

**May 31, 2001 and June 7, 2001**

The Mindshift Institute presented two conversational evenings in New York City, *ORGONE PHYSICS: The Foundation for a New Life-Positive Science* and *WHY ARE THEY HERE? The Implications of the Presence of Non-Human Intelligences for Human Existence*. The first evening demonstrated how the new physics and cosmology provide scientific evidence for the ubiquity of life throughout creation and for the reality of intelligent non-human life. The second evening explored the investigations into the contact between non-human intelligences and human beings.

**July 29-August 4, 2001**

At the invitation of the Sacramento Institute of Noetic Sciences member group (SACIONS), The Mindshift Institute presented two conversational evenings—*Why Are They Here?* and *The Trance State*—at their annual conference in the Mendocino Woodlands in California.

**October 14, 2001**

At the invitation of the New Canaan, CT Institute of Noetic Sciences member group, The Mindshift Institute presented an afternoon workshop on the changes in our view of reality that are being brought about by emerging new knowledge of who we are, the nature of the physical universe and the presence of non-human intelligences in this realm. We looked at the impact of human political irrationalism—manifested in such activities as the ecological destruction of our home planet, terrorism and worldwide tribal warfare—from the perspective of intelligent life from beyond earth.
