Hi Mary,

I am wondering what those 4 very large metal posts are for? They are by the walkway between the tennis courts and the parking lot (at the end closer to the tennis courts)

Also, I see that there's been a bucket lift in the parking lot for days now. I was hoping Luis was finally going to cut down the euc sprouts he told me he was going to cut down a couple years ago. With the bucket lift he could easily take them down. Once they are down its easy to remove the sprouts each year, if you do it early enough you can snap them off with your hands.

The weed whacking is nice but unfortunately with the moisture in the ground it will just grow back and they'll have to do it again. Their time would be better spent taking down those sprouts as there are quite a few now and each year they keep getting taller. Can you talk to Luis about finally removing them?

Also, there is what I believe is a yew tree on the hillside near my barn. it has small leaves that will easily ignite and the crown has grown right up into a euc. The yew is on the hillside and can easily be dropped by just one person with a couple chain saw cuts. They really should remove it as it is a fire ladder.

I want you to know that I have talked to Luis several times and though he promises he is going to do things they never seem to get done. It has been very frustrating. I am hoping you can intervene and see that the things I brought up (all easy maintenance issues) are finally taken care of.

Thank you,

Terry

Hi Terry,

The poles are for netting that will protect the solar panels from damage by balls, baseballs in particular. On Monday I will meet with Luis to go over your email in detail. Enjoy the beautiful weather this weekend.

Hi Mary,

Just following up on your meeting with Luis. Will the euc sprouts below me be removed? Will the yews (I believe there may actually be two, not one) or the eucs they have grown into be removed in order to remove the fire ladder danger?

Thanks,

Terry

Terry,

Luis and I looked this morning at the hillside, and we think the eucalyptus sprouts are not on our property. Luis would need to get permission from the neighbors to do any work. Luis tried to reach you sometime last week. Here is his direct telephone number. He is happy to chat with you about the hillside. 510-504-3484.

Hi Mary,

We went through this a year ago. Luis even brought Kerry Bliss (I think it was) from Ponderosa Tree over to my property and we looked down on the sprouts and he gave an estimate for removal. Luis said he would have to take it to his superiors for approval. The next time I spoke with him he told me they had denied it.

I've spoken with my neighbors the Nuygen's about it and they told me the area with the sprouts is not part of their property, but if it was Luis could certainly cut them. They are a nuisance to the Nuygen's as well as me.

Can you provide a survey map showing the property boundaries and why you think they are not your trees?

Thanks,

Terry

Subject: Hillside

Terry,

In order to determine the property lines on the hillside, it needs to be surveyed. We would be happy to make the arrangements to have it surveyed and split the cost with you and perhaps the Nguyen's as well. It would benefit all parties to know where the property lines fall for future maintenance. Please let us know if you would like to move forward with this project.
