

**DESCRIPTION:**

A powdered, mildly alkaline cleaning compound containing inhibitor for steel and cast iron, is ideal when steel parts must be stored or submerged for extended periods of time.

Prevents rust and corrosion on ferrous parts between machining operations, before painting, or in final rinse after soak or spray cleaning. Leaves no oily film on metal surfaces, is ideal for applications where oil on parts cannot be tolerated.

**USE:**

This compound is a non-dusty granular product, is easy to handle and use, dissolves readily and completely. This compound is used at exceptionally low concentrations.

1 oz. per gallon (or less)

Adjust after observation of results.

**SPECIFICATIONS:**

Contains no chromates, cyanide, oils, solvents or emulsions.
