

Cosmic Midpoint Map

Cosmic Midpoint Map

The **Cosmic Midpoint Map (CMM)** has been developed using the most active planetary midpoints found to have the greatest impact on human affairs and destiny according to the research of Reinhold Ebertin and his Cosmobiology.

Planetary midpoints have shown to add another dimension to Astrology- often revealing sensitive degrees in the natal chart not evident with traditional methods. The CMM makes it simple by plotting the upcoming combination of planetary energy as a visual colour coded map.

With this foresight you can plan the best times to undertake activities supported by specific planetary combinations and also avoid and refrain from certain action when the energy is not supportive.

For example, when you see **BLACK** sections indicating times of possible health issues, sickness, low immunity/vitality and depression- make sure you're sleeping enough, taking extra vitamins and minerals, exercising and even meditating/yoga.

The **RED** sections are high stress zones and how these challenging midpoints are handled is up to the individual. Best strategy under adverse transits is to not make any rash decisions, as often when under stress we react out of fear and ultimately make the wrong decisions. If you can wait, avoid any important decisions in the red zones, that goes for trading as well.

The **GREEN** sections are the GO zones. These are the best time for growth, luck, success and opportunity. Use the GO zones to plan events that you want to succeed, play lotto, seek a promotion, travel overseas etc. See below when W.D. Gann won the lottery 4 times in one month, he was experiencing a very large **GREEN** period!

The **BLUE** sections are the LOVE zones. If you're single, these times are the best to meet someone new and if you're in a relationship, these days you can spice up the romance!

Cosmic Midpoint Map

Luck, success, opportunity and money.

Love, Romance and good relationships.

Challenging Times

Possible health issues, sickness, low immunity and depression.
