Product Prices, availability, and specifications are subject to change without prior notice. Any typographical, photographic, or specification error in product, pricing, or offers is subject to correction. We work hard to provide accurate pricing, but despite our best efforts, pricing errors may occur. In the event a product is listed at an incorrect price due to typographical, photographic, technical error, or error in pricing information received from our suppliers, Interlake Mecalux reserves the right to refuse or cancel any orders placed for products listed at the incorrect price. If an item's correct price is higher than our stated price, we will cancel your order and notify you of the price error and order cancellation. You will, of course, have an opportunity to purchase the item at the correct price, if you wish to do so. Any confirmation of sale, including internet, fax, or other confirmation, remains subject to corrections to pricing, product description and/or specification.

Warranty. Product warranties are available upon written request. Interlake Mecalux disclaims any other warranties express or implied, concerning the products in this catalog. They also specifically disclaim any warranties of merchantability or fitness for a particular purpose. In no event shall Interlake Mecalux accept liability for any damages, including consequential, indirect, or special lost profits, arising out of the use or inability to use any products. Interlake Mecalux damages are limited exclusively to product replacement or return of purchase price. Some states do not allow the exclusion of implied warranties, so the above exclusions may not apply to you.

Returns. Interlake Mecalux has a 30-day return policy subject to certain limitations. Return authorization is subject to Interlake Mecalux's shipping and return policies. Shipping costs may be applicable. A full copy of these policies is available upon request or by visiting www.interlakemecalux.com.

METAL POINT®PLUS with particle board

- 14 gauge steel parts, 5/8" thick M-2 industrial grade particle board and double rivet beams on every level for added rigidity, to support up to 2,400 lbs per level.
- Capacity based on size of shelf and number of center supports.
- Increase your loading capacities with the optional center supports. 72", 84" and 96" wide units already include 1 center support.
- Easy boltless assembly.
- In stock, ready to ship.

available online.

Chrome wire shelving

- Chrome wire shelving units are the perfect storage solution for industrial, pharmaceutical, food service and retail markets.
- They increase sprinkler penetration, visibility and ventilation, reducing the cost of insurance. Posts are numbered for easy assembly.
- Up to 800 lbs. per level.
- NSF approved Chrome wire shelving. All welded construction with additional wire trussing for high strength performance.
- Top mat shelf wires run front to back (except 12 x 36 size) for ease of loading and unloading.
- Units offer antimicrobial protection ideally suited for any high humidity, walk in cooler, food grade, or healthcare application where it is vital to minimize the growth of mold, mildew and bacteria.
- Units ship directly from manufacturer, usually in 5-7 business days.

Storage Cabinets

- Storage cabinets give maximum protection to tools, dies, delicate instruments, personal belongings or important documents.
- 20 gauge steel components. All metal parts are precision engineered. Positive 3-point locking (top, center and bottom) and theft resistant hinges for added security.
- Shelves adjustable every 2", hold up to 300 lbs. per shelf.
- Designed to meet government requirements.
- Parchment color available.
- Units ship directly from manufacturer, usually in 3-5 business days.

Structural Cantilever for light loads

- Unobstructed wide span cantilever racks are the perfect solution for storing long loads like bars, pipes, lumber, etc.
- 2" adjustable arms. High quality baked enamel finish, for either indoor or covered outdoor use.
- The units include all necessary hardware to build the rack.
- Start units include 2 bases, 2 columns, 1 brace set and 6 arms for the wall units and 6 for the aisle units.
- In stock, ready to ship in 5-6 weeks.

Also available in green

Design your own pallet rack unit

- This U.S. manufactured pallet rack is the best storage solution for warehouses where it is necessary to keep a wide variety of products, thanks to the direct access to every pallet location. Universal tear drop frames, cold roll-formed using 55.00 psi minimum yield strength. Adjustable beams every 2".
- Designed to meet all Racking Manufacturers Institute Standards (RMI). Also available for seismic areas.
- To design a Starter bay, pick 2 frames and at least 2 beam levels. To design an Add-on bay, pick 1 frame and at least 2 beam pairs. You can add wire decking shelves if required.
- Pallet rack components ship directly from the manufacturer, usually in 7-10 business days. 6 shipping locations nationwide.

Wide Span

- Designed for storage areas in which goods are handled manually instead of being transported on a pallet. Manufactured in North America.
- Thanks to the "Z" beam design, it can accommodate galvanized steel panels, wire decking or the traditional particle board with almost twice the load capacity per level compared to standard shelving units.
- 14 gauge 2" adjustable beams and 16 gauge frames. 22 gauge steel decking. 4 gauge 3" squared welding wire decking.
- Available also in 8", 10" & 12" high.
- Wide Span units ship directly from manufacturer, usually in 7-10 business days.

Design your own Wide Span unit

- You can select from a wide range of heights, widths, depths, shelves and accessories listed below to design your own Wide Span unit.
- To build the Starter bay, pick 2 assembled frames and 3 beam pairs. Then, select the type of shelf, if required.
- To build an Add-on bay, pick 1 assembled frame (same depth as starter bay), and 3 beam pairs. Then, select the type of shelf, if required.

easyWMS

- Warehouse management software that controls, coordinates and manages all processes carried out in a warehouse.
- Possible to manage receiving orders for multi-SKU or single SKU containers
- Applies logistical data collection management to ensure product traceability.

Push-Back

- Push-Back is an accumulation storage system that allows up to four pallets deep per level to be stored.
- Goods are placed on a free-rolling carriage that is pushed back into the system by loading additional pallets.
- Optimal use of space by being a compact storage system, allowing warehouse storage capacity to be increased considerably.

Carton Flow

- Cases or cartons are manually picked from deep lanes that provide a steady rush of product.
- Ideal for palletized or boxed goods with sensitive expiration dates.
- It is made up of slightly inclined platforms of wheels and rollers, on which the goods are deposited at one end.
- They then slide down on their own until the far end, positioned at the exit aisle.

Unit Load AS/RS

- Fully compatible with any size pallet.
- The unit load racks can be single-depth or double-depth to maximize capacity.
- Stacker cranes are designed to work in very narrow aisles and at heights of nearly 100 feet.
- Heightened capabilities, schedules, upkeep, etc.
- Continuous flow of goods.

Mini Load AS/RS

- Easily expandable system which can be quickly dismantled and reassembled.
- Increases safety by reducing operator fatigue.
- Stacker cranes maximize capacity and increase throughput while operating smoothly and quietly.

Cantilever

- Cantilever racking is specifically designed to store long or varying length items.
- Expansive range of load capacities assures economical designs
- Center column design creates unlimited horizontal space
- Vertically adjustable arms allow maximum versatility

Radio-Shuttle

- A semiautomatic palletizing storage system that uses a cart to make internal movements within the shelving units autonomously.
- Eliminates the need for the forklifts to go into the storage aisles.
- Reduced pallet loading and unloading time.
- Greater number of stored SKUs.

Movirack®

- Shelving units become more compact and their storage capacity considerably increases.
- The mobile bases have motors, sliders, electronics and several systems to guarantee a safe, efficient operation.
- Direct access to any pallet in storage.
- Makes the most of available space.

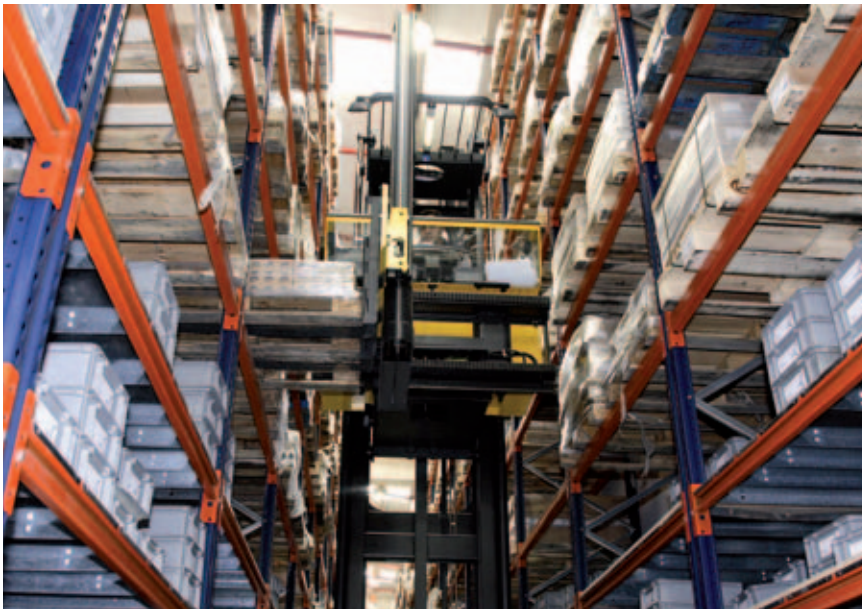

Vertical Carousel

- Excellent for storing long cylinders of most kinds
- The support shaft has belts, slings or suspension devices that fit to rotating axles.
- Largely used in the printing industry to safely secure expensive cylinders.

Mezzanines

- Enables the warehouse space to be utilized to its full potential by doubling or tripling the surface area.
- The best way of optimizing available space, since the area below can remain open allowing for other storage.
- Can be the most economical way to increase your warehouse needs saving you the cost of a conventional building expansion.

High Height Rack

- Proper use of the volume.
- Direct access to any stored pallet.
- Extraction of merchandise can be done with two types of forklifts—trilateral and bilateral.

Advanced Cold Storage

- Maximize room capacity, optimizing the freezer space to achieve efficient energy use and profit growth.
- Easy accessibility to goods depending on product rotation.
- Proper control of the stored product, which ensures an accurate inventory.
- Automation may be used to maximize efficiency and minimize worker exposure to adverse working conditions.

Spinblock

- Saves time since operators do not have to move from their position to prepare the order.
- Stock management through constant inventory control.
- Short-term return on investment.
- Reduction in errors of more than 90 percent.

Pallet Flow

- Ideal for material with expiration dates.
- Produces an almost solid volume of usable storage space.
- Provides savings in space, manpower and utilities.
- When the first pallet is removed, the others advance one position, so the preceding pallet is always positioned at the front. This feature makes it ideal for storing perishable products.

Modular Safety Enclosures

- Separation and internal divisions of the various areas within a company (including waste classification areas).
- Manufacturing processes with moving machinery.
- Roller path surface protection.
- Enclosure of control and maintenance zones.

Drive-In/Drive-Thru

- Ideal for stocking large quantities of relatively few items.
- It can reduce overall square footage requirements by at least 35%.
- Reduces space cost and holds more loads.
- Eliminates the need for multiple aisles.
- Provides control over entry and exit.
