

# Particles in Matter

Name:

Period:

Sort through the colored pictures you have been given of various things. Underneath each jar, list the four things that are an example of that state of matter.

*SOLID*

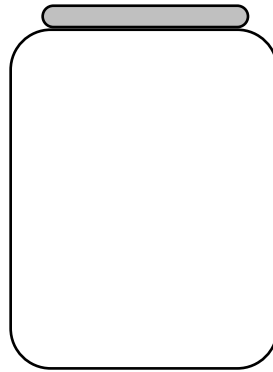

---

---

---

---

*LIQUID*

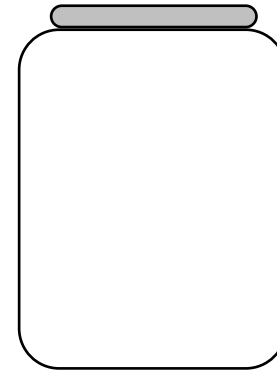

---

---

---

---

*GAS*

---

---

---

---

Then, use the web pages from the ACS (American Chemical Society) to investigate how particles are represented for solids, liquids, and gases. In the jars above, draw what the particles would look like for each state of matter.
