

Licensed Practical Nurse Training Program

Practical Nurses (PN) function as members of the health team and are actively involved with care through the life span. Functioning within the provisions of the Illinois Nurse Practice Act of 2017 (Article 55) and State of Illinois Nursing Rules (Administrative Code: Title 68(b), the practical nurse provides and manages care and participates in teaching and research under the supervision of a registered professional nurse, licensed physician, dentist, or podiatrist. Practical nursing education at our school combines clinical experiences and theoretical knowledge encompassing the nursing process, communication, and the biological and social sciences.

Our Practical Nursing program is a 57-62-week full or part-time (allowing for calendar holidays), certificate program preparing individuals to function in the practical nurse role.

Classes held at FSTE are being conducted using Hybrid methodology. All Individuals completing the course meet the education requirements and are eligible to sit for the NCLEX-PN exam to become a Licensed Practical Nurse (LPN).
