Is it Time to Clean Your Upholstery?

What's better than a late afternoon nap on your favorite sofa? What's more enjoyable than reading a great book while snuggled in an overstuffed chair? Whether you are spending some quiet time alone or watching the big game with the whole gang, soft, comfortable upholstered furniture is usually the seating of choice.

Look under the cushions of a typical piece of upholstered furniture and you will usually find one or more tags. You probably don't give them much thought, but understanding one of them may save you hundreds or even thousands of dollars.

There is one tag that tells you the contents of the furniture. This tag is required by law. You may see "spun polyester" or "polyurethane foam" on that tag. It is important to note that the contents tag only tells you what is inside the furniture, not the fabric covering it.

As with everything else in your home, upholstered furniture requires proper care and cleaning. Pollution, allergens,

dander, sweat and body oils stick to fabric and spots and spills do happen. It's best to clean these fabrics before the soil builds up and spots become permanent stains.

Fortunately, most upholstered furniture will have a tag containing cleaning recommendations. As part of this tag you will find a cleaning code. Please note that these tags and codes are a guide to assist you in spot cleaning only. Overall cleaning should be left to the professionals at The Clean Force Company. According to the Institute of Inspection Cleaning and Restoration Certification (IICRC), professional cleaning should be done every 12-24 months.

Many types of fabric are used to upholster furniture. Rarely will you find a tag that reveals the fiber content of the fabric covering the piece. This can create problems for consumers who want to know how best to care for the fabrics.

Fabrics are made from a variety of fibers including cotton, polyester, silk, rayon, nylon, polypropylene, acetate,

Spinach Mushroom Omelet

Ingredients:

- 1 egg
- 3 egg whites
- 1 tablespoon grated Parmesan cheese
- 1 tablespoon shredded reduced-fat Cheddar cheese
- 1/4 teaspoon salt
- 1/8 teaspoon red pepper flakes
- 1/8 teaspoon garlic powder
- 1/8 teaspoon ground nutmeg
- 1/8 teaspoon ground black pepper
- 1/2 teaspoon olive oil
- 1/2 cup sliced fresh mushrooms
- 1/4 cup diced green onion
- 2 tablespoons finely chopped red bell pepper
- 1 cup torn fresh spinach

Directions:

1. Beat egg and egg whites in a small bowl. Mix in parmesan cheese, cheddar cheese, salt, red pepper flakes, garlic powder, nutmeg, and pepper.
2. Heat oil in a large skillet over medium heat; cook and stir mushrooms, green onion, and bell pepper until tender, about 5 minutes. Place spinach in skillet and cook until just wilted. Stir in diced tomato and egg mixture; as eggs set, lift edges, letting uncooked portion flow underneath. Cook until egg mixture sets, 10 to 15 minutes; cut into wedges and serve immediately.

acrylic, wool and blends thereof. Each fiber is different and has its own unique characteristics, including how they can be safely cleaned. There are unlimited combinations of dye methods, colors and patterns as well.

A cleaning agent that works great on one fabric may produce disastrous damage to another. Shrinkage, browning, dye bleed, color loss and even fiber deterioration can occur if improper cleaning agents or methods are used. This kind of damage is usually not correctable.

The cleaning recommendations tag is designed to help choose the right cleaning and spotting methods to avoid bleeding, color-loss, shrinkage and browning. Regardless of what the cleaning label states, test all cleaners in an inconspicuous area first.

Here are the cleaning codes and their meanings:

W – Spot clean only with water-based shampoo or foam upholstery cleaner. Do not over wet. Do not use solvents.

S – Spot clean only with a water-free dry cleaning solvent. Pretest

Pumping Iron at Every Age

Weight training and other weight bearing exercises have long been known for their health benefits. Many studies have shown these types of exercises are good for adults of any age. But a recent recommendation by the American College of Sports Medicine reveals that weight training is more beneficial for seniors than previously thought.

For those over the age of 50, weight training helps prevent osteoporosis and can increase bone density. Recent studies also show that weight lifting can improve cognitive functioning as well.

Seniors should take special care to use weight training equipment correctly to avoid injury or strain.

a small, inconspicuous area before proceeding. Do not saturate. DO NOT USE WATER.

WS or SW – Spot clean with upholstery shampoo, foam from a mild detergent, or dry cleaning solvent.

X – Clean only by vacuuming or light brushing with a non-metallic, bristle brush. DO NOT USE ANY WATER- OR SOLVENT-BASED CLEANER.

When cleaning a spill, blot immediately to remove spilled material. Apply spotters sparingly so as not to over wet the spot. When cleaning spots or stains, work from the outside edge of the spot toward the middle. This helps prevent spreading the spot.

When your upholstered furniture requires a full cleaning, call The Clean Force Company. We will take the time to identify the safest and most effective method to clean your furnishings without risk of changing the color, texture or finish. As a final step, we also recommend that we refresh the fabric protector to help maintain the beauty of your upholstery for many years.

Lifting too much weight can cause problems as can improper technique. If a person is new to weight training, it is best to have some sessions with a professional trainer to learn the correct forms and techniques, not only to lift safely but to maximize the benefits of this activity.

Food Trends Reveal Consumers Quest for Improved Health

The SupermarketGuru National Grocers Association Consumer Survey reveals that food shoppers are more concerned with diet, health, and nutrition than ever before. About 50 percent of the people surveyed said that their diet could be healthier.

Experts predict that the demand for new kinds of protein will continue to increase, with consumers turning to protein products made from algae, nuts, vegetables, and yeast. Other products will continue the trend of reducing the number of ingredients and artificial ingredients.

About 36 percent of shoppers say they are worried about chemicals in their foods. Food manufacturers are increasingly eliminating concerning additives like growth hormones, GMOs, and other artificial ingredients. Even stalwart brands like Kraft and

General Mills have announced that their macaroni and cheese and breakfast cereals are eliminating artificial flavors, preservatives, and synthetic colors. As these trends continue, consumers can expect to have a greater variety of choice and healthier options on their supermarket shelves.

Six Simple Ways to Save Money on Your Heating Bill

1. Keep the heat inside by closing draperies at night. During the day, open them up to let the sun shine through and warm your home. You can also cut heat loss by caulking and weather-stripping doors and windows.
2. Avoid overheating by setting the temperature as low as you can and still be comfortable. For every degree you lower the setting for an eight-hour period, you'll save one percent on your energy bill. Using a programmable thermostat can save you even more money. Set it to lower the temperature at night and when no one is home.
3. Check the filters in your furnace at least once a month. This will improve the efficiency of your existing furnace.
4. Close the damper on your fireplace when not in use to prevent heat from escaping out the chimney.

5. Use ventilating fans only as needed. Venting fans in bathrooms or above stoves can blow away a house full of warmed air in just one hour. Turn them off as soon as the room is cleared.
6. Up to 20 percent of your heating energy can be lost through a ceiling that is not well insulated. Ensure that your home has proper insulation to keep your home warm in the winter and cool in the summer.

Clean Force Client Testimonial

"A big THANK YOU to Wes.....He did a great job and even got out a stain that previous cleaners hadn't been able to. Great customer service! They have earned all our future business. Highly recommend this company!"

- **Randall T, Pickens, SC**

Quick Tips

Food Tip

If you are roasting meat, but do not have a roasting rack, simply place a layer of coarse chopped celery or onions on the bottom of the pan. Put the meat on top of the vegetables. They will keep the meat off of the bottom of the pan and will provide flavor during the cooking process. Gravy made from the drippings of the meat cooked in this way has the added flavor of these vegetables.

Healthy Living Tip

Nuts are packed with healthy protein and fats, including omega-3 fatty acids. These have been shown to boost mental functioning. Not only are nuts nutritious, they can also help you avoid overeating. Snacking on a handful of nuts half an hour before a meal will help you keep your appetite in control.
