

INJ-4500L – Plug and Play

INJ-4500 Lite:

INJ-4500L is a single phase specific pump VFD which adjusts the pump speed to maintain constant pressure to max. energy saving. The drives can be applied for residential and commercial water supply, water treatment etc. As the drives are self-cooling and motor-independent structure, it can be installed directly on the motor.

Specification

Model : INJ-4500L
Power : 0.75 ~ 1.5 Kw
Input Power : 1PH 220/240V
Output Power : 1PH 220/240 V
IP Class : IP55
Main Frequency : 50/60 Hz
Features

Constant discharge pressure control system (PID control)

LED Screen

Available the back-light to indicate the pump condition (RUN/STOP/ERROR)

Easy to install (motor mounted or on the wall)

Language : KOR/EN/CH
