

# Ultra Blue 110

## **DESCRIPTION:**

Ultra Blue 110 is a liquid ultrasonic and general purpose cleaner. UB110 is recommended for only the most delicate aluminum parts. UB110 is moderately alkaline, is non-corrosive, non-irritating and biodegradable.

UB110 is a combination of surfactants and wetting agents with a slightly lemon odor. Visually, it is light blue in color. UB110 is formulated to produce little or no foam and is completely soluble with excellent rinseability.

## **USE:**

UB110 is used for cleaning the most delicate aluminum parts in ultrasonic and *non-ultrasonic* tank immersion operations at temperatures up to 81°C (180°F). Expose surfaces from 15 to 90 seconds (ultrasonic) depending on soil and equipment. Follow with a warm spray rinse.

Because it is low foaming, UB110 may also be used as a spray wash cleaning compound at the temperatures and concentrations stated.

**CONCENTRATION:** 3% to 15% by volume, in water

**pH:** 9.0 to 9.5 of a 10% solution.

For additional information such as physical characteristics, safety precautions, disposal, etc., see corresponding SDS.
