GENERAL

- Standard Same-Day-Shipping
- 13 Standard thicknesses from .001" to .120"
- .250" and .500" thicknesses available upon request
- Each shim permanently marked with size and thickness
- Six sizes to fit motors or generators from 1 to 1000 H.P. of all manufacturers

QUALITY

- With over 40 years experience, Lawton is the original manufacturer of pre-cut shims
- Shim thicknesses and tolerances are 100% guaranteed to meet or exceed industry standards
- Made of all 304 stainless steel stock to prevent rust or corrosion
- Shims are absolutely guaranteed to be flat and uniform in thickness
- Shims are guaranteed to be completely free of any burrs or sharp edges

REDUCE LABOR COST

- Reduces downtime due to misalignment of expensive machinery
- Eliminates the time consuming task of hand cutting and fitting for proper size
- No Micrometer needed
- Eliminates unnecessary travel time to and from job sites

STOP MATERIAL WASTE

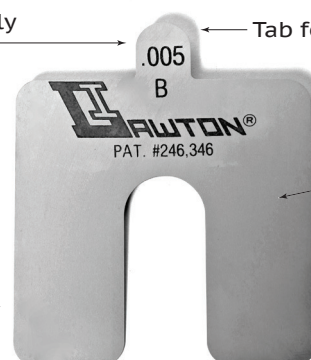

- Cuts material waste to zero
- Permanent markings allow shims to be re-used
- Handy steel carrying case used for storage and protecting shims from damage during transport

SAFETY

- No sharp corners, edges or burrs
- Eliminates risk of being cut while hand cutting shims
- Tabbed design allows safe installation and removal without getting hands or fingers under motors
