

BCS C-8

DESCRIPTION:

C-8 is a powdered, non-abrasive, mildly alkaline open barrel and soak cleaner used in the processing of ferrous and magnesium parts. C-8 can be used with most types of media with the exclusion of delicate plastic media.

USE:

C-8 removes oil, stamping and drawing lubricants, even from recessed parts. C-8 is often used as a neutralizer following descaling, de-rusting or brightening cycles.

SOAK CLEANING

CONCENTRATION: ½ - 2.0 oz./gal. (3.8 – 15 ml/l)

TEMPERATURE: Room to 180°F (21-82 C)

pH: 9.0 to 10.5 of a 2% solution

For additional information such as physical characteristics, safety precautions, disposal, etc., see corresponding SDS.
