

Triac 90 Series Flanged Ball Valves feature a split body design. The high quality investment castings feature a fully machined bore. The superior live-loaded packing system is accomplished with Belleville washers, "V" ring packing and a unique primary pyramidal stem seal. This advanced sealing system provides protection against stem leaks experienced by ordinary ball valves.

RTFE seats are standard, but various options are available for seat materials. The 50/50 STFE seat option is excellent for services that call for higher temperatures and more difficult applications including steam. Call us for details.

Series 93 Note:

Due to differences between sand cast and investment cast valves, A-T Controls requires that each valve be measured for the correct stem height and width before making a mounting adaption.

Standard manual valves should be ordered with an automation gland if A-T Controls is not making the mounting kit.

Dimensions B, E, and Y are for reference only.

OPTIONS

DESCRIPTION

24 VAC/24 VDC/220VAC

Feedback potentiometer

NOTE: Heater and thermostat standard
(2) auxiliary switches standard
Other options available - call for details
Actuators are sized based on clean/clear fluid.

HOW TO ORDER: Manual Valves
