Shabbat

Created in partnership with the Zomet Institute

1.800.MY.AMIGO
www.myamigo.com

- ① On/off key switch
- ② Shabbat/normal toggle switch
- ③ Directional rocker switch (Shabbat mode)
- ④ Emergency stop rocker switch (Shabbat mode)
- ⑤ Shabbat LED

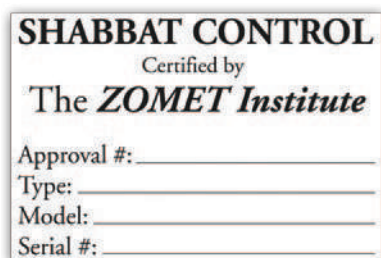

HOW IT WORKS

The toggle switch changes operation from “normal” to “Shabbat” mode. With no throttle activation by the rider, the module’s timing circuit sets the chair in motion after 7-11 seconds, satisfying the “no work” Sabbath restriction.

Halachically authorized for use on Shabbat by the **ZOMET INSTITUTE IN ISRAEL**

EVERY Shabbat Amigo is individually inspected and certified by a **ZOMET REPRESENTATIVE**

This certification label appears on each Amigo Shabbat
