Sophisticated,

Easy-to-use,

Construction Estimating Software:

FREE (No Strings – Zero Cost),

The DMI OH&P Markup Manager™

... For Builders, Construction Managers, General Contractors, and Subcontractors

What is your bottom line? Adjusting bid markup, overhead and profit (OH&P) by a few percentage points can make or break a month, a year, or even a contractor.

How does your company decide the optimal percentage for OH&P?

Does the big boss just take his best guess? Hopefully, the decision is reached more scientifically than that. Making the best choice for this crucial decision is not as easy as it may seem.

Good News: I am offering FREE help – no strings attached. All you need to do is ask – just email me to get your FREE COPY of my invention:

The DMI OH&P Markup Manager™

(Fully functional Microsoft Excel® file)

Just tell me you want yours, and I will send you the file that shows you how smart contractors can make peace (and big money) with this very big decision. For your FREE personal copy:

Just email your full name, company name, and street address.
