EdgeSeries™ Reels

Game changing Lithium-Ion innovation.

Extremely quiet and emission-free, the all-electric Toro® Greensmaster® eFlex™ is built with the automated EZ-Turn™ feature that automatically slows the mower down at the end of a mowing pass and speeds it up again on the return pass without sacrificing quality of cut, resulting in better control and reduced turf damage. The eFlex 2120 offers a 21" cutting width and is among the quietest and most efficient walk greensmowers on the market today. Harnessing the power of lithium-ion battery technology, the eFlex takes electrical efficiency

to a new level, allowing operators to mow approximately 35,000 sq. ft. of turf on a single charge. The eFlex series is the first line of mowers to offer lithium-ion battery powered technology. Additionally, a convenient LCD display indicates an ongoing battery charge status and also displays useful information such as machine hours and overall battery health. All Toro Greensmaster mowers feature patented dual precision adjustment (DPA) cutting units.
