

The Benedictine School

Enjoy a rewarding career with The Benedictine School

The Benedictine School is a non-public school located on the Eastern Shore of Maryland. We serve students with Autism, Intellectual Disabilities, or Multiple Disabilities. Since 1959 the School has provided comprehensive services for and changed lives for countless individuals and their families through its day and residential program. The mission of Benedictine School is “Helping Children and Adults with disabilities to achieve their greatest potential.”

The Benedictine School is continually growing and has several positions available to meet the needs of our students:

The Behavior Specialist supports children and adolescents with developmental disabilities by guiding and supporting the school team through use of effective behavior assessments, behavior strategies, positive behavioral support plans, data collection and analysis of behaviors. The Education Assistant supports students who have developmental disabilities in the educational setting through all educational, vocational, and leisure activities. The Instructional Facilitator facilitates instruction through support for teachers and assistants throughout the school. This is accomplished through observation, research, modeling, direct instruction, and collaboration. This extends to IEP development and required school-wide assessments. The Speech Language Pathologist serves the communication development needs of students, within the total framework of the educational, vocational, social and daily living situations in which the student is expected to function. These services are most appropriately delivered through an interdisciplinary team process. The Crisis Team Assistant provides crisis intervention for students as needed during residential hours, and helps enhance the staff's capabilities to manage student behaviors through training, suite observations, and incident report investigations/debriefings. The Direct Support Professionals for School Residential Community supervises, supports and provides direction to children and adolescents with developmental disabilities, assisting them with daily living skills and during recreational activities.
