EMRx

FAST charting, customized workflows

Choosing an electronic medical records solution can be a frustrating process. You'd like to take advantage of new technology, but don't want to get stuck with a system that ignores your unique office workflow and slows you down.

With EMRx, we will help you implement a customized solution that will parallel the current workflow of your practice. The interface is designed by physicians, so it feels familiar and works just like you.

Here's why EMRx is the right system for you:

Simple solutions for complex workflows. EMRx was designed by physicians, and is fully customizable to match your workflow. From patient on-boarding to chart completion, e-prescription, and fully-integrated billing - there's only a single screen to navigate.

***Fast* patient encounters.** Physicians who use EMRx spend less time documenting each patient encounter, complete all charting in the exam room, and have more time to provide quality patient care.

Award-Winning Support. The EMRx customized implementation plan allows for comprehensive training while reducing the disruption in office workflow. You get help on *your* time and on *your* terms.

It's the right time, and EMRx is the right system for you.
