Categories: To Save/File

Rosa,

Thanks for the heads up on this project. Since there is only a perpendicular connection to the sidewalk on the backside of our right of way, no permit is required. Please just coordinate with our office prior to beginning construction on the project.

Adam E. Doyle, P.E.

Subject: New Project Coordination - 49th Terrace Trail in Lacrosse

Hi Adam,

We wanted to share the attached plans with you for coordination purposes and to see if we need to apply for any FDOT permits.

The project is anticipated to encompass the majority of NW 49th Terrace between its northern and southern intersections with SR 121. The preliminary programming involves converting the existing roadway into a non-motorized area and installing pedestrian improvements at intermediate locations and a parking area at one of the terminus points of the park.

If you need any additional information, please reach out to me or David!
