Up-Lighting

(also known as 'mood lighting')

These fantastic lights are simply the greatest way to enhance any room, creating the perfect atmosphere, and completing that 'WOW' factor for your event. Having coloured lighting around the room, really helps to enhance the ambience of the space and create the positively perfect setting.

You choose the colour(s) you would like, one specific colour or they can be placed in alternative colours around the room, or even different areas on different colours.

The choice is yours, and whatever you choose, it will look amazing!!

This enhancement can be part of your event by simply adding these to your DJ booking, **from just £50.**
