

RMT Corporation Leak Test Tooling....

Project: Exhaust Flex Pipe Leak Tester
Notes: Leak tester checks multiple parts for weld integrity.

Project: Cold End Exhaust System Leak Tester
Notes: Using air pressure decay tester, station checks for leaks in three different exhaust assembly models. Various sensor and lasers verify brackets and hangers are present. After a good part has been verified the assembly is pin stamped with part number.

Project: Die Cast Part Leak Tester
Notes: Die cast parts are clamped into leak test fixture and submerged in liquid to test for porosity.

Project: HVAC Heater Core Leak Test Head
Notes: Leak test head seals on two ID core pipes while securing over a tube bead for pressure decay leak test.
