Saturday, May 9, 2009

Noon-4 pm

Presentation 4-5 pm

*Trish Corbett and Michael Mannion*  
*Co-Founders, The Mindshift Institute*

The Mindshift Institute is engaged in exploring new ideas in such fields as science, medicine and consciousness studies that have the potential to expand our understanding of reality fundamentally.

We believe that existing, but little known, life-positive knowledge can form the foundation of a new worldview that has the power to help us make different choices so that our hopes for a better world can be realized.

The Center for New Knowledge is devoted to introducing leading edge advances in learning and wisdom found in a range of ways of knowing from diverse traditions, ancient as well as contemporary.

We hope you will join us and actively participate with us in this exciting and vital work.

More information about the Center for New Knowledge will be available soon here on our website, including a [calendar of events](#) for May and June 2009.
