

# FLEET OPERATIONS

**TCI** has the expertise to assist in a variety of transportation-related functions, including:

**Fleet Management:** TCI assists fleet management with implementation plans to ensure that vehicles and equipment are safe, reliable, economical, and well-utilized. TCI evaluates every element of its clients' maintenance facility to improve operating efficiency and to achieve cost savings.

**Regulatory Compliance:** Today, non-compliance with regulatory agencies or statutes can be very costly. TCI can work with management team to ensure that all federal, state, and location transportation-related requirements are being met.

**Productivity Enhancement and Control:** Whether the concern is wayward truck drivers or shop mechanics with too much overtime, TCI can conduct performance audits and then structure a set of solutions to increase productivity and monitor continued improved performance.
