

# LD-40

## **DESCRIPTION:**

LD-40 is a liquid inhibited acidic descaling, bleaching and non-abrasive cutting compound.

## **USE:**

LD-40 is recommended for removal of heat-treating scale, rust, stains, and heavy oxides from iron, steel, stainless steel, aluminum and copper alloy parts. Also used for bleaching or restoring true color after long cutdown runs in aluminum oxide media or abrasive compound. LD-40's liquid form lends itself very well to modern flow through systems. After use in conventional horizontal or oblique equipment, the workload should be neutralized with an alkaline cleaner before dumping or burnishing.

**CONCENTRATION:** 2.0 - 4.0 oz./gal. (15 – 30 ml/l)

**pH:** 4.0 – 4.6 of the Concentrate

For additional information such as physical characteristics, safety precautions, disposal, etc., see corresponding SDS.
