Dear Sagiv Weiss-Ishai,

The California Automatic Fire Alarm Association held their 19th Annual State Agency Forum in Sacramento, CA on October 09, 2014. For the second year, we have had a presentation session prior to the meeting with the state agency representatives.

You volunteered to make two presentations on the subjects of the ERRCS and Two-Way Communications Systems, both of which were very well received. The amount of requests for copies of the powerpoint files proves how popular they were.

Many attendees made positive comments about not only the content but also the delivery of the information.

The time and effort that you contributed towards the success of our event is greatly appreciated. Thank you for helping us conduct a successful event. We look forward to future partnerships.

CAFAA Board of Directors President
