## WHAT WE DO AT EVO

We thrive to give the best possible customer service, our team of designers and engineers work to specific standards to reach the requirements of all types of conversions, from the police service to private sectors. We offer bespoke vehicle racking systems, designed and manufactured in house to fulfil the needs of our customers.

We design and build bespoke specialist storage systems, welfare trailers and surveillance units; all built to comply with government standards and regulations. We endeavour to make your experience as streamlined as possible therefore, we co-ordinate our services with other suppliers as needed.

## SPECIALIST VEHICLE CONVERSIONS

Design and operational engineers at EVO have, for many years, worked with fleet managers, user groups and specifiers within the police services of the UK, Ireland and other areas of law enforcement. Fine detail is employed in utilizing and installing the best suited components, and ensuring that national standards and local preferences are considered and handled appropriately. More recently specialist vehicle builds have been carried out for some overseas police and defence operators for use outside of the UK, based on the quality of design and build at EVO coupled with the value for money. Key to all of our work is the need for agreed completion dates to be achieved, which has long been one of our founding principles.

"The whole process was **faultless**, with no dates missed and all vehicles delivered in a **clean and fully complete** state."

**ONE-STOP-SHOP AVAILABLE  
WITH VARIOUS MANUFACTURERS**

"The **service and quality** of work was **excellent** and a credit to all those involved."

## OUR COMPANY

With over 15 years experience in the specialist conversion industry, EVO has worked in conjunction with blue light fleet organisations and built a high level of knowledge throughout the emergency service sectors. Our engineers complex skill set is used throughout all conversions to ensure the highest level of standards.

## & DECOMMISSIONING & DISPOSAL

Just as new vehicles are passed through the conversion and commissioning process, they will eventually come to the end of their 'primary life' and need decommissioning. The objective is to return each vehicle to its best level of appearance and pass this through the re-sale chain process as to gain optimum residual value.

Decommissioning is a natural part of the fleet process and it's just as important to plan for and manage this while maintaining value for money.

Quality policy available upon request.

# DOG TRANSPORT VEHICLES

From fully air conditioned dog units to armed response vehicles, our dedicated team at EVO work to specific requirements to meet the exact specification of the customer.

Our technicians at EVO have extensive knowledge and experience when it comes to dog transport vehicle conversions; working to DEFRA and RSCPA guidelines and legislations to ensure the safety and comfort of service dogs while in transport.

Our dog kennels are fully sealed, fitted with an emergency exit, side vents, a drainage system and air conditioning direct into the kennel. We understand the safety of service dogs is of the utmost importance therefore, we make it our number one priority. For your added peace of mind, we can fit camera and temperature control systems. We offer multiple kennel vehicles complete with an anti-scratch bumper protector to ensure your vehicle is not damaged when the dogs enter/exit.

# BESPOKE VEHICLES

Here at EVO we recognise and understand that each of our customers have their own specific needs and requirements therefore, our vehicles are completely tailored to suit all budgets and purposes.

**"Great service  
and build as always"**

We also build bespoke vehicles for those who only require a one-off conversion such as a mobility or specialist vehicle. Communication with customers is a vital aspect of the conversion process; during the design phase, we discuss with you the most appropriate, safe, and best fit for purpose specification and products so that you get the most out of your vehicle.

The involvement of cameras and DVR recording equipment is on the rise for many of the emergency services and commercial vehicles; allowing you to record and transmit data, including the sending of encrypted data for more important information, giving you added peace of mind.

## RELIABLE

Our dedicated team of engineers consistently complete each conversion to the highest level of standards and work to specific time frames to ensure all deadlines are met without compromising on the quality.

## QUALITY

We build all our vehicles under the guidance given by our quality assurance to meet the ISO 9001:2015 standards. EVO have been awarded Approved Supplier Status on the Dynamic Purchasing System (DPS).

# Infinity

## DESIGN SPECIFICATION

The Infinity system has been designed to offer additional features that greatly reduce the need to compromise on a number of key issues such as:

### DESIGN

Infinity has a variety of suggested designs available, based on a range of vans and commercial vehicles, to meet your individual/company's operating needs.

### EXACT FITTING

Designed and manufactured to allow for precisely the size needed for requirements, in terms of height, length and depth.

## & STRONG DURABLE

Using several profile designs which interface to offer optimised storage with excellent strength features and ease of assembly.

### WEIGHT

Infinity weighs approx. 30% less than traditional steel racking systems, thereby improving overall payload, vehicles fuel consumption and vehicle handling.

### CERTIFIED

Crash tested to ECE R17 standard as approved by TUV GS to provide confidence, ergonomics and operator safety.

## KEY FEATURES

Infinity provides a comprehensive range of stowage solutions to give you the best facility for carrying tools, parts and materials, incorporating planned accessibility.

Here are some key features available with our Infinity system:

- ✓ Removable Tool Cases
- ✓ Tool Box Holding Clamps
- ✓ Plastic Storage Trays
- ✓ Cabinets with Locks
- ✓ Drawers
- ✓ Up and Over Storage Lids
- ✓ Perforated Tool Clip Panel
- ✓ Open Shelves, Fixed Frame
- ✓ Shelves with Drop Down Front Covers
- ✓ Sliding Trays
- ✓ Load Lock Rails and Straps

## VEHICLE RACKING SYSTEM

Infinity is the new born vehicle racking range. This revolutionary system is based on a new concept; a perfect fit with no length and depth compromise. It's modular components are made entirely of extruded aluminium alloy; making it lightweight, easy to assemble and ideal for tools. By choosing the Infinity range you will have an innovative quality product, designed and engineered in house to satisfy the most demanding tasks and safety requirements.

## 100% ALUMINIUM INNOVATIVE ENVIRONMENTALLY FRIENDLY LIGHTWEIGHT CONSTRUCTED TO MEET YOUR EVERY NEED
