# Buss Woodcraft<sup>LLC</sup>

## Bedroom Suites are our Specialty!

Thank you for choosing Buss Woodcraft for your furniture needs. We believe you will be very satisfied with the pieces you get from us. We handcraft each piece from high quality lumber to ensure a high quality end product. The lumber goes through a drying process to prevent warping and cracking before it is used in the construction of our furniture. After assembly, each piece is sanded to remove any remaining imperfections. A multi-step finishing process brings out the natural beauty of the wood and protects your investment.

### Water Resistant Finish

Our finish is spill-resistant, but liquids can still cause damage to furniture over a period of time. Always wipe up spills immediately.

### Cleaning Recommendations

We recommend a damp cloth to clean our furniture. Dry dusting can scratch the surface. If you wish to use a polish, ask your dealer for a suitable product that does not contain silicone, wax solvents or abrasives.

### Humidity Control

Humidity that is too high or too low can cause furniture to swell or dry out, both of which can cause cracking and warping. Ideal humidity is 40%–45% range.

### Nail Polish Remover

Although our finish is of a high quality, nail polish remover will cause severe damage to the finish. Do not use remover on or near any of our furniture.

### Heat Exposure

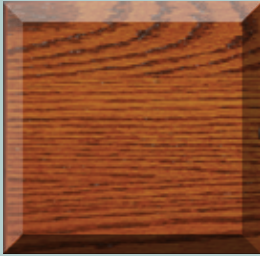

Do not put your furniture where heat from vents or other heat sources will blow over furniture as it can cause cracking. Keep in well ventilated area of your home.

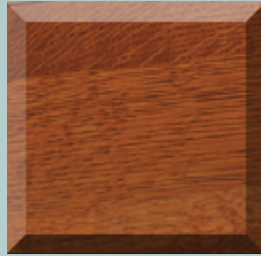

### Sunlight Exposure

Continuous exposure to sunlight can cause fading or discoloring of both the wood and finish. Keep out of direct sunlight or use blinds when the sun is shining brightly on the furniture.
