

PRIVATE INSURANCE: DEDUCTIBLES

SOS's policy is to collect \$75.00 per session until you meet your deductible. The \$75.00 is a **down payment** towards your balance.

Any **remaining balance** will be billed to you.

Physical therapy office visits are always applied toward the deductible.

The contracted rate with each insurance company varies and the procedure and modality codes that each physical therapist bills each session also varies depending on what is performed at each visit.

We **estimate** your bill to be between \$120.00 to \$200.00 for the evaluation and \$70.00 to \$140.00 for each subsequent visit until your deductible has been met. This is a very general estimate given the wide range in cost. We cannot tell you what the final amount per visit will be until we bill your insurance company and receive an **"Explanation of Benefits" (EOB)** from them.

The exception is for **Blue Cross**. Blue Cross plans in the state of California discount our charges to \$150 for our evaluation and \$75 for each treatment.

If you have a high deductible and would prefer to register as a Cash Payment patient, you must inform us at the time of registration.

We cannot reverse charges once they have been sent to your insurance company.

I understand Sports and Orthopedic Specialists' deductibles policy and agree to pay a down payment toward what I will owe for each visit until the deductible has been satisfied.
