

# Careers in Water and Wastewater

The water and wastewater industry offers challenging and rewarding careers. As a utility operator in these fields, you will be part of delivering clean water, and wastewater services to your community.

Paris Utility District is looking for successful candidates wanting a new career in the industry. No other career has more of an impact on public health and the environment.

## Components of the career could include the following:

- Learning the basics of the water and wastewater treatment facilities; pumping, treatment, storage, distribution, pumping stations
- Perform activities relevant to day-to-day operation and maintenance
- Install, operate and maintain water and sewer infrastructure
- Tasks may also include grounds keeping, mechanical repairs, laboratory testing, process control adjustments, and general maintenance duties
- Develop technical skills in electronics and automation of chemical feed systems

## Other Benefits:

Competitive Wages  
Excellent Benefits  
Job Security  
Professional Development  
Technical Training

## SKILLS:

Positive Attitude | Problem Solving  
Communication | Work Independently
