

TeleBehavioral Health Financial Agreement Addendum
2022

I understand that billing for TeleBehavioral Health video-conferencing sessions will be submitted to my managed care insurance company in the same fashion as office visit sessions.

I also understand that if my managed care company does not cover Tele-Behavioral Health benefits, I can elect to not use my health insurance and pay cash. In doing so I am entitled to certain protections under the No Surprise Act as well as a good faith estimate of costs associated with my services. Separate paperwork has been provided pertaining to this 2022 No Surprise Act legislation and is also available on our website www.vistapcc.com. You also have the option to waive your federal consumer protections when the nature of mental health concerns do not lend themselves to a good faith estimate.

The established fee for TeleBehavioral Health sessions not covered by insurance will be provided as a part of the good faith estimate.

My signature indicates that I agree to pay for each TeleBehavioral Health session not covered by my managed care company under the terms of the good faith estimate.
