

LF3

DESCRIPTION:

LF3 is a near-neutral emulsion containing a dimethyl polysiloxane and an anionic emulsifier. LF3 will prevent and destroy unwanted foam in many industrial applications.

USE RECOMMENDATIONS:

LF3 can be used “as is” or in dilution to meet the needs of the application. The amount of dilution is dependent on the type, amount and conditions of foam generation.

VIBRATORY FLOW THROUGH

CONCENTRATION: ½ to 5 oz per 75 gallons of H₂O

pH: 7.0 – 8.0 of the concentrate

For additional information such as physical characteristics, safety precautions, disposal, etc., see corresponding SDS.
