

Our Construction Process

We handle all aspects of the project. Our process begins with us at The Original Shed & Garage Company, coming out to your place and looking at your site. Some projects need more than others but we handle it all, from building permits, creating plans (if needed) to fit your needs, to laying a concrete slab. If additional work is necessary we do have specific contractors you can use for electrical and/or plumbing, or you may get your own contractors to do the work.
