossibly small for such a powerful subwoofer

Wherever you choose to mount the sub it can be used in either a surface loading configuration. Which boosts lower frequencies. Or can be used with the driver facing outward for more punch.

Two Subwoofers can be linked together in parallel to be run off a single amplifier channel

Designed for the harshest environments including marine. IP66 rated when installed in a position that allows the grill to drain any excess water.

Like all of our products its made from the finest birch timber available.

## SPECS

350watts rms

8 ohms

ip66

16 threaded mounting points

Frequency range 25-250hz

Dimensions 34x34x12cm

Weight 10kg

Max spl 110db

Sensitivity 85db

18mm birch ply

Marine alloy grill

## Mounting info

Side bolts M8 1.25pitch x 35mm  
316 stainless steel. CSK Top and  
bottom M5 x 0.8 pitch x 25mm 316  
stainless steel CSK.
