

## PEGASUS MICRO PA

The smallest in our active PA range, the Pegasus, is a great demonstration of the power in our Eros cube. The clarity as a vocal PA is uncanny. Try it with your favourite microphone to see for yourself.

In use as a PA there is zero feedback. Perfect for lectern mic set-ups, and

rooms with difficult acoustics or installation challenges. Ultra-smooth sound that requires no EQ, with a wide coverage and a long throw, making use a breeze.

Designed to be very easily moved, the Pegasus, is lightweight yet strongly made of 18mm birch.

We provide the perfect level of connectivity for all applications. Features XLR left and right inputs, RCA connectors, and AES Digital capability.

## SPECS

Frequency range 35 -20khz
