VAA Meeting Saturday 16th August 2014

presented by
Olga Morales

W.D. Gann's favourite harmonic for studying Speculative Markets was the 8th Harmonic. Learn why the 90-degree dial and advanced Cosmobiology techniques and tools lead you to the core structure of understanding planetary cycles.

About the speaker

Olga Morales is the founder of **Astrology for Gann Traders** After obtaining a BA in Psy-

chology from Melbourne University, she received a professional certificate from the Australian Academy of Astrology and Cosmobiology in 1993 and later, in 2003, an advanced certificate in Cosmobiology from the Regulus Ebertin School of Astrology with a High Distinction. Since 1999, Olga has been consulting private clients, writing articles, teaching personal astrology to local private groups and lecturing overseas. From 2005, Olga initiated an intensive study of Stock Market and Commodity cycles using W.D. Gann's trading methodologies and now teaches all over the world through lectures and her DVDs. She has lectured for the VAA (2005-2014) FAA (2012) UAC, New Orleans (2012) and ATAA (2010 - 2012), New York City with Bill Meridian (2013) Hong Kong, London and UAE 2013-2014.

lecture venue: **The South Melbourne Community Centre**
Cnr. Park Street & Ferrars Place South Melbourne
melways ref: 2K B4

meetings: **3rd Saturday of the month** unless otherwise listed

time: **2 - 5pm**

cost: VAA Members \$7.50, Non-Members \$15

Next Meeting: Saturday 20th September 2014

Marg Wood

Chiron: An evolving journey of awareness and healing through the experience of pain

Editorial

By Nikki Worth
vaa@astrosense.net

In this edition of Horizons, to whet your appetite for this month’s lecture you will find an article by Olga Morales entitled **Using Cosmobiology and the 8th Harmonic to Study Stock Market Cycles**. Also with this edition, as a loose insert, is the **Annual Secondhand Booksale Form**. The sale is held during the break of the August meeting—please have your books marked and your list ready. Note too the **APA Exam Scholarship Guidelines** and August’s list of **Planetary Aspects** on page 6.

Note that Members can receive **Horizons in digital format via email** and save \$10 off yearly membership.

Email the Membership Secretary, Kath Bajsar, to apply
astrologyworks@bigpond.com

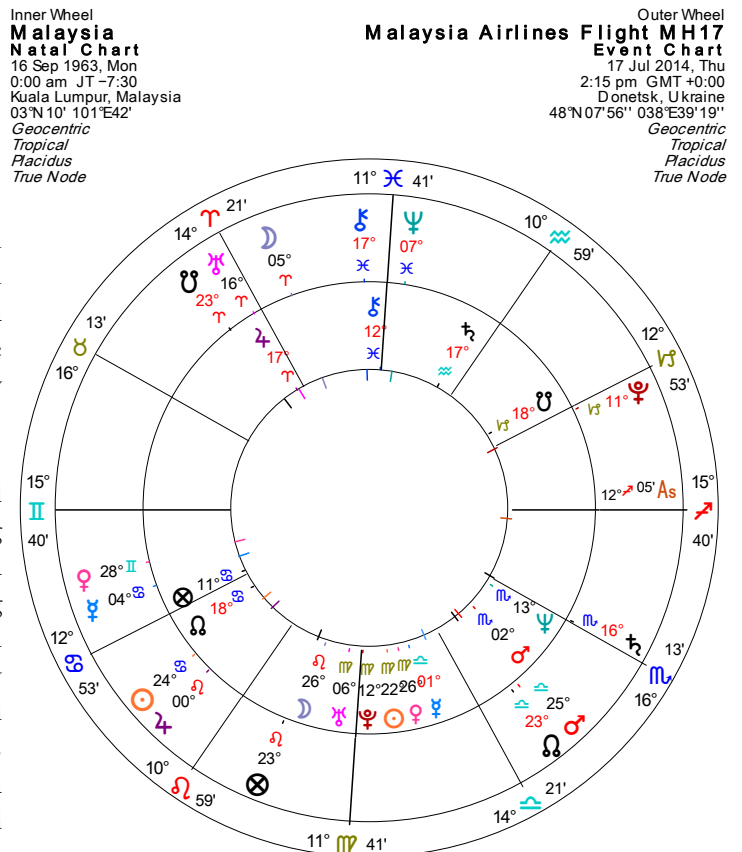

Transit Lounge

You would recall the **Malaysia Airlines Flight MH370** that went missing on 8th March. Unfortunately **Malaysia Airlines has suffered another blow — Flight MH17, an international passenger flight from Amsterdam to Kuala Lumpur, crashed on 17th July 2014.**

It’s believed to have been shot down with a surface-to-air missile. The aircraft went down near Hrabove in Donetsk Oblast, Ukraine about 40 km from the Ukraine–Russia border. Tragically, all 283 passengers and 15 crew on board the airliner died. Malaysia Airlines released a statement saying it received notification from Ukrainian ATC that it had lost contact with flight MH17 at 14.15 (GMT). Below is a bi-wheel of the flight’s disappearance outside Malaysia’s chart.

The Ascendant for MH17 is 12SAG05 and MH370 (see April 2014 Horizons) is 07SAG47 — both oppose Malaysia’s Ascendant. In both their charts, ruling planet Jupiter is in the 8th house of death. MH17 Jupiter, ruler of long distance travel, is square Malaysia’s Mars and parallel Zosma — Bernadette Brady describes this star as “a victim or a person who fights for the victim.” And transiting Mars, now moving direct, is again in Libra and conjunct the North Node, but this time Uranus is in opposition (and square Pluto). With the Sun also square the Nodes this is a volatile setup, which is currently playing out in several regions, eg. Gaza and the Ukraine.

It’s definitely a case of “wrong place, wrong time”, and there’s something else — Malaysia’s chart has transiting Uranus conjunct their 11th house Jupiter. This can indicate sudden events bringing new and exciting opportunities but also disruption and a sudden downturn with unsettling, perhaps violent consequences, especially with Uranus in Aries. It is explosive, fiery energy and often destructive. The MH17 crash is very Mars/Uranus whereas MH370 was influenced by Malaysia’s Chiron in Pisces return trine Neptune — painful, confusing and deeply mysterious.

Palmistry Course

Saturdays 1-4 pm except 3rd Sat of the month
Begins August 23rd. 10 week course
in Hartwell, the heart of Melbourne

Learn to Read the Hands

This is a 'Hands-On' event.
Learn through practice and study.
Earn credits towards Palmistry Diploma.
Graduates eligible to continue
into the Astro-Palmistry module.
Only space for 12 students: Book early.
Cost: \$480 includes a free copy of
The Palmistry Textbook by Peter Burns.

Using Cosmobiology and the 8th Harmonic to Study Stock Market Cycles

By Olga Morales

W.D. Gann's favourite harmonic for studying Time and Price cycles was the 8th Harmonic.

Did you know that legendary trader W.D. Gann was an astrologer?

Newspaper articles in the 1920's called W.D. Gann a prophet and a mathematical seer. "Mr Gann has made noteworthy forecasts of the markets which proved to be true in the course of time. His calculations are based on Letters, Numbers and Astrology."

"Mr Gann gets calls every day from men and women prominent in all walks of life asking him to cast their horoscope. He tells politicians whether or not they will be elected and solves other problems for clergymen, bankers and statesmen."

In 1914, he was a member of The Astrological Society, Inc N.Y. with Sepharial, George Llewellyn, Frank C Higgins and had associations with Edward Johndro, Luther Jensen and CC Zain. Gann also published a list of recommended books he had for sale - topics included Numerology, Astrology, the Tarot and other esoteric titles such as the Oracles of Nostradamus. In his coded novel [The Tunnel Thru the Air](#) (TTTA) he wrote about mediums, clairvoyants and even Atlantis! Sir Arthur Conan Doyle, author of *Sherlock Holmes* and *The Lost World*, is also mentioned, as he was a prominent researcher of Spiritualism in the 1920's, travelling the world investigating reports of supernatural spirit phenomena.

From TTTA,

"I believe in the stars, I believe in Astrology and I have figured out my own destiny. The Bible makes it plain that the stars do rule. 147th Psalm, 4th Verse:

"He telleth the number of stars, he calleth them all by name.

I believe the wise men of the East, the astrologists before the birth of Jesus Christ, knew where and when he would be born by the study of the stars."

It has been said that to truly understand the secrets and symbolism in TTTA you need not only to be an astrologer but also a high degree Mason like Gann. In this regard, my research reveals that Masonic rituals stem from ancient Egypt and the Temples of Initiation. We know that Pythagoras was initiated into the Egyptian mysteries and taught the secrets by the High Priests. Gann made trips to both Egypt and India in search of ancient texts where he found the Square of Nine, an ancient system of both Time and Number also referred to as The Pythagorean Cube and the foundation of ancient Numerology.

"The SQUARE OF NINE is very important because nine digits are used in measuring everything. We cannot go beyond 9 without starting to repeat and using 0. If we divide 360^0 by 9, we get 40, which measures 40^0 , 40 months, 40 days and 40 weeks and why bottom and tops often come out on these angles measured by one-ninth of the circle. This is why the children of Israel were 40 years in the wilderness".

Did you know that the Great Pyramid of Giza has eight sides?

"One very unusual feature of the Great Pyramid is a concavity of the core that makes the monument an eight-sided figure, rather than four-sided like every other Egyptian pyramid. That is to say, that its four sides are hollowed in or indented along their central lines, from base to peak. This concavity divides each of the apparent four sides in half, creating a very special and unusual eight-sided pyramid; and it is executed to such an extraordinary degree of precision as to enter the realm of the uncanny. For, viewed from any ground position or distance, this concavity is quite invisible to the naked eye. The hollowing-in can be noticed only from the air, and only at certain times of the day. This explains why virtually every available photograph of the Great Pyramid does not show the hollowing-in phenomenon, and why the concavity was never discovered until the age of aviation. It was discovered quite by accident in 1940, when a British Air Force pilot, P. Groves, was flying over the pyramid. He happened to notice the concavity and captured it in the now-famous photograph."

When referring to the Square of Nine, Gann wrote, "The angles 90, 180, 270 and 360 form the first important cross, known as the Cardinal Cross. The angles of 45, 135, 225 and 315 form the next important cross, called the fixed cross. These angles are very

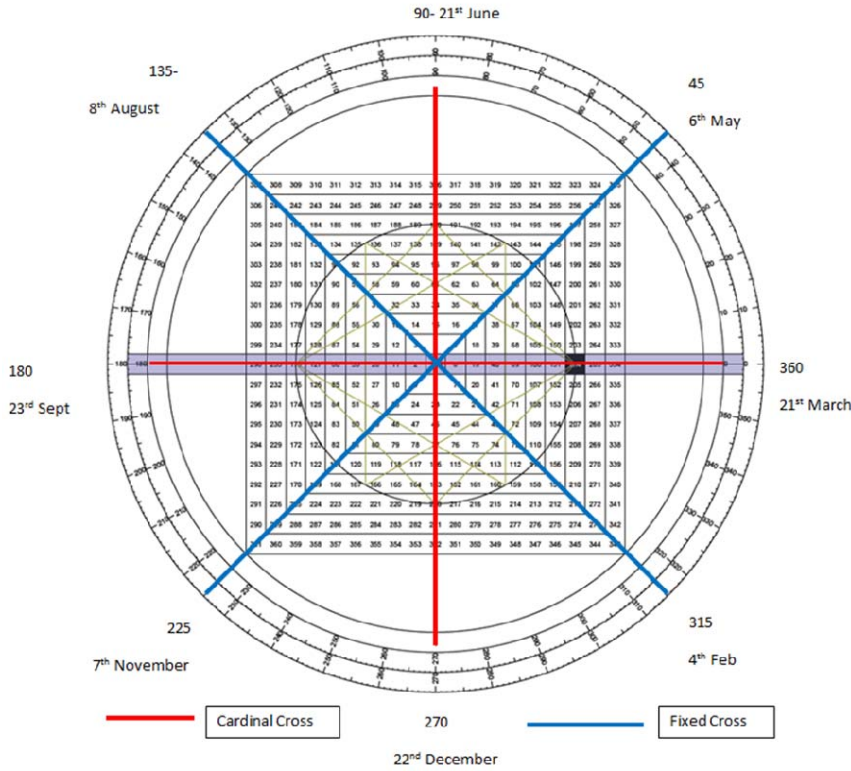

Diagram 1 – Square of Nine (8 sections of the Great Pyramid).

important for the measurements of time, space and volume.” All these angles are known as Gann seasonal dates and mid-seasons in trading and divide the circle by the 8th harmonic (Diagram 1).

Since I'm a Cosmobiologist, I use the 90 degree dial which incorporates both the 4th and 8th harmonics. Imagine overlapping four quarters one on top of the other, all joining at zero degrees. (See Diagram 2.)

The four cardinal points all overlap at the zero point on the dial and the 15 degrees of the fixed cross align directly across the dial. As you can see, any degree directly across the dial, that looks like an opposition, is actually half of the 90 degrees, therefore has to be either semi-square (45) or sesquiquadrate (135) - this is the 8th harmonic. When we work with the 90 degree dial, one must therefore always consider what is across the dial. For example, in Diagram 2, 21 degrees mutable will equal 6 Fixed across the dial.

When I first started researching Gann's work, I wanted all and any of his charts, especially those with astrological symbols and horoscopes. One particular horoscope he had drawn for when Coffee Futures started Trading, the date being 17th March 1882 at 10.30 am New York. A copy of his hand drawn chart is on page 6. You can see how he has drawn the natal positions then the transits of an extreme low in coffee on Oct 10th in 1936 (low 3 cents, written in the lower right hand corner).

Beneath that I have replicated this chart as a bi-wheel (page 8) highlighting the major aspects to the natal chart. The natal sun position is 17 degrees of Pisces, and at the extreme low, transiting Saturn was forming an opposition to transiting Neptune both square transiting Jupiter - this is known as a T-Square and a classic midpoint structure, where transiting Jupiter = Saturn/Neptune midpoint all at 17 degrees mutable and therefore directly triggering the natal Sun.

If we now look at this combination on the 90 degree dial (Bi-wheel 2 on page 9) you can see all the transiting planets together triggering the natal Sun/Uranus /Asc in the mutable section. This is all hard energy that will not go unnoticed.

Has this axis remained active? The answer is yes, the most current extreme low in Coffee was 25th May 2002 and you can see that transiting Saturn was square transiting Pluto in the same mutable area (Bi-wheel 3 on page 9). Therefore, finding sensitive degrees within the natal chart provides one with hot spots to watch for future transits.

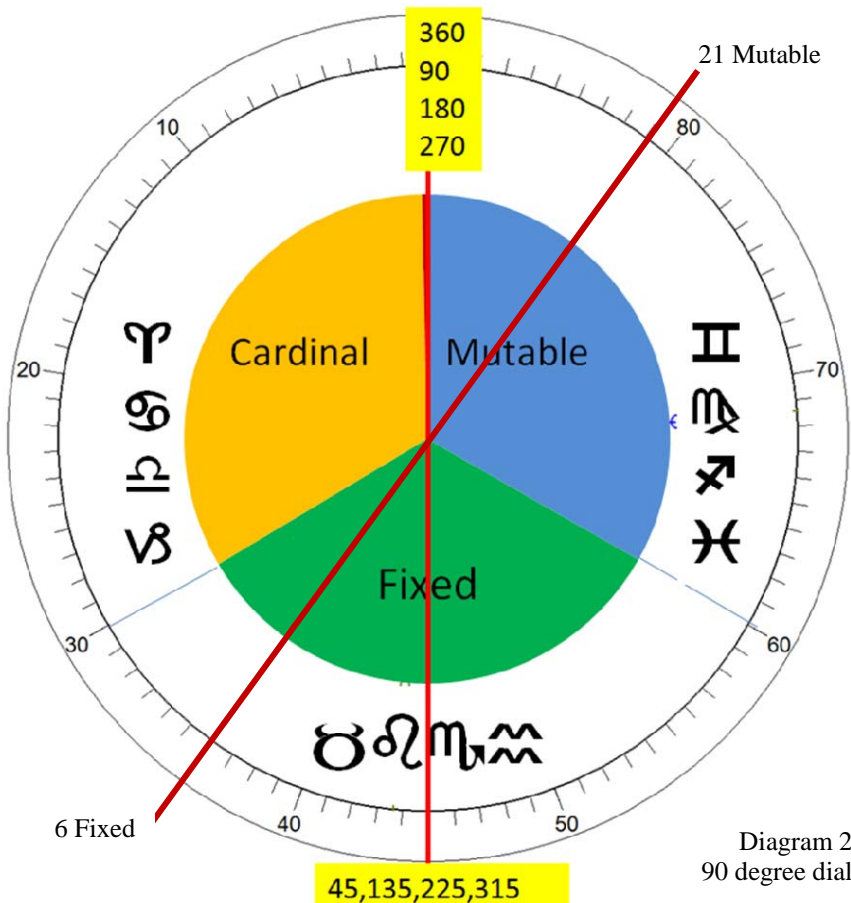

Diagram 2 90 degree dial

A.P.A Exam Scholarship: Guidelines for Applicants

The APA Exam Scholarship provides financial support to astrology students wishing to undertake the FAA Examinations. Four scholarships are available on an annual basis with no more than one scholarship per year per student. The scholarship will cover the cost of the examination which will be paid directly to the Exam Board. Successful applicants may apply again for assistance with further exams, provided they have been successful in all FAA examinations undertaken previously.

The 2014 Scholarships are available for candidates who are planning to sit the following exams:

- 2014 Dynamic Exam in October 2014
- 2015 Interpretation Exam in February 2015.

To be eligible for this package the applicant must meet the following criteria:

- Be a current member of the FAA and an Australian resident.
- Be intending to sit all four of the FAA Examinations over the next few years. Preference will be given to students who have already [successfully] begun the FAA examination process.
- Be planning to become an APA member when they are qualified and be willing to undertake the supervision necessary to become an accredited professional astrologer.
- Be able to provide a written application sent by email to APA stating the reasons how/why the sponsorship would assist them. This may or may not be due to financial hardship.

More details of the scholarship along with instructions for applicants are available in the document

A.P.A. Exam Scholarship Guidelines for Candidates,
which can be found on the A.P.A. website www.apainc.org.au

2014 applications close on July 31 and successful applicants will be notified by the end of August.

Please refer to the above detailed guidelines and **email your application by 31 July 2014** to:
the A.P.A. Secretary, Christine Rothwell at christiner@netspace.net.au
and cc the APA Vice President, Anne Button at aebutton@people.net.au

Changes to VAA Membership

Payment of membership fees at the end of the year is proving problematic for some members, so the committee has decided to change the membership period **to correspond with the Financial Year.**

As of 1st July 2014, we will begin to phase in the change. From then, and at the expiration of the current membership term, members will have a choice of paying either for 6 months to 30th June 2015 or 18 months to 30th June 2016 at the current rate.

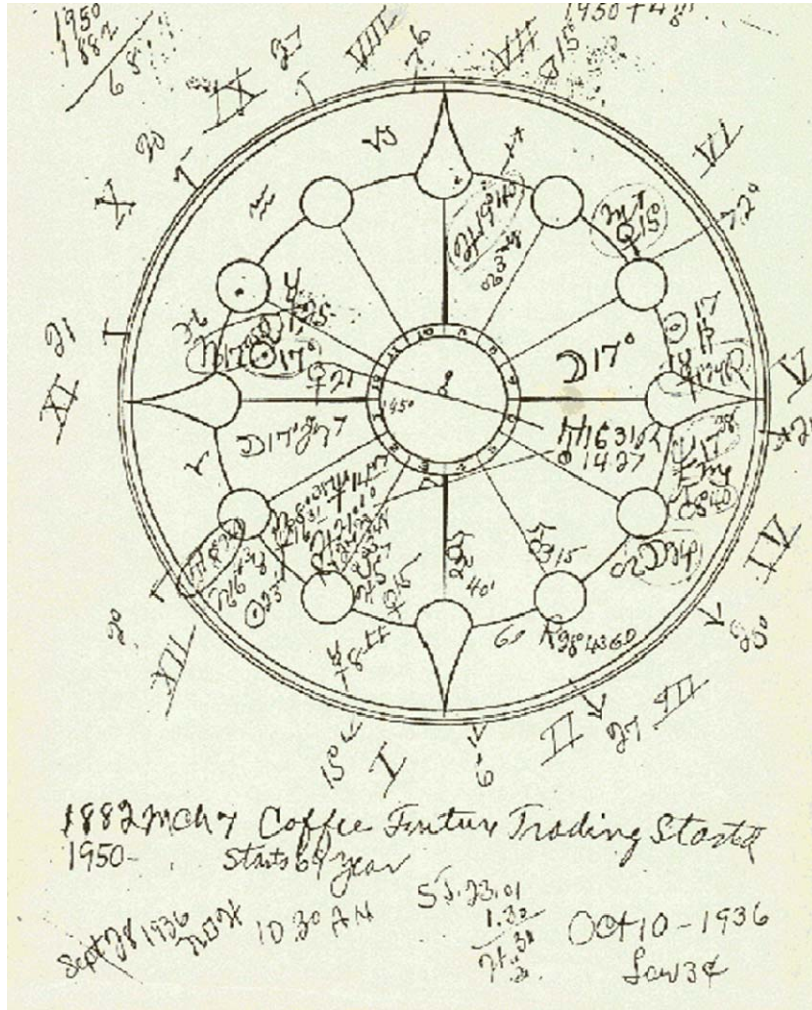

Rather than increase membership fees at present, we will introduce an enhanced **New Member Welcome Package** and there will be a joining fee of \$15.

This will apply from 1st July 2014

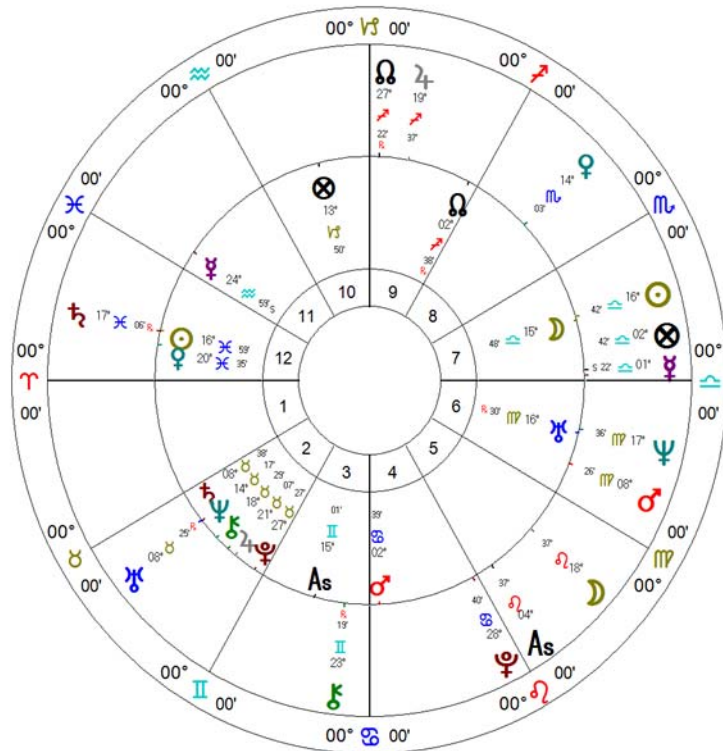

There will remain a 2 month grace period to renew membership, and any membership that lapses past the 2 month grace period will **also** incur the \$15 joining fee.

The 90 degree dial incorporates both the 4th and 8th harmonics, and therefore works like magic for Gann analysis. The four cardinal points all overlap at the zero point on the dial and the 15 degrees of the fixed cross align directly across the dial. Studying planetary cycles according to these harmonics brings another dimension to your analysis - revealing sensitive degrees that often are overlooked by traditional methods.

Stalls now being secured for our First

COSMIC MARKET

at the Convent in Abbotsford

STALLHOLDERS

Come join the very first Cosmic Market

October 25, 2014

from 10am - 4pm

(setup from 9am)

Abbotsford Convent
Community Room
1. St Heliers Rd
Abbotsford Melbourne

Great Spring weather, lot's of buzz, all things Cosmic!

If you have a Cosmic thing to sell or share, be part of this new marketplace - only 20 stalls available

Join in with the C*I*A as a stallholder and promote your Astro related products and services: there will be readings, clothes and Astro jewellery, books, specialist education, practitioners etc

Stall pricing is **only \$60** - 2.5m x 2.5m area with a 2m long table. Please note that there are no wall hangings, naked flames or incense. You may of course bring your own banner stands that require no wall support.

Bookings are on a first-come basis.

Please remember that this is a cosmic activity related market, not a body and mind show :)
