

TOWN OF LA CROSSE
49th TERRACE TRAIL IMPROVEMENT PROJECT
ADDENDUM #3

Date: June 9, 2022
Project: 49th Terrace Trail Improvement Project
Contact: Town of La Crosse
Dianne Dubberly, Mayor
20613 North State Road 121
La Crosse Florida, 32658
Owner: Town of La Crosse
To: Prospective Bidders

Due to the significant number of questions, we are receiving concerning the bid, the deadline for submission of bids has been extended until Tuesday, July 12, 2022. Bids will be due 2:00 P.M. on Tuesday, July 12, 2022. The bids will be opened at the Town Council meeting at 6:00 PM July 12, 2022.

This addendum forms a part of the Contract Documents and modifies the original RFP Documents

This Addendum consists of two (2) pages.

Questions:

1. I am aware this is a lump sum job however there are quantities provided requesting unit prices. There are a few areas that the quantities provided do not appear to be accurate. The guiderail, sod and seed and mulch and sidewalk are a couple. There is no line item for turbidity barrier also. How should we apply quantities to these items.

RESPONSE: Item 27 has been added to the bid sheet “Miscellaneous Costs” please place the cost of any items not included in the other items on the bid form in this bid item. A copy of the revised bid sheet has been included as an attachment to this addendum.

2. The benches for this project have a note that states the owner will select them and the selected contractor will acquire and install them. Could we get the type and style of bench so that we can apply an accurate cost for this item?

RESPONSE: The Owner has set an allowance amount of \$1,250/bench. This includes the cost of the acquisition of each bench times three (3) benches. So, an allowance of \$3,750.00 for the acquisition of the three benches should be included in the bid. The cost of the installation of the three benches should also be included as a separate item in the bid.

3. We also need to have a location of electrical and water for the landscaping portion so the price to connect to these sources can be determined.

RESPONSE: There is no water or electric located in close proximity to the portion of 49th Terrace where the work will be carried out. The finished facility does not require water for irrigation or electrical power. The contractor shall use a watering truck to maintain the new vegetation for the length of time specified in the plans and specifications. Additionally, the contractor will need to use portable electrical generators to power their equipment during construction.

4. Can Biodegradable netting be utilized under the sod?

RESPONSE: Yes, if it is a truly biodegradable, organic/Jute type of netting product and not plastic mesh. Bidders will need to include the netting in their landscape submittal in the future, for review and approval.

5. I was looking through the qualifications for this project and didn't see any specifications for FDOT certification. With the project tying into SR121.

RESPONSE: DOT has stated "Since there is only a perpendicular connection to the sidewalk on the backside of our right of way, no permit is required". See E-mail from Adam Doyle dated Friday, February 14, 2020 included as an attachment with this addendum.

6. Can we close 49th Terrace to thru traffic for the duration of the project. We can work around the one residence at 202 Street. This should help move the project along quicker and safely.

RESPONSE: As long as continuous access to the residence located along 49th Terrace is maintained throughout the construction of the project, the road can be closed to thru traffic during the construction period.
