BHP squaring Dates

Example from lesson 6 from the Advanced Course

What I teach in lesson 6 is pure Gann

What I love to do is have the squaring dates plotted on my chart and also have an EMA and MACD

You can see that the Gann dates often will give a signal before the MACD signal line crossover

To minimize the noise, I have not put any Gann Fans or Astro- planetary lines on the chart.

This can be applied to any market or time frame with proper scaling.
