Blockchain Technology Applications
How Blockchain will enhance AI, Cloud & SAP

October 23, 2018 • CoWork Lab • Houston

As the potential uses of blockchain become more prevalent, the current discussions are how technologies like AI, Cloud and SAP will partner with blockchain to simplify processes and enhance already productive systems.

The first ever panel discussion to address this issue, our panel of experienced practitioners bring real-world examples of how blockchain can be applied successfully. Issues addressed but are not limited to:
- Defining how blockchain will enhance both AI and cloud computing
- Enabling interoperability, scalability and data-sharing
- Applying SAP and blockchain to simplify complex multi-party processes and create trust among participants
- Industry vertical applications: Finance, Healthcare, Supply Chain and more
- What to look for in regulations and guidance

Panelists:

Cody Burns, Blockchain Architect, Accenture

Nick Geoca, Founder, SU2 Blockchain Group

Sri Kode, Vice- President, North America, Techwave

Carlos A. Sanmiguel, Head of Knowledge, DS99 LLC & Co-Founder, Dayscript SAS

Facilitator: Stacey Mankoff, Managing Principal, The Mankoff Company & Founder, After the Bell Events
