

SR-405

DESCRIPTION:

A fine, non-dusting, non-abrasive, highly concentrated burnishing compound used to develop high lustre and color on most metal parts which have been suitably prepared for burnishing.

USE:

SR-405 is intended for high quality burnishing of metal parts in abrasive media and conventional barrel finishing equipment. May be used in vibratory equipment if resultant foam is not objectionable.

Normally used after parts have been cleaned with a suitable cleaning compound, SR-405 will promote high color and lustre on steel, brass or aluminum alloys.

SPECIFICATIONS:

Rust Protection: Provides adequate rust protection during use and for short periods thereafter unless protection is rinsed off. For long term protection, use more specific protective coatings.

CONCENTRATION: 2.0 - 4.0 oz./gal. (15 – 30 ml/l)

pH of Concentrate: 4.4 - 4.6

For additional information such as physical characteristics, safety precautions, disposal, etc., see corresponding SDS.
