

Kforce Government Solutions (KGS) is an innovative financial, management, and technology firm specializing in audit solutions for the Department of Defense and Civilian Agencies. Led by our CEO, RADM (Ret.) Patrick Moneymaker, our corporate management and technical leaders have a history of dedication to the Department of the Navy (DON), in uniform, as Civil Servants, and as contractors.

As a leader in Financial Improvement / Audit Readiness and Business System Modernization, we currently support all three military services and several defense agencies in financial statement and business system audit readiness/remediation/sustainment, and ERP implementation.

KGS is one of a select few who have helped DoD entities achieve and sustain clean audits, including six consecutive with the Defense Health Agency (DHA) Contract Resource Management (CRM) entity. Key to sustaining CRM's favorable audit was developing and defending a successful Direct to Treasury reimbursement model.

Every day we help tackle our clients' toughest challenges. For example, we spearheaded Trading Partner elimination programs by addressing policy, procedural, and system constraints that delivered short and long term success. Within the specialized DoD IT environment, we have applied innovative IT Audit strategies including a model that overlays RMF, FISCAM, and Green Book requirements. We developed an IT System control testing tool that has been used within the Army to dramatically lower the cost and time required to complete FISCAM assessments. Our approach to accounting for and valuing property was a key enabler to DHS mitigating its final material impediment to an unmodified audit opinion.

We look forward to partnering with DON to achieve and sustain auditability.
