

If you see or suspect a wildfire start...please dial 911 immediately

Shelter Cove Wildfire Hazard

Three Zones of Hazards

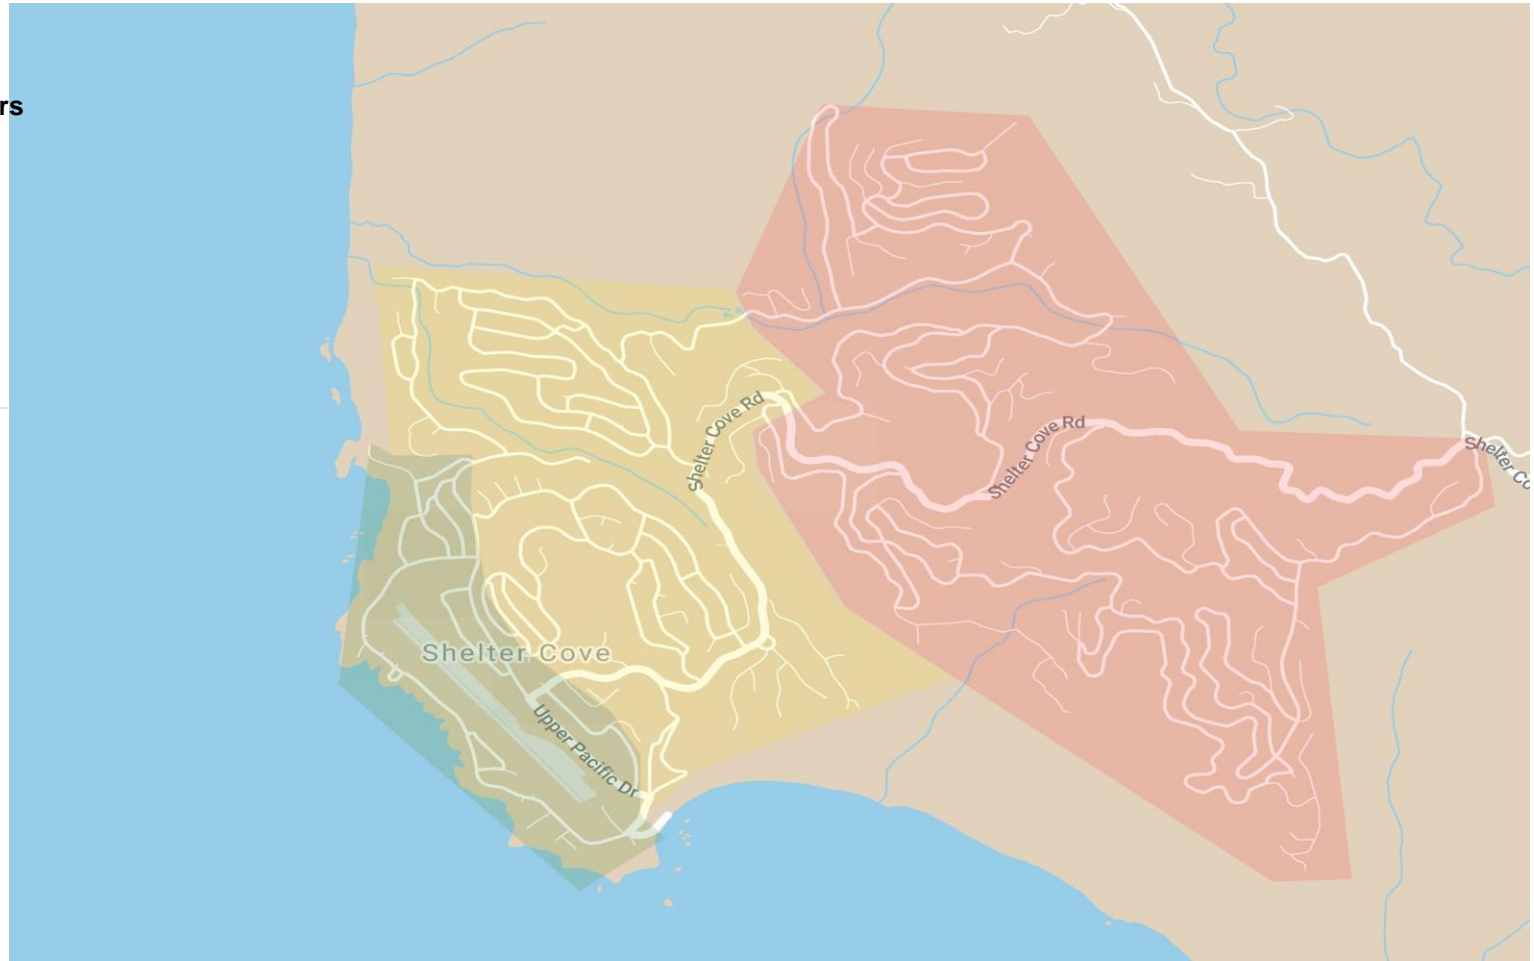

Red Zone – Electrical service customers will be de-energized during a Public Safety Power Shutoff (PSPS) Event

Yellow Zone Low Hazard area

Green Zone No Hazard area

Public Safety Power Shutoffs (PSPS) are implemented for the safety of all Shelter Cove residents and property and will only be implemented, if deemed necessary, for the safety of the Shelter Cove community. During high wind events it may be impossible to successfully control local wildfire starts and a PSPS event may be needed (to be implemented) to protect our community.
